NORTH CAROLINA: **BURGAW ARPT: 300' lighted tower erected 1.0 n mi NE (66°T) at lat 34-33-25, long 77-56-15. (12-6)

CHERRY POINT MCAS-RADIO: Navy LFR shut down. (12-5)

ELIZABETH CITY-RADIO: Dec 5, VOR/DME shut down until approx March 20, 1957. Will be relctd to lat 36-15-30, long. 76-10-34. (12-5)

GREENSBORO-RADIO: DME coverage 140°-160°, 35 n mi at MEA. VOR radials 040°-050°, 310°-005° out of tolerance due to excessive roughness and bends. (12-26)

✱GREENSBORO-HIGHPOINT ARPT-TOWER: ILS lclzr back course unrestricted. This ** corrects AIRGI Vol. 11, No. 21. (1-2) FLD: Centerline hi-intensity approach light system serving runway 14 commissioned 12-20-56. System extends 3000' from runway pavement out into approach. System consists of green lights across runway at threshold, a red bar light on each side of runway 100' from the pavement, a red bar light on runway centerline 200' from the pavement, 27 clear bar lights on runway centerline at approx 100' spacings starting 300' from pavement and a clear crossbar 100' long on runway centerline 1000' from pavement. Ground checked only. (12-20)

HICKORY-RADIO: About March 1, 1957, VOR will be cmsnd at lat 35-52-19, long 81-14-19.

KINSTON-STALLINGS AIR BASE: USAF pilot trng base with intensive student trng within 25-mi radius. Clsd to all transient civilian aircraft xcpt on ofl business, or upon permission from Mil Operns Officer, Director of Flying or Manager, Serv-Air Aviation Corp. 2-way rdo rqrd. (6-17)

NEW BERN-RADIO: VOR areas toward open water flight-checked at 30 n mi.

RALEIGH-DURHAM-RADIO: DME coverage 120°-230°, 35 n mi; 230°-310°, 26 n mi; 310°-360°, 35 n mi at MIN. VOR radials 175° thru 290° out of tolerance account roughness and bends. (11-1)

RALEIGH-DURHAM ARPT: Due to non-visibility twr unable to ctl tfc on taxiway between rnwys 5 and 32. No signal between sunset-sunrise to indicate gnd visibility of less than 2.6 n mi and/or a ceiling of less than 1000'. Rnwy 18-36 lgtd sunset-sunrise when wind less than 6 mi unless other rnwy requested. (8-27)

SALISBURY ARPT: Bndry lights inop. (2-16)

WILMINGTON-RADIO: VOR quad 65° to 235° flight-checked to shoreline only. (8-14)

**WILMINGTON-NEW HANOVER CO. ARPT: 200' (210'MSL) lgtd twr erected 5.2 n mi WSW(253°T) at lat 34-14-52, long 78-00-09. (12-6) Helicopters landing and take-off use caution to avoid 55' unlighted overhead high voltage p-line running W from control tower to airport boundry. Open ditch 1500' W of midfield intersection 60' from both sides rnwy 9-27. Due to non-visibility twr unable to control traffic on taxi strip between rnwys 16 and 23 and section W of hangar on taxi strip from terminal ramp to runway 9. (8-1)

NORTH DAKOTA: FARGO-RADIO: October 8, VOR/DME shut down until approx January 15-modernization. (12-18)

FARGO-HECTOR FLD: 200'(1101'MSL) lgtd twr erected 5.8 n mi SSE(166°T) at lat 46-49-52, long 96-47-53 and will be dismantled approx January 14, 1957. (12-7) About January 17, 1957, 200'(1268'MSL) unlgtd twr will be erected 24.2 n mi W(270°T) at lat 46-55-07, long 97-24-23 and being dismantled approx January 27, 1957. (12-12) 1000' of rnwy 17-35 rough for jets on W side starting 4000' from S end. Jets should use center of E side. (6-6) Stacks of drainage tile 300' W of rnwy 17-35. (12-12)

JAMESTOWN ARPT: About January 27, 1957, 200'(1685'MSL) lgtd twr will be erected 13.9 n mi ESE(113°T) at lat 46-50-14, long. 98-22-24 and being dismantled approx Feb 10, 1957. (12-12) About Feb 3, 1957, 200'(2145'MSL) lgtd twr will be erected 18 n mi NW (300°T) at lat 47-04-55, long. 99-03-04 and being dismantled approx Feb 10, 1957. (12-12)

VALLEY CITY ARPT: About January 23, 200'(1661'MSL) lgtd twr will be erected 3.9 n mi ENE(89°T) at lat 46-56-17, long. 97-55-24 and being dismantled approx Feb 3, 1957.

WESTHOPE ARPT: Field rough - use with caution. (6-14)

OHIO: AKRON APT: Due non-visibility twr unable ctl tfc SSW airdock on apch to rnwy 36L.

AKRON-CANTON ARPT-TOWER: ILS back course has flyable bend 4 to 2 n mi from stn, displaced 3.5° E rnwy 18 centerline throughout area of bend. ILS glide slope usable to apch end rnwy 36 or 1230'MSL. (7-27) FLD: Non-controlled area bounded by Arwys Amber 6, Red 19, Victor 103 and Red 17 will become perm U.S. NAS Akron, Ohio acrobatic-camera gunnery area from to 20,000'durg daylgt hrs VFR conditions only.

CINCINNATI-RADIO: VOR has lgt to moderate interference 360°-60° from stn to 52 n mi at MIN. (2-23) DME coverage 60°-150°, 35 n mi at MEA. (1-14)

CINCINNATI-GREATER CINCINNATI ARPT: Due to non-visibility twr unable to ctl single-eng tfc on NW/SE taxiway from rnwy 18 to 200' SE of rnwy 18 unless such tfc remains on fld side of this taxiway. After lndg on rnwy in use acft taxi straight ahead to nearest intsxn. No 180° turns on rnwy prior to rcvg approval from twr.

CINCINNATI-LUNKEN ARPT: Due to non-visibility twr unable to ctl tfc in tfc pat directly NW of fld. Prior to departure acft with no rdo are rqrd to fone twr for taxi and take-off instructions. Use rnwys only unless otherwise authorized by twr. (3-5)

CLEVELAND-RADIO: DME coverage 60°-100°, 43 n mi at 2900'; 100°-145°, 35 n mi at 2500'; 170°-190°, 35 n mi at 2500'; 245°-310°, 35 n mi at 2000';310°-060°, not checked.

CLEVELAND-HOPKINS ARPT: 2-way rdo capable of communicating with Cleveland Twr in satisfactory manner mandatory. (8-24) Rnwy 14-32 restricted to NW take-offs and SE lndgs. Const of N concourse in progress 800' N from main terminal. Unlgtd snow fences erected in sod areas W of N and S hangar lines. Elevated lgts 30" high installed all taxiways and runways 18R-36L and 23L-5R. (11-17)

CLEVELAND-LAKEFRONT ARPT: New rnwy const in progress 200 ft N of present rnwy. Ctc CLE rdo or CEL unicom for lndg instructions. (11-29)

CLEVELAND-LAKEFRONT SEAPLANE BASE: Clsd for season. (10-19)

**COLUMBUS-OHIO STATE UNIVERSITY ARPT: Add prefix (PC). (12-14)

COLUMBUS-PORT COLUMBUS ARPT-SPECIAL NOTICE: VFR Jet Traffic Rules - Take-offs: Rnwy 27 - turn to a heading of 360° as soon as safety will permit and maintain 360° heading until clear of airport control zone. Rnwy 9 - turn to a heading of 110° as soon as safety will permit and maintain 110° until clear of airport control zone. Entering control zone - maximum airspeed 250 knots. Maintain 2000' MSL until on base leg for lndg apch. VFR Multi-engine Rules - Take-offs: Rnwy 23 and 27, a right turn following take-off is required to avoid hvy populated area W and SW of arpt. Approach for Landing: Maintain 2000'MSL until on base leg or if a straight-in apch is used maintain 2000' MSL as long as practical before starting normal descent on final approach. (3-23)

OHIO: COLUMBUS-PORT COLUMBUS ARPT: Due to non-visibility twr unable to control tfc on E taxi strip between hangars 1 and 4.
COLUMBUS-SULLIVANT AVENUE ARPT: Construction - men and equip. on fld. (7-2)
DAYTON-RADIO: VOR has moderate roughness from 120°-200° at min en route alt. DME coverage 150°-220°, 30 n mi at 2400'. VOR has interference from 90° clockwise to 240°. This area not to be used for IFR opern acct unreliable course indication during period of interference.
DAYTON ARPT: Caution when apchg arpt as fluorescent street lgtg paralleling S bndry of arpt can be mistaken for rnwy lgtg. No grass operations. Rdo rcvr rqrd. Due to non-visibility, twr unable to ctl tfc on taxiway from E and N side to W side of hangars. Use unpainted area of concrete for taxiing in line with blacktop on taxistrip. Caution in apchg rnwy 6-24. Construction area 500' NE end and 1000' SW end, smooth hard-packed gravel free of obstructions not suitable for touchdown. Lndg should be made beyond green threshold lgts. End of pavement and beginning of construction areas mrkd by row of red lgts across ends rnwy 6-24. End of pavement rnwy 24 mrkd by row of red flags for day-lgt opern. (1-7)
DAYTON-MONTGOMERY COUNTY ARPT: Clsd - const. (8-6)
DAYTON-PATTERSON/WRIGHT-PATTERSON AFB-RADIO: USAF VHF/DF unreliable below 3000', 295°-305°; below 2500', 306°-294°.
DEFIANCE-BRYAN-DEFIANCE MEMORIAL ARPT: N/S rnwy and sod areas clsd. (2-2)
FINDLAY-RADIO: DME coverage 220°-140°, 44 n mi; 140°-220°, 35 n mi at MEA.
GALION-CRESTLINE ARPT: N/S rnwy clsd.
GROVE CITY-REAVER ARPT: E/W rnwy closed. (4-16)
HAMILTON ARPT: Const on N side of E/W rnwy. Equip. on fld days. Caution on apch W end. N/S rnwy clsd to all tfc. (8-31)
JEFFERSON-RADIO: VOR coverage restricted to 30 n mi from 90° clockwise to 105° and 120° to 185° at MOCA.
MANSFIELD-RADIO: VOR has excessive roughness and course displacement (max 7°) 3 to 5 n mi from stn 100°-190°. Moderate roughness from 350°-100°. Moderate to severe roughness and bends on Victor 5, 204° radial; and on Victor 92, 310° radial. (12-6)
PORT CLINTON ARPT: Const 400 ft gravel extension N end rnwy completed. Caution durg wet thawing wea. Extreme edges 40 ft wide extension soft in spots. Rnwy 2180 ft hard surface; 150 ft stone S end, 400 ft stone N end, approx 950 ft sod over-run beyond stone N end. Soft sod areas durg wet wea. Ctc Port Clinton Unicom for fld conditions. (12-7)
PUT-IN-BAY ARPT: Caution - blind spots to acft on gnd preparing to take-off, autos across the SW end of NE/SW rnwy, fld rough. Soft when wet. Clsd to transients when cut up then becomes frozen. Approx 600 ft new gravel 18 ft wide on NE/SW rnwy rough. Ctc Port Clinton Unicom for fld conditions. (12-7)
SANDUSKY-RADIO: Nov 26, VOR mobile test unit operg on 109.2 mc at lat 41-20-33, long. 82-42-33.
SPRINGFIELD ARPT: Caution - controlled jet tfc operg off fld. (9-29)
TOLEDO-EXPRESS ARPT: Const in progress on 850 ft extension NE end and 950 ft SW end rnwy 7-25 and associated taxiway. Equip. operg in these areas. Do not land short of threshold markings. Areas flagged. 5200 ft usable. (10-31)
TOLEDO MUN ARPT: Use rnwys and taxiways only. Areas adj rnwy plowed. (5-11)
WATERVILLE-RADIO: VOR coverage 39 n mi at min en route alt. DME coverage 260°-280°, 34 n mi at 2000'.
WILLOUGHBY-LOST NATION ARPT: Caution - const NE/SW rnwy being extended to NE flagged days. (9-17)
YOUNGSTOWN-RADIO: DME coverage 127°-259°, 26 n mi at 2600'; 344°-010°, 35 n mi at 2400'. VOR radials have moderate flyable bends beyond 15 mi. (2-15)
YOUNGSTOWN ARPT-TOWER: VHF/DF unreliable 100°-260°, below 3000'; 270°-030° below 3500'. (3-25) UHF/DF unreliable below 3000' MSL all quads. (10-24) FLD: Use rnwys and taxiways only. Under VFR conditions fighter type acft within 13 n mi and below 6000' will apch arpt within bndry NW quad Youngstown Rng. Due to non-visibility twr unable to control tfc on section of concrete NW/SE taxiway from the intsxn of the E/W taxiway NW to the end. (2-15)

OKLAHOMA: ARDMORE-RADIO: DME coverage 230°-280°, 35 n mi at 2300'.
CLAREMORE-WILL ROGERS FLD: Bndry lgts inop. (6-11)
DURANT-EAKER FLD: 1800' NW end NW/SE rnwy clsd. (5-16)
GAGE ARPT SITE 13, AMA-MKC: NE/SW rnwy clsd to aircarrier and ngt operns.
GUYMON ARPT: N/S rnwy closed - due const. Caution equip. on fld. (10-31)
**NORMAN-WESTHEIMER ARPT: 80, 87, and 100 octane gas avail. (12-14)
OKLAHOMA: NOWATA ARPT: Caution - NE/SW rnwy under part-time const. (9-25)

PACKWOOD ARPT: Clsd - due snow. (12-7)
PULLMAN-MOSCOW ARPT: Rnwy lgts avail on request. W taxiway clsd. Use rnwy to taxi for E take-off. Take-off may be made from rnwy at center taxiway intsxn at pilot's discretion. (12-20)
RENTON ARPT: Work in progress on arpt. (11-30)
RIMROCK-TIETON ARPT: Clsd - due snow. (12-7)
**SEATTLE-BOEING FLD: All multi-eng acft use main rnwy. 2-way rdo equipped, medium type, single-eng acft may use main rnwy on req. PROVIDED local tfc permits. Single-eng acft with retractable landing gear drop landing gear prior to entering traffic pattern. (7-19)

WASHINGTON: SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat. W of fld at 1500- - use main rnwys, taxi strips only. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4. W side taxiway clsd to tfc until further notice. (10-11)

SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. FLD: Taxiway between rnwy 29 and rnwy 34 clsd. Rnwy 11-29 clsd. Radiosonde balloon being released at approx 0300Z, 0900Z, 1500Z and 2100Z daily - actual release time will be broadcast by Seattle rdo. Hi-intensity apch lgt sys S end rnwy 16-34. First row lgts at N end of sys perm discontd. Second and third row lgts at N end reestablished. First row lgts now 300' S of rnwy 34. (11-1)

SKYKOMISH ARPT: Closed - due snow. (12-7)

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'. (6-17)

SPOKANE-FAIRCHILD AFB-RADAR APPROACH CONTROL CENTER: Effective Feb 6, radar arrival control will be established. Also receives 122.5mc, 3023.5 kc and trans and rcvs 298.9 mc.

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip. on fld.

SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable, 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'. FLD: Perm crash barriers 40 inches high lctd 150' off ends rnwy 3-21.

TACOMA-BARRY'S SKYHARBOR ARPT: Closed. (6-14)

WHIDBEY ISLAND NAS-RADIO: Voice communications out of service. (11-6)

**WINTHROP-PASAYTEN USFS ARPT: Closed. (12-27)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.

WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (6-18)

CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test basis.

ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)

ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop.

GLENDALE ARPT: Ditch under construction across N/S rnwy 700' N of S boundary. Will be mrkd by flags. Rnwy length reduced to 2200' until further advised. (12-13)

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.

MARTINSBURG ARPT: Serv fac avail 0800-sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgts. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Rnwy 8-26 clsd 0700-1800 EST xcpt Sun. Men and equip. on rnwy.

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.

SUTTON, 21, CIN-DCA ARPT: Closed to all acft except single-engine. (1-3)

WISCONSIN: EAGLE RIVER ARPT: 800' S end of N/S rnwy rough, soft - unusable. Arpt clsd. until May 1, 1957. (10-12)

FOND DU LAC ARPT: Caution - use center of rnwys - due soft rnwys and shoulders during winter and early spring. Snow will be rolled on the center of rnwys. (12-21)

GRANTSBURG-RADIO: Oct 8, VOR shut down until approx Jan 11, 1957 - modernization.

LA CROSSE-RADIO: VOR radials 320°-335° unreliable 20 to 30 n mi from stn. (11-3)

LAND O'LAKES-KING'S GATEWAY ARPT: Clsd due ice or snow. Arpt will be plowed on request. (12-19)

MADISON-TRUAX FLD-TOWER: About Jan 11, trans and rcvr 275.8 mc will be replaced by 363.8 mc. (12-29) FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop.

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, during VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Standard Inst Acph Procedure ILS #1, Amdt #9, dated 22 Jun 56, in columns 11, 12 and 13 ** raise S-DN-1 ADF minimums from "400-1" to "500-1". 162' (878' MSL) lgtd twr erected 3.3 n mi SSW (196°T) at lat 42-53-49, long. 87-55-07. (11-3) Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities limited - itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusion of rnwy 1 with parallel taxiway to left. (8-15)

OSHKOSH-WINNEBAGO COUNTY ARPT: Use only N/S and E/W rnwys winter months.

WOODRUFF-ARBOR VITAE-RADIO: H fac operg on request basis. (12-28)

WOODRUFF-ARBOR VITAE ARPT: During winter months, arpt attended week-ends and afternoons when weather is VFR. (12-28)

WYOMING: CASPER-NATRONA CO. ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' & beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Two 200' fences SW end of ramp not obstn lgtd. (11-16)

CHEYENNE ARPT: Overrun lgts (apch lgts) rnwy 26 inop. (10-18)

GILLETTE ARPT: 50' - 75' W shoulder 1500' from N end N/S strip soft-clsd to hvy acft.

KEMMERER ARPT: Caution - reseeded and soft. (6-22)

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.

ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM & LFR.

ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - mrkd.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150°-280°. Moderate crs roughness exists in mountainous area.

THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip on fld. Use extreme caution.

PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' - 60' high operg intermittently approx 1000' off E end rnwy 9R-27L. Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND: (MSL) - Mean sea level. (AGL) - Above ground level. B - Antenna structure on a building. DISTANCE is given in nautical miles. BEARINGS are true.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an indivisual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that thould be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of +4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*new York (LaGuardia 112.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

RADAR PROCEDURES

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach or, for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:

Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . Control Tower, (City, County, Private, etc.)
D. . . . Distantly controlled

DME. . . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TASR. . . . Terminal Area Surveillance Radar
TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . Visual-aural VHF range
VOR. . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(22 Jan 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an amergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine [illegible] provided and will request pilot to change to appropriate frequency for [illegible] radar. Radar station will be identified by "THIS IS AIR FORCE" [illegible] and vectors to circumnavigate storm areas will be of advisory [illegible] of responsibility for safety of aircraft. If advisory service cannot be provided, [illegible], the procedure word "UNABLE" will be used. This will terminate radar service to the aircraft without further explanation. This service will be available in the ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

SEE REVISED NOTE ON PAGE 4

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
   "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____), IFR (or) VFR FLIGHT PLAN, OVER"
   The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.
   (a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.
   (b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
   "(aircraft identification) THIS IS (name of radar site), (instructions)"
   The instructions will normally consist of one of the following:
   (a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)
   (b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).
   (c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).
   (d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).
   (e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
   (a) radio contact with the director is lost.
   (b) notified by the radar director that radar contact has been lost.
   (c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

NOTICES TO AIRMEN
SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman s Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. . -. -.-. ... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier

---

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VFR or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace

---

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

(22 Jan 1957)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956 measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departure shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCE: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

✓ ATLANTA AND JACKSONVILLE ARTCC BOUNDARIES CHANGED: Effective 0001, January 10, 1957, Atlanta Center and Jacksonville Center boundaries are amended as follows: Beginning at the present bndry crossing VOR civil arwy No. 241 and Red civil arwy No. 67, 25 miles SW of the Columbus, Ga. LF rng stn, thence direct to the junction of the southern bndry of VOR civil arwy No, 134 and the eastern bndry of VOR civil arwy No. 7, thence along the southern bndry of VOR civil arwy No. 134 crossing VOR civil arwy No. 7 and Blue civil arwy No. 3, thence direct to the present Atlanta Center and New Orleans Center bndry crossing VOR civil arwy No. 115 and Blue civil arwy No. 55, sixty miles S of the Maxwell, Ala. LF rng stn.

✓ RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective February 7, 1957:

(Part 608 - Restricted Area - Amendment 184)

(1) In Section 608.20, the Sailor Creek, Idaho, area (R-254 formerly D-254), published on July 16, 1949 in 14 F.R. 4290 is amended by changing the "Controlling Agency" column to read: "Mountain Home Air Force Base, Idaho".

(2) In Section 608.45, the Boardman, Oregon, area (R-251), amended on November 2, 1955 in 20 F.R. 8211 is further amended by changing the "Time of Designation" column to read: "Continuous"

✓ ON-REQUEST REPORTING POINT: The following on-request reporting point is cancelled and shall become effective February 12, 1957:

(1) DISTRICT, D.C. VHF INTSXN - the intsxn of the 110° mag radial of the Herndon, Va. VOR and the 023° mag radial of the Washington, D. C. TVOR.

✓ INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

✓ TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 8 - Loran Data - Correct Nantucket, R. I. to read: Nantucket, Mass.

(2) Page 24 - Wichita, Kans. Correct WB telephone number to read: WHitehall 3-1171*.

(3) Page 26 - Cincinnati, Ohio - Add WB telephone number to read: DUnbar 1-6706*.

(4) Page 104 - (Ground) Hobbs, N. Mex., Lea County Arpt. Add VOR rcvr check point: 241°; on middle air carrier ramp.

(5) Page 106 - (Ground) Roswell, N. Mex. Add VOR rcvr check point: 027°; on SW runway intersection runways 12-30.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Cleveland	Chicago Local	WAC 307
Huntington	RC 2211	WAC 308
Nashville	RC 2215	WAC 360
New York		

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRMAN'S GUIDE CORRECTION:

Correct Airman's Guide, Volume 11, Number 22, dated January 8, 1957, as follows:

(1) Page 4 - VOR Civil Airway No. 38: Delete MEA's between Iowa City, Iowa VOR and Joliet, Illinois VOR.

(2) Page 4 - VOR Civil Airway No. 60: Correct MEA from Pleasant Hill, N. Mex. Intsxn to Farwell, Tex. Intsxn to read: 13,000'.

(3) Page 5 - Seattle-Salt Lake City Center ATC Boundary: Correct boundary description to read: "From 45° N 115° W south to 42° N 115° W; thence west along 42° N to intersect the present boundary.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

★ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° have bends and roughness out of tolerance. About Feb 11, VOR will be shut down until approx Feb 25. (1-3)

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are marked. Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: VOR operg, test basis only, at lat 33-40-11, long. 86-58-58, about 10 n mi NW Birmingham Mun arpt. (12-14)

BIRMINGHAM ARPT: Caution - tfc operg in area from 165° clock wise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.

MOBILE-BATES FLD-TWR: Nov 7, ILS lclzr and glide slope shut down - severe bends. FLD: Due space shortage, all transient and lcl acft not permitted parking space on Admin Bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft - const. Easternmost 5000' avail days, easternmost 6000' avail sunset-sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)

TUSCALOOSA-VAN DE GRAAFF ARPT: Tow car pulling glider daylgt hrs. (11-8)

ARIZONA: AJO ARPT: Bcn and lgts inoperative. (6-18)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi;090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

GRAND CANYON (S. RIM) ARPT: Due weather conditions, clsd until April 1, 1957. (12-26)

PHOENIX-PARADISE ARPT: Open on racing days only. (1-15)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185° 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Caution - puncture vines. (6-18)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Clsd. (3-26)

TUCSON-RADIO: VOR/DME coverage 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'.

ARIZONA: TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF steers unrel beyond 35 n mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

**TUCSON-GILPIN ARPT: Effective Jan 31, arpt will be permanently clsd. (1-15)

WINSLOW-RADIO: Dec 11, VOR shut down until approx Jan 25, During shut down following arwys will not be usable: V-12 and 12N Prescott, Arix-Zuni, N. Mex. V-95 Phoenix - Winslow usable, substituting Winslow LFR for VOR, MEA 11,000'. (1-12)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA: (5-18)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (8-27)

ARKANSAS: FLIPPIN-RADIO: About Jan 28, 1957, VOR will be shut down until approx April 1. (12-11)

HARRISON ARPT: Fld clsd ngts.

**PARIS ARPT: Abandoned. (12-6)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends. About Jan 28, VOR will be shut down until approx March 28 - relctd lat 33-30-50, long. 94-04-20. (12-28) VOR flgts authorized to use TXK LFR in lieu of VOR. (1-3)

CALIFORNIA: AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys.

BLYTHE-RADIO: VOR/DME coverage 45 n mi xcpt 25n mi 180°-200°; 30 n mi; 280°-300°, 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

CAMARILLO-RADIO: All courses a have multiples. (6-17)

CRESENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DIXON ARPT: Clsd. (8-30)

EL CENTRO-RADIO: About Jan 14, VOR will be cmsnd. Freq: 113.9 mc. Ident: ELC.

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

**GLENDALE-GRANDE CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

**INDEPENDENCE-INYO COUNTY ARPT: Abandoned. (1-2)

KLAMATH-McBETH ARPT: Clsd. (6-13)

**LA MESA-SWEETWATER ARPT: Abandoned. (1-5)

**LIVERMORE-DOW ARPT: Permanently clsd - land diverted to farming. (12-19)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

★LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) Jan 16, Surveillance apch radar cmsnd. (1-16) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1)

LOS ANGELES-RADIO-SPECIAL NOTICE: July 3, transcribed weather bdcasts oper test. basis. Hrs opern: 0800-1800. Manual bdcast continues on VOR and both VOR & LF combined. (7-16)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E bound from Malibu intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at aprt should avoid apch areas to W and E below 3000' in VFR weather.

CALIFORNIA: Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than one and one-half mi. Hi-intensity apch lgts rnwy 25L converted to centerline system extending 3000' E of rnwy pavement. (12-3)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700. Touch and go lndgs prohibited on Sat and Sun after 1300. (11-28)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500 ft will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°,17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.(8-20)

OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Concrete paving construction in progress in former gravel area btwn rnwy 27R-9L and taxiway along S side of hangars 3,4, & 5. Area hazard mrkd. Taxi with caution. (12-8)

OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)

ONTARIO-RADIO: VOR/DME coverage 135°-150°,26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTN'L ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

****SAN ARDO #2 ARPT: Abandoned. (12-28)**

SAN CARLOS-SAN MATEO COUNTY ARPT: Mound of dirt adj taxiway at N end has barricades and lgtd with flares. (1-18)

CALIFORNIA: ****SAN DIEGO-SPECIAL NOTICE: Effect Jan 25, 1957 the San Diego Offshore Warning Area W-291, is re-established in the following described area: beginning at lat 33-10-00, long. 117-30-00; thence to lat 32-49-00, long. 117-20-30; lat 32-42-30, long. 117-44-00; 32-33-00, 117-40-00; 32-40-00, 117-15-30; 32-31-30,117-10-30; 32-31-30, 117-30-00; 32-13-00, 117-30-00; 32-13-00, 117-12-00; 29-35-00, 115-57-00; 29-35-00, 118-10-00; 24-00-00, 125-00-00; 27-30-00, 127-10-00; 30-40-00, 120-50-00; 30-50-00, 120-40-00; 31-50-00, 119-42-00; 32-09-30, 119-42-00; 33-18-00, 118-28-00, to point of beginning.**

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (9-17)

SAN DIEGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)

SAN FRANCISCO ARPT-TOWER: Jan 7 radar shut down until approx Jan 22 - modification.

**** FLD: 190' (1412'MSL) lgtd twr erected 5.8 n mi NW (323°T) at lat 37-41-21, long. 122-26-12.**

Floyd Bennett tfc can normally be avoided by not exceeding a heading of less than 270° mag until abeam Floyd Bennett prior to proceeding on desired course. VFR acft not intending lndg at any of New York metropolitan arpts should avoid apch areas thereto below 2500'. Recommended crossing traffic plan crossing area at 2500' or above, ceiling permitting, avoid shoreline S of Flatbush, Floyd Bennett and Idlewild due hi-density tfc in that area. Acft arriving or departing Idlewild or LaGuardia requested to remain well clear of Mitchell AFB. (10-1)

NEW YORK CITY-SPECIAL NOTICE: Unless authorized by ATC all acft shall follow standard left-hand rectangular tfc pat. within 4.3 n mi radius of arpt; in lndg join tfc pat. at or above 1200'MSL, weather permitting. This applies to New York International (Idlewild)Arpt; La Guardia Fld, New York, and Newark Arpt, New Jersey.

NEW YORK: NEW YORK INTERNATIONAL (IDLEWILD) ARPT-TOWER: About Jan 21, ILS serving rnwy 22 will be cmsnd. Lclzr freq: 110.9 mc. Lctd 475' SW end of NE/SW rnwy 22. Elev: 10' MSL. Bear: 222°. Ident: IWY. Glide slope freq: 330.8 mc. Lctd 300' SE of centerline of NE/SW rnwy & 1248' from apch end of rnwy 22. Elev: 11' MSL. MM lctd 3400' from NE end NE/SW rnwy. Elev: 61'MSL. OM lctd 5.53 mi from NE end of NE/SW rnwy. Elev: 75'MSL. Alt over MM 240' MSL; OM 1500'MSL. Concurrently with cmsng of ILS, Elmont FM on back course ILS serv rnwy 4, will be decmsnd. (1-4) FLD: Lndgs & take-offs prohibited unless acft equipped with 2-way rdo. Clsd to fighter-type acft. Clsd mil acft xcpt on ofl. bus, or flag rank or higher. Clsd to motorless acft. Clsd to jet propelled acft xcpt prior permission of Arpt. Manager. Caution - used paved surfaces only. Rnwy 1L-19R and 7L-25R perm clsd for lndgs and take-offs, both avail for taxiing. Rnwy 1R-19L clsd for maintenance, avail taxiing only. (4-2). Rolling surface S end rnwy 7R-25L. NATCC preferential rnwy system in effect. 185' MSL ctl twr is highest arpt structure. Follow exact centerline when using taxiway CC at road overpass. Caution - taxi A - acft running up on clsd rnwys 7L-25R, S of intersection with rnwys 13L-31R. No thru taxiing past gates 7A-8A. Access to gates 1E to 7A via taxi B. Access to gates 8A to 25 via taxi C. Const in progress adj all paved surfaces. 150' cranes and hvy truck operns within arpt boundary - mrkd. New exten. taxiway temp LL from rnwy 13L-31R to taxiway E open for full operation. Mrkd by delineators. Follow centerline all taxiways (10-23). Taxiway D open between CC and rnwy 13L-31R (9-21). Ext. of taxiway CC connecting taxi J and U opened (9-24). Relocated taxi CC between A and Z opened (10-21). Taxi O between taxi X and W opened (10-22). New taxiways temp mrkd by delineators. Unstable shoulder conditions. Follow centerline (10-25). Temp taxi LL between taxi E and F opened. Taxi lgts irregularly spaced at taxi F and temp taxi LL. Supplemented with delineators. Taxi M connecting 13R-31L with taxi CC opened. Shoulders unstable. Temp mrkd by delineators. Caution. Follow centerline. (11-30) About Feb 1, a centerline apch lgtg sys serving rnwy 22 will be cmsnd. Sys ext 3000' from rnwy pavement out into apch. Sys consists of green lgts across rnwy at threshold, red bar lgt on each side of rwny 100' from pavement, red bar lgt on rnwy centerline 200' from pavement, 27 clear bar lgts on rnwy centerline at approx 100' spacings starting 300' from pavement & clear crossbar 100' long rnwy centerline 1000' from pavement. (11-13)

NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with La Guardia apch ctl on 119.9 mc regardless of wea. No UHF freqs avail for twr contacts. FLD: Closed to jet propelled acft, motorless, fighter type and acft over 105,000 lbs, also mil acft xcpt those carrying high govt officials. Lndgs and take-offs prohibited unless acft equipped with 2-way rdo, capable of direct commun with ctl twr on gnd ctl 121.7 mc. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. NATCC preferential system in effect. Transient helicopters land N of bullseye at Marine Air Terminal. General trucking, 40' crane, men and equip. operg inside base of dike-days. 500' apch end of rnwy 31 not usable for lndg acftdays. Obstns and equip. mrkd - flags days, lgtd ngts. Equip. parkdd 250 ft from centerline of rnwys when not in use. (9-28) About Feb 15, combination left lane apch lgtg system serving rnwy 4 consisting of 1500' hi-intensity lgts with 3600' neon lgts will be decommissioned. Simultaneously, 3000' standard hi-intensity centerline apch lgtg system configuration A will be commissioned. (1-11) Caution - use paved surface only, sod areas unsuitable for acft operns.

NEW YORK-STATEN ISLAND ARPT: N/S rnwy clsd. No ngt flying per mitted. Stay clear of marked-off area in vcnty of windsock. Use grass for taxiing. (5-22)

**NEW YORK- WEST 30TH STREET HELIPORT: Open daylgt hrs only on 30 min advance notice (tel. Longacre 4-2073). Direct commun by two-way rdo on 122.8 mc rqrd before apch and take off. Caution - ship tfc in area. (9-27)

NIAGARA FALLS-RADIO: VHF/DF unreliable below 3000' in NE quadrant, 4000' SE & SW quadrant and 4500' in NW quadrant. (6-22)

NIAGARA FALLS ARPT: Local flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with Lake Erie and the Niagara Riv as W bndry and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. (11-16)

OGDENSBURG ARPT: E/W rnwy clsd-const. (4-24)

**PENN YAN ARPT: Add prefix (PC). (12-14)

PLATTSBURGH-RADIO: VOR radials 260°-280° usable dist 35 n mi at min en route instr alt. DME coverage 265°-280°, 35 n mi at 6000'; 280°-310°, 35 n mi at 4700'; 310°-10°, 35 n mi at 2000'. (6-12)

PLATTSBURGH MUNICIPAL ARPT: VFR tfc pat. for all civil acft in vcnty of arpt is 800' to insure adequate separation from mil jet acft and jet turbulence. Non-rdo equipped acft NEW YORK: will not enter Plattsburgh ctl zone unless ceiling is 2500' and visibility 3 mi. Non-rdo equip. acft will maintain 2000'MSL until W of Arpt then let down to pat. alt.

**POUGHKEEPSIE, BCN SITE 6: Arwy bcn now operd by Dutchess County Arpt cmsnd. (1-21)

POUGHKEEPSIE-RADIO: DME coverage 290°-90°, 43 n mi at 5000'.

**ROCHESTER-MONROE COUNTY ARPT: Due to non-visibility twr unable to ctl tfc in areas S side of fld at E end of hangar line and in vcnty of T type hangars. Caution taxiing in these areas. No signal between sunset and sunrise to indicate gnd visibility of less than 3 mi and/or ceiling of less than 1000'. (3-3)

ROME-GRIFFISS AFB-RADIO: USAF VHF/DF unreliable 360°-90° below 4000', 215°-270° below 6500', 270°-284° below 6000', 284°-315° below 5000', 315° - 360° below 4000 feet.

ROMULUS-SPECIAL NOTICE: Heavy ammunition demolition approx 3 n mi NW at lat 42-46-57, long. 76-53-17, 0730-1615, Mon-Fri. Blasts cause shock and flying missiles up to 1000'.

SCHENECTADY COUNTY ARPT: Due to non-visibility twr unable to ctl tfc on apch end of rnwy 10, NG ramp, and portions of taxiways serving rnwys 22 and 33. Caution-lndg jet acft using left hand pat at 1879'MSL. Sod area unsafe. Rdo receiver rqrd. (12-3)

SPITFIRE LAKE: Closed seaplane operns-xcpt emerg.

SYRACUSE-RADIO: VOR coverage 180°-220°, 35 n mi at min en route alt.

SYRACUSE-HANCOCK FLD: VOR ground rcvr check point unusable. (1-7) First 1000' E end rnwy 10-28 closed; usable portion 6800'. Apch lgts inop. (6-8)

UPPER ST. REGIS LAKE: Closed seaplane operns xcpt emerg.

UTICA-RADIO: ILS LMM freq 254 kc usable dist. 10 n mi from 270° clockwise to 360°.

UTICA MUN ARPT: Mil acft will not fly over arpt below 2000' MSL. Lgt acft operg in vcnty of Marcy during daylgt hrs. (10-22)

WATERTOWN-RADIO: DME coverage 35 n mi at min en route alt. (7-1)

WHITE PLAINS-WESTCHESTER COUNTY ARPT: First 400' rnwy 23 not visible from ctl twr.

WURTSBORO-MAMAKATING ARPT: Glider and soaring operns being conducted during day-lgt hrs within a 10 mi radius of arpt, 33 mi 300° heading from Newburgh.

NORTH CAROLINA: CHERRY POINT MCAS-RADIO: Navy LFR shut down. (12-5)

ELIZABETH CITY-RADIO: Dec 5, VOR/DME shut down until approx Mar. 20. Will be relctd to lat 36-15-30, long. 76-10-34. (12-5)

GREENSBORO-RADIO: DME coverage 140°-160°, 35 n mi at MEA. VOR radials 040° - 050°, 310°-005° out of tolerance due to excessive roughness and bends. (12-26)

GREENSBORO-HIGHPOINT ARPT-TOWER: ILS lclzr and glide slope inop - excessive
** lclzr roughness. (1-15) FLD: Centerline hi-intensity apch lgt system serving rnwy 14 commissioned 12-20-56. System extends 3000' from rnwy pavement out ino apch. System consists of green lgts across rnwy at threshold, a red bar lgt on each side of rnwy 100' from the pavement, a red bar lgt on rnwy centerline 200' from the pavement, 27 clear bar lgts on rnwy centerline at approx 100' spacings starting 300' from pavement and a clear crossbar 100' long on rnwy centerline 1000' from pavement. Ground checked only.

HICKORY-RADIO: About March 1, 1957, VOR will be cmsnd at lat 35-52-19, long 81-14-19.

KINSTON-STALLINGS AIR BASE: USAF pilot trng base with intensive student trng within 25-mi radius. Clsd to all transient civilian acft xcpt on ofl business, or upon permission from Mil Operns Officer, Director of Flying or Manager, Serv-Air Aviation Corp. 2-way rdo rqrd. (6-17)

LAURINBURG-MAXTON ARPT: New arpt reported: lctn 3.5 mi NNW; elev 220'; number of rnwys 1; longest rnwy 6500'; remarks - use NE/SW rnwy only. Transient acft park W ramp in vicinity arpt bcn. Caution - vehicular parking and tfc W ramp. No fuel, servicing, telephone facilities until after March. (1-10)

NEW BERN-RADIO: VOR areas toward open water flgt-checked at 30 n mi.

RALEIGH-DURHAM-RADIO: DME coverage 120°-230°, 35 n mi; 230°-310°, 26 n mi; 310°-360°, 35 n mi at MIN. VOR radials 175° thru 290° out of tolerance account roughness and bends. (11-1)

RALEIGH DURHAM ARPT: Due to non-visibility twr unable to ctl tfc on taxiway between rnwys 5 and 32. No signal between sunset-sunrise to indicate gnd visibility of less than 2.6 n mi and/or a ceiling of less than 1000'. Rnwy 18-36 lgtd sunset-sunrise when wind less than 6 mi unless other rnwy requested. (8-27)

SALISBURY ARPT: Bndry lgts inop. (2-16)

WEEKSVILLE NAF-RADIO: Navy rng voice inop. (1-10)

WILMINGTON-RADIO: VOR quad 65° to 235° flgt-checked to shoreline only. (8-14)

NORTH CAROLINA: WILMINGTON-NEW HANOVER COUNTY ARPT: Helicopters lndg and take-off use caution to avoid 55' unlgtd overhead high voltage p-line running W from ctl twr to arpt bndry. Open ditch 1500' W of midfield intsxn 60' from both sides rnwy 9-27. Due to non-visibility twr unable to ctl tfc on taxi strip between rnwys 16 and 23 and section W of hangar on taxi strip from terminal ramp to rnwy 9. (8-1)

NORTH DAKOTA: FARGO-RADIO: Oct 8, VOR/DME shut down.

FARGO-HECTOR FLD: 200' (1268' MSL) unlgtd twr erected 24.2 n mi W (270° T) at lat 46-55-07, long. 97-24-23 and being dismantled approx Jan 27, 1957. (12-12) 1000' of rnwy 17-35 rough for jets on W side starting 4000' from S end. Jets should use center of E side. (6-6) Stacks of drainage tile 300' W of rnwy 17-35.

JAMESTOWN ARPT: About Jan 27, 200' (1685' MSL) lgtd twr will be erected 13.9 n mi ESE (113° T) at lat 46-50-14, long. 98-22-24 and being dismantled approx Feb 10, 1957. About Feb 3, 200' (2145' MSL) lgtd twr will be erected 18 n mi NW (300° T) at lat 47-04-55, long. 99-03-04 and being dismantled approx Feb 10. (12-12)

**MAYVILLE ARPT: 200' (1175' MSL) lgtd twr erected 7.5 n mi NE (30° T) at lat 47-35-59, long. 97-14-01. (1-3)

VALLEY CITY ARPT: 200' (1661' MSL) lgtd twr being erected 3.9 n mi ENE (89° T) at lat 46-56-17, long. 97-55-24 and will be dismantled approx Feb 3. (12-12)

WESTHOPE ARPT: Field rough - use with caution. (6-14)

OHIO: AKRON ARPT-TOWER: About Feb 1, trans and rcvr 126.18 mc will be decmsnd and 142.74 mc will be cmsnd. (1-16) FLD: Due to non-visibility twr unable to control tfc SSW airdock on apch to rnwy 36L.

AKRON-CANTON ARPT-TOWER: ILS back course has flyable bend 4 to 2 n mi from stn, displaced 3.5° E rnwy 18 centerline throughout area of bend. ILS glide slope usable to apch end rnwy 36 or 1230' MSL. (7-27) FLD: Non-controlled area bounded by Arwys Amber 6, Red 19, Victor 103 and Red 17 will become perm U. S. NAS Akron,, Ohio acrobatic -- camera gunnery area from surface to 20,000' during daylgt hrs VFR conditions only. (11-28)

APPLETON-RADIO: About Feb 1, VOR ident will be changed from "CMH" to "APE". (1-11)

CANTON-MARTIN ARPT: Clsd until further notice. (1-11)

CINCINNATI-RADIO: VOR has light to moderate interference 360°-60° from stn to 52 n mi at MIN. (2-23) DME coverage 60°-150°, 35 n mi at MEA. (1-14)

CINCINNATI-GREATER CINCINNATI ARPT: Due to non-visibility twr unable to ctl single-eng tfc on NW/SE taxiway from rnwy 18 to 200' SE of rnwy 18 unless such tfc remains on fld side of this taxiway. After lndg on rnwy in use acft taxi straight ahead to nearest intsxn. No. 180° turns on rnwy prior to rcvg approval from twr.

CINCINNATI-LUNKEN ARPT: Due to non-visibility twr unable to ctl tfc in tfc pat directly NW of fld. Prior to departure acft with no rdo are rqrd to fone twr for taxi and takeoff instructions. Use rnwys only unless otherwise authorized by twr.

CLEVELAND-RADIO: DME coverare 60°-100°, 43 n mi at 2900'; 100°-145°, 35 n mi at 2500'; 170°-190°, 35 n mi at 2500'; 245°-310°, 35 n mi at 2000'; 310°-060°, not checked.

CLEVELAND-HOPKINS ARPT: 2-way rdo capable of communicating with Cleveland Twr in satisfactory manner mandatory. (8-24) Rnwy 14-32 restricted to NW take-offs and SE lndgs. Const of N concourse in progress 800' N from main terminal. Unlgtd snow fences erected in sod areas W of N and S hangar lines. Elevated lgts 30" high installed all taxiways and runways 18R-36L and 23L-5R. (11-17)

CLEVELAND-LAKEFRONT ARPT: New rnwy const in progress 200 ft N of present rnwy. Contact CLE rdo or CEL unicom for lndg instructions. (11-29)

CLEVELAND-LAKEFRONT SEAPLANE BASE: Clsd for season. (10-19)

**COLUMBUS-OHIO STATE UNIVERSITY ARPT: Add prefix (PC). (12-14)

COLUMBUS-PORT COLUMBUS ARPT-SPECIAL NOTICE: VFR Jet Traffic Rules - Take-offs: Rnwy 27 - turn to a heading of 360° as soon as safety will permit and maintain 360° heading until clear of airport control zone. Rnwy 9 - turn to a heading of 110° as soon as safety will permit and maintain 110° until clear of airport control zone. Entering control zone - maximum airspeed 250 knots. Maintain 2000' MSL until on base leg for lndg apch. VFR Multi-engine Rules - Take-offs: Rnwy 23 and 27, a right turn following take-off is required to avoid hvy populated area W and SE of arpt. Approach for Landing: Maintain 2000' MSL until on base leg or if a straight-in apch is used maintain 2000' MSL as long as practical before starting normal descent on final approach. (3-23)

COLUMBUS-PORT COLUMBUS ARPT: Due to non-visiblity twr unable to control tfc on E taxi strip between hangars 1 and 4.

COLUMBUS-SULLIVANT AVENUE ARPT: Construction - men and equip. on field. (7-2)

OHIO: DAYTON-RADIO: VOR has moderate roughness [illegible] DME coverage 150°-220°, 30 n mi at 2400'. VOR has interference from 90° clockwise to 240°. This area not to be used for IFR opern acct unreliable course indication during per-period of interference.

DAYTON ARPT: Caution when apchg arpt as fluorescent street lgtg paralleling S bndry of arpt can be mistaken for rnwy lgtg. No grass operas. Radio rcvr rqrd. Due to non-visibility, twr unable to ctl tfc on taxiway from E and N side to W side of hangars. Use unpainted area of concrete for taxiing in line with blacktop on taxistrip. Caution in apchg rnwy 6-24. Construction area 500' NE end and 1000' SW end, smooth hard-packed gravel free of obstructions not suitable fot touch down. Lndg should be made beyond green threshold lgts. End of pavement and beginning of construction areas mrkd by row of red lgts across ends rnwy 6-24. End of pavement rnwy 24 mrkd by row of red flags for day-lgt opern. (1-7)

DAYTON-MONTGOMERY COUNTY ARPT: Clsd - const. (8-6)

DAYTON-PATTERSON/WRIGHT-PATTERSON AFB-RADIO: USAF VHF/DF unreliable below 3000', 295°-305°; below 2500', 306°-294°.

PHILIP-RADIO: VOR/DME flgt-checked - opern normal. (1-13)
PHILIP ARPT, SITE 31 CYS-HON: 24' unlgtd p-line N from bcn to transmission line.
PIERRE-RADIO: About Jan 28, VOR will be shut down until approx Mar 11. During shut down the following MEA's can be used: Arwy V26: Philip VOR to Pierre LFR 3400'; Pierre to LFR to Huron VOR 3400'. (1-4)
SIOUX FALLS-RADIO: Jan 9, VOR shut down until approx Feb 25. Freq will be changed to 115.0mc-DME to channel 70. (1-9) During shutdown, the following MEA's can be used: Arwy V15: Huron VOR to Int HON R115 and SUX R335, 7000'; Int HON R115 and SUX R335 to Sioux City VOR 7000'; V181: Watertown VOR to Oakwood Int 3000'; Oakwood Int to Int ATY R160 and HON R115 7000'. V80: Redwood Falls VOR to Int RWF R228 and
SOUTH DAKOTA: SUX R335 3000'. Direct Route: Huron VOR to Sioux Falls LFR 3000'; Sioux Falls LFR-Sioux City VOR 3000'; Sioux Falls LFR-Redwood Falls VOR 3000'; Watertown VOR-Sioux Falls LFR 3000'. (12-18)
SIOUX FALLS-FOSS FLD-TOWER: Audio interference may be noted lclzr SE thru SW. Approach procedures and lclzr alignment not affected. (12-5) FLD: Several twrs being erected at football fld 0.7 n mi S end of NE/SW rnwy at lat 43-33-50, long. 96-45-10. Tallest twrs 125'MSL will be lgtd. (1-3)
TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt on Green Arwy #5 via Knoxville is invited to the proximity of the W course of Knoxville radio rng to the Atomic Energy Prohibited Area. Slight deviations to the N of course in this area often result in in-flgt identification and the filing of alleged violations against the pilot.
**BRISTOL-TRI-CITY ARPT: Designated as feeder type arpt. Max gross load limitation 30,000 lbs. (12-17)
CHATTANOOGA-RADIO: Aural signal similar to Daisy FM being rcvd 17 to 22 n mi NW of LF rng. NE and NW courses LF range have moderate to severe multiples. (7-27)
CHATTANOOGA-LOVELL FLD: All acft within arpt tfc ctl zone between sunset-sunrise must be equipped with transmitter and receiver capable of rcvg instructions from ctl twr; during daylgt, all acft must be equipped with rcvr capable of rcvg instructions from ctl twr. (8-23)
**DYERSBURG ARPT: 203'(533'MSL) lgtd twr erected 4.0 n mi N(10°T) at lat 36-04-14, long. 89-23-52. (1-14)
KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. Caution-VOR has occasional momentary course disturbance in mountainous areas.
KNOXVILLE-McGHEE TYSON ARPT-TOWER: Nov 13, ASR shut down - modernization. ILS glide slope inop.
NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250°, have bends and roughness out of tolerance. VOR/DME signal coverage 270°-180°, 43 n mi, 180°-270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEA as follows: V-16 Graham VOR to Nashville VOR via Graham 067° MEA 3000';V-16 Nashville VOR to Crossville VOR via Crossville 282° MEA 5000';V-140 Dyersburg VOR to McEwen int 5000';McEwen Int to Nashville VOR MEA 4000'. Minimum holding alt McEwen Int to Nashville VOR MEA 4000'. V-140 Hartsville int to Highway int MEA 8000'. V-7 Nashville VOR to Lewisburg int MEA 4500'. (11-20)
NASHVILLE-BERRY FLD: Taxiway btwn ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy-use as a taxiway. (12-28)
TEXAS: ABILENE(NEW)ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)
ALICE-RADIO: VOR radials 85°-105° unreliable. (10-8)
ALICE ARPT: Bnday lgts rnwy 13-31 unreliable. (5-28)
AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.
AMARILLO-AIR ROUTE TRAFFIC CONTROL CENTER: About Jan 18, freq 301.4mc will be decmsnd. (1-4)
AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)
AUSTIN-MUELLER ARPT: 1140'(2049'MSL) lgtd twr being erected 4.1 n mi W(277°T) at lat 30-18-35, long. 97-47-33. (1-7) Acft lndg and taking-off are cautioned to avoid Bergstrom AFB traffic pattern - extensive jet operations all altitudes. Neon approach light system inoperative. Unlighted obstruction on approach end of runway 30. Touchdown point intersection runway 30 with runway 3-21. Green range lights on runway 30 designates touchdown point nights. (10-4)
BEAUMONT-JEFFERSON COUNTY ARPT: Runway 11-29 closed - construction. (9-19)
BIG SPRING-RADIO: VOR courses 280°-325° and 345°-30° out of tolerance account bends. DME coverage 130°-190°, 35 n mi at 4000'. (11-19)
BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.
CORPUS CHRISTI-RADIO: Soon, VOR will be shut down until approximately February 4. (12-11) During shut down the following temporary MEAs have been established: V-20 ALI-PSX MEA 4000'; V-68 from intersection of SAT 159° radial to CRP unusable, from CRP to Kingsville Intersection unusable, Clareville and Kingsville Intersections unusable. All other routes utilizing CRP VOR unusable. (12-19)
COTULLA-RADIO: About February 4, VOR will be shut down until approximately February 25 - modernization. (12-27)

TEXAS: DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000' MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation tk-offs not permitted. Caution - acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgt. Ctc control twr for detailed taxi instructions. (11-14)

**DEL RIO ARPT: Road across N/S strip removed. Rnwy lgts on rnwy 12-30 oper sunset-2400. (12-11)

EL PASO-RADIO: DME coverage 240°-265°, 35 n mi at 8500'; 265°-300°, 26 n mi at 10,000'. VOR shut down until approx Feb 11 - modernization.

EL PASO INTN'L ARPT: 150' AGL twr being erected 5.1 n mi W(270°T) at lat 31-47-42, long. 106-29-38. (1-3) Acft will fly one base leg of 90° to tfc pat. on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwys 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on landing lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equipment available. (11-7) Tetrahedron uncontrollable, unreliable - not to be used as traffic direction indicator. (11-27)

FT.WORTH-CARTER FLD-TOWER: About Feb 1, freq 338.2 and 319.2 mc will be decmsnd and replaced by 363.8 & 236.2 mc, respectively. (1-11)

GEORGETOWN ARPT: N/S and NW/SE rnwys lgts and bcn inop. (6-5)

**GRAND PRAIRIE ARPT: Replace prefix (N) with prefix (A). (1-9)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: VOR radials 120° thru 140° and 306° unreliable - roughness and scalloping. Caution in vicinity of Cleveland Texas - intermittent interference. (10-2)

HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80' (AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

**HOUSTON-H & H GUEST RANCH ARPT: No rotating bcn and rnwy lgts avail. (1-16)

HOUSTON INTERNATIONAL ARPT: Tetrahedron uncontrollable and unreliable-not to be used as tfc direction indicator. Non-rdo equipped acft use extreme caution and abide by control twr lgt signals. Rnwy 8-26 clsd for take-offs and lndgs. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. (12-6)

HUDSPETH-RADIO: About Feb 4, VOR will be shut down until approx Feb 25. During this period MEA on V-66 El Paso to Culberson 10,000' MSL. Dove and Antelope VHF int unusable. (12-28)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000'-photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement.

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LONGVIEW-GREGG COUNTY ARPT: Two 40' lgtd antenna poles erected 1000 ft E of rnwys 17-35 and 500 ft S E/W taxiway. (12-4)

LUBBOCK-RADIO: Nov 20, LFR shut down until approx Jan 31. Class will be:SBMRLZ.

LUBBOCK-ARPT: W 300 ft. of E ramp open as taxiway. E 500 ft of E ramp closed to acft for cotton storage. (10-9)

LUFKIN-RADIO: DME coverage 125°-145°, 43 n mi at 1500'; 145°-280°, 35 n mi at 1500'; 280°-305°, 35 n mi at 1700'; 305-315°, 26 n mi at 1700'; 315°-335°, 35 n mi at 1700; 335° 015°, 35 n mi at 2000'; 015°-060°, 35 n mi at 1700; 060°-125°, 35 n mi at 1500'. About Mar 18, VOR will be shut down until approx April 8 - during this period VOR flgts authorized to use LFK Rbn in lieu VOR except V13E LFK to SHV unusable. Intersections, altitudes and reporting points as charted. (1-14)

**MARATHON ARPT: Reinstated. Type P. Lat 30-12, long 103-13. Lctd 1 mi SE. Elev 4100'. 4 rnwys. Longest rnwy & fac: 37-85. Fuel: Fl. (4-7)

TEXAS: MARSHALL-SPECIAL NOTICE: 166' lgtd temp drilling twr erected 6.1 n mi SW.

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)

McALLEN-MILLER INTERNATIONAL ARPT: Rnwy 18 clsd for take-offs and lndgs. (11-26)

McKINNEY-SPECIAL NOTICE: 166' lgtd temp drilling derrick erected 3.5 n mi NW.

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300' MSL.

ODESSA-ECTOR COUNTY ARPT: Rnwy 7-25 clsd. (5-16)

PORT ISABEL ARPT: Closed all operations - const. (7-26)

ROCKPORT-ARANSAS COUNTY ARPT: Caution - oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)

SHAMROCK ARPT: Bcn and rnwy lgts inop. (7-9)

SNYDER-WINSTON FLD: 150' (2577' MSL) lgtd rotary drilling rig erected 2552 ft SE N/S rnwy. (10-4)

TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylight hours on Green Arwy #5 approx 13.4 n mi WSW of Texarkana LF rng.

TYLER-POUNDS FLD-TOWER: ILS glide slope out of tolerance from MM to touchdown - acct of severe scalloping and roughness.

UVALDE-LEONA RANCH STRIP: New lndg area reported: lctd 35 n mi NW; Lat 29-30, long. 100-22; elev: 1702'. 1 strip - 2800' long. (1-15)

WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Restricted Areas 219 and 443 not certified.

UTAH: BONNEVILLE-RADIO: DME coverage 295°-350°, 35 n mi at 12,000'.

BRYCE CANYON-RADIO: VOR has lgt roughness below 13,000'.

DELTA-RADIO: VOR coverage 40°-80° and 100°-135°, 35 n mi at 11,000'. DME coverage 40°-90°, 26 n mi at 13,000'.

HANKSVILLE-RADIO: VOR coverage 40°-60°, 35 n mi at 10,000'; 172°-190°, 26 n mi at 13,000'.

LUCIN-RADIO: VOR usable dist at min IFR terrain clearance alt 280° to 300°, 35 n mi; 350°-30° and 180°-220°, 25 n mi. (11-26)

MILFORD-RADIO: VOR coverage 20°-140°, 22 n mi; 235°-330°, 35 n mi at min en route alt.

**MILFORD, 45, LAX-SLC ARPT: 80/87 octane fuel and aviation oil available on 24-hr basis.

OGDEN-RADIO: VOR coverage 5°-120°, 30 n mi at 11,000'. DME coverage 360°-150°, 17 n mi at 12,000'.

PRICE-CARBON CO. ARPT: NE/SW rnwy closed - const.

SALT LAKE CITY-RADIO: VOR course scalloping prevalent between 290°-350°. Coverage this area 17 n mi at 6500' MSL, 30 n mi at 11,000' MSL. Coverage 10°-135°, 22 n mi at min terrain clearance alt. DME coverage 20°-140°, 17 n mi at 13,000' MSL; 180°-235°, 35 n mi at 12,000' MSL; 340°-20°, 26 n mi at 12,000' MSL. (8-10)

UTAH LAKE-RADIO: VOR usable dist at 14,000' MSL from 010° thru 040° 35 n mi, 40° thru 50° 30 n mi, 50°-85° 40 n mi; at 13,000' MSL from 145° thru 155° 35 n mi, and 275° thru 295° 30 n mi. Course roughness exists over mountain ridges N thru E between 15 and 20 n mi.

VERMONT: SPECIAL NOTICE: Arpt condition info avail. by calling Vt. Aero Comm (tel. CApital 3-2311, ext 808) 0830-1630, Mon-Fri or CAA Communs Stn, Barre-Montpelier Arpt anytime (tel. CApital 3-2376). Acft in flgt call Montpelier Rdo.

BARRE-MONTPELIER ARPT: Rnwy 5-23 clsd to wheel-equipped acft durng winter months.

BRISTOL ARPT: E W rnwy clsd - obstn. (4-4)

BURLINGTON-RADIO: VHF/DF bearings unreliable inbound headings 055°-110° below 6000'; 110°-140° below 4000'; 235°-255° below 4000'; 255°-355° below 9000' all beyond 50 n mi. UHF/DF bearings unreliable inbound headings beyond 40 n mi; 345°-067° below 6000'; 344°-280° below 7600'; 279°-255°, below 9500'; 255°-175°, below 8500'; 174°-135°, below 7500'; 134°-066° below 5000'. (10-16)

VIRGINIA: BLACKSTONE AAF: Fld open to civil in emerg or prior arrangement thru C. O. Camp Picket, Va. Frequent parachute dropping exercises involving personnel and equip. in progress. Exercise extreme caution when in vicinity. Contact Blackstone Rdo for advisory information. (7-25)

**BRIDGEWATER-SHEN-MYER ARPT: Soft when wet. (12-22)

**DAHLGREN-SPECIAL NOTICE: Restricted Area (R-28 daily air and surface firing present. Extreme hazard to acft all altitudes all times.

**DANVILLE ARPT: 80 and 100 octane gas avail. (12-19)

VIRGINIA: FRONT ROYAL-RADIO: VOR coverage 120°-160°, 175°-200°, 200°-226°, 270°-010°, 35 n mi at 4000'. ATCS and ranges controlled from Martinsburg, W. Va. (7-25)
GORDONSVILLE-RADIO: VOR has roughness in all quads. DME coverage 55°-75°, 35 n mi at 1500'; 75°-85°, 30 n mi at 1500'; 85°-130°, 35 n mi at 1500'; 130°-160°, 39 n mi at 3000'. (6-11)
HERNDON-RADIO: VOR usable dist 35 n mi at min instr alt NE quad. Terrain causes minor course roughness in SW quad.
HOT SPRINGS-INGALLS ARPT: Closed. (10-29)
LANGLEY AIR FORCE BASE: Lndgs and take-offs prohibited unless acft equipped with 2-way rdo. Clsd to civil acft unless on ofl bus. Follow centerline all taxiways. Intensive jet operns 50 mi radius to 45,000' cont 0800-2400E. Conventional acft use rectangular pat alt 1000' MSL. Rnwy 12-30 perm clsd for lndgs and take-offs. Indicate in flgt plan when destined for NACA or TAC Hq. No overrun rnwy 17-35. Do not land short rnwys 07 or 25 acct jet barriers. Caution - hvy civil air tfc crossing extension line of rnwy 07-25, 3 - 5 mi from apch end of rnwy 07. (10-29)
LAWRENCEVILLE-RADIO: Roughness all arwy radials VOR. Radials 185°-240° usable only to 22 mi MEA. (7-23)
LEESBURG ARPT: New 3500' E/W strip clsd - old strip lying parallel and S will be available - 2200'. (3-14)
LEXINGTON ARPT: Land at own risk. Unattended - no fuel.
LYNCHBURG-FALWELL ARPT: Until Apr 8, antenna array to 80' along S side of rnwy 75' from edge and near hangar area - obstruction lighted. (1-8)
LYNCHBURG-PRESTON GLEN ARPT: Signal for below VFR wea minimums inop, ngts.
MONTEBELLO-RADIO: VOR coverage 110°-220°, 35 n mi at MEA. DME coverage 150°-180°, 35 n mi at 3000'; 180°-210°, 35 n mi at 5000'.
NORFOLD-RADIO: Visual courses VAR slightly rough.
PULASKI-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n mi at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'. (12-19)
RICHMOND-BYRD FLD: Due to non-visibility twr unable to ctl tfc on N portion of N/S taxiway parallel to rnwy 2-20. All acft rqrd to have 2-way rdo for ngt opern and at least rdo rcvr for daylgt opern. Use paved areas only, all other soft. Landing FEE for multi-eng executive and non-scheduled acft. (9-15)
ROANOKE-RADIO: Soon TVOR will be shut down until approx Feb 4. (12-11)
ROANOKE MUN-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W strip. Men and equip adj all rnwys and taxiways - caution.
WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area & lakes.
BANDERA ARPT: Clsd - due snow. (12-7)
BELLINGHAM-RADIO: VOR radial 280°, on Vancouver, B. C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.
BELLINGHAM ARPT: 1000' NE end NE/SW rnwy clsd to hvy tfc. (11-19)
BREMERTON-KITSAP COUNTY ARPT: The first 2000' rnwy 1 clsd to all Naval acft.
EASTON, SITE 5B, SEA-HLN ARPT: Clsd due to snow for winter season. (11-20)
ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'.
EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown prohibited area; 227°-280°, 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.
EPHRATA ARPT: Rnwy lgts on rnwy 2-20 inoperative. (10-8)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.
WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (6-18)
CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test basis. (10-29)
ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)
ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop. (10-25)
GLENDALE ARPT: Ditch under construction across N/S rnwy 700' N of S boundary. Will be mrkd by flags. Rnwy length reduced to 2200' until further advised. (12-13)
MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.
MARTINSBURG ARPT: Serv fac avail 0800-sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Rnwy 8-26 clsd 0700-1800 EST xcpt Sun. Men and equipment on rnwy. (12-3)
MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.
SUTTON, 21, CIN-DCA ARPT: Clsd to all acft xcpt single-engine. (1-3)
WISCONSIN: EAGLE RIVER ARPT: 800' S end of N/S rnwy rough, soft-unusable. Arpt clsd until May 1, 1957.
FON DU LAC ARPT: Caution - use center of rnwys - due soft rnwys and shoulders during winter and early spring. Snow will be rolled on the center of rnwys. (12-21)
GRANTSBURG-RADIO: Oct 8, VOR shut down until approx Feb 8, modernization. (1-15)
LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n miles from station. (11-3)

WISCONSIN: LAND O'LAKES-KING'S GATEWAY ARPT: Closed due ice or snow. Arpt will be plowed on request. (12-19)
MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm closed to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop.
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd-itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusion of rnwy 1 with parallel taxiway to left. (8-15)
OCONTO ARPT: E/W rnwy plowed 2850 x 175' - open to wheeled acft. NE/SW rnwy open to ski-equipped acft only. (1-16)
OSHKOSH-WINNEBAGO COUNTY ARPT: Use only N/S and E/W rnwy winter months.
WOODRUFF-ARBOR VITAE-RADIO: H fac operg on request basis. (12-28)
WOODRUFF-ARBOR VITAE ARPT: During winter months, arpt attended week-ends and afternoons when weather is VFR. (12-28)
WYOMING: CASPER-NATRONA CO.ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Two 200 ft. fences SW end of ramp not obstn lgtd. (11-16)
CHEYENNE ARPT: Overrun lgts (apch lgts) rnwy 26 inop. (10-18)
GILLETTE ARPT: 50-75' W should 1500' from N end N/S strip soft - dsd to hvy acft.

WYOMING: KEMMERER ARPT: Caution-reseeded and soft. (6-22)
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26n mi at 15,000'
ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'
ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and FLR.
ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - mrkd.
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.
THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip on fld. Use extreme caution.
PUERTO RICO: **PONCE-MERCEDITA ARPT: 237' (4177'MSL) lgtd TV twr erected 8.5 n mi N (003° T) at lat 18-09-17, long. 66-33-14. (1-17)
SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution-ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' to 60' high opern intermittently approx 1000' off E end rnwy 9R-27L.
SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS: BEAUMONT, TEX., JEFFERSON CO. ARPT--Comb. ILS-ADF Proced. #1, Amdt. Orig. Effec. 26 Jan 1957: Revise col. 7 to read: "ILS 1400, ADF 800 over LOM".

BOSTON, MASS., LOGAN ARPT: Add following note to all ACA Forms 511: Except where radar vectoring is used & when wea is 1000-3 or below, departures from rnwy 27 make left or right turn as soon as practicable & departures from rnwys 22 & 33 climb straight ahead to at least 1000' MSL prior to proceeding toward 1349' WBZ-TV twr.

EVANSVILLE, IND., DRESS MEMORIAL ARPT: ILS-ADF Proced. #1, Amend #4, dated 21 Jul 56, in col. 5, change second item to read "2000" instead of "1800".

MILWAUKEE, WISC., GENERAL MITCHELL FLD: ILS Proced #1, Amend #9, dated 22 Jun 56, in columns 11, 12 & 13 raise S-DN-1 ADF minimums from "400-1" to "500-1".

TYLER, TEX., POUNDS FLD: ADF Proced #1, Amdt. Orig., Effect. 9 Jan 57: Change "Proc. No. 1" to "Proc. No. 2" in view of existing Comb. ILS-ADF Procedure No. 1.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE VOR

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
From	To	Course and Distance	Minimum Altitude	Condition	Two Engine or Less: 65 Knots or Less	Two Engine or Less: More Than 65 Knots	More Than Two Engine, More Than 65 Knots

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

NOTICES TO AIRMEN Page 2

VOL. 11 ,NO. 24 . . . . FEBRUARY 5, 1957

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. the above date. For later information consult Teletype NOTAMS.

OHIO STATE UNIVERSITY LIBRARY FEB 18 1957

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --.. -... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the work "omni" Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VFR or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.75, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 20 cents.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e. g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, [illegible] experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

✓ PITTSBURGH-CLEVELAND CENTER BOUNDARY CHANGES: Effective immediately, restablish the existing boundary beginning at a point on the existing boundary five miles S of the S edge of Victor 6 at the W edge of Victor 37; running thence S along the W edge of Victor 37 to the NW edge of Victor 250; thence via the NW edge of Victor 250 running southwesterly to the N edge of Red 85; thence westerly along the N edge of Red 85 to the existing boundary at a point on the NE edge of Victor 41.

✓ NEW YORK-BOSTON CENTER BOUNDARY CHANGES: Effective immediately,

1. Reestablish the boundary on Victor 106, Victor 146, and Victor 58 as running along the E edge of Victor 91 and Victor 91E.

2. Establish the boundary on Victor 153 at the southern edge of Victor 72.

3. Reestablish the boundary on Victor 30, Victor 46, Control Area Extension 1146, and Control Area Extension 1169 as a line at right angles to Victor 30 five miles W of the Vineyard intersection.

✓ RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective February 5, 1957:

(Part 608 - Restricted Area - Amendment 185)

(1) In Section 608.25, the Fort Campbell, (formerly called Camp Campbell), Kentucky, area (R-63) amended on May 19, 1956 in 21 F.R. 3309, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at latitude 36-44-00, long. 87-40-00; to lat 36-39-17, long. 87-40-00; to lat 36-39-17, long. 87-29-38; to lat 36-41-00, long. 87-27-30; to lat 36-32-00, long. 87-23-00; to lat 36-32-00, long. 87-50-00; to lat 36-44-00, long. 87-50-00; to lat 36-44-00, long. 87-40-00; to point of beginning"

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 24 - Columbus, Ga. Correct CAA telephone number to read: FAirfax 3-4363, and WB telephone number to read: FAirfax 2-8107.

(2) Page 24 - Boise, Idaho. Correct CAA telephone number to read: 2-2331.

(3) Page 100 -(Airborne) Imperial, Calif. Add VOR rcvr check point: 313°; at approach end of runway 32; 200'.

(4) Page 103 - (Ground) Columbus, Ga. (Muscogee County) - VOR rcvr check point cancelled.

(5) Page 103 - (Ground). Amarillo, Tex. (Amarillo Air Terminal). - Correct VOR rcvr check point to read: 209°.

✓ AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide, Volume 11, Number 22, dated January 8, 1957, as follows:

(1) Page 6 - Non-Standard Holding Pattern: Designate. Portland, Oregon VOR should read: "direction of holding - RIGHT; time - one minute."

TROY, ILLINOIS VOR SHUTDOWN: On or about February 18, 1957, the Troy, Ill. VOR will be shut down for modernization for a period of approximately one month. During the interim period, the following MEA's can be utilized:

When route of flight includes changing to any airway with a higher MEA, flight will be cleared to higher MEA prior to crossing intersection so that intersection will be received to enable pilot to make turn.

Airways, alternate airways and intersections formed by the shutdown VOR will not be utilized except where noted to clear aircraft.

Air carriers should check to determine need to request any direct routes using combination facilities if they desire lower altitudes or require added transitions to approach procedures.

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points are revised, designated, redesignated or cancelled and shall become effective March 14, 1957:

REVISED:

(1) KEENAN INTSXN, TEX. VHF. (HOU 330/CLL 103) change MRA to read: 2000'.

DESIGNATED:

(1) ALCOVA, WYO. (VHF) INTSXN - the intsxn of the 216°T radial of the Casper, Wyo. VOR and the 336°T radial of the Rock River, Wyo. VOR.

(2) ARMONK, N.Y. (VHF) INTSXN - the intsxn of the 285°T radial of the Riverhead, N.Y. VOR, the 240°T radial of the Wilton, Conn. VOR and the 112°T radial of the Huguenot, N.Y. VOR.

(3) ASBURY, N.J. (VHF) INTSXN - the intsxn of the 151°T radial of the Colts Neck, N.J. VOR and the 031°T radial of the Coyle, N.J. VOR.

(4) ASHLEY, OHIO (VHF) INTSXN - the intsxn of the 309°T radial of the Appleton, Ohio VOR and the 224°T radial of the Mansfield, Ohio VOR.

(5) BERWICK, PA. (VHF) INTSXN - the intsxn of the 125°T radial of the Williamsport, Pa. VOR and the 056°T radial of the Selinsgrove, Pa. VOR.

(6) BUFFALO, IOWA (VHF) INTSXN - the intsxn of the 093°T radial of the Iowa City, Iowa VOR and the 231°T radial of the Moline, Ill. VOR.

(7) CHARLOTTE, IOWA (VHF) INTSXN - the intsxn of the 270°T radial of the Polo, Ill. VOR and the 326°T radial of the Moline, Ill. VOR.

(8) CHASE CITY, VA. (VHF) INTSXN - the intsxn of the 214°T radial of the Flat Rock, Va. VOR and the 081°T radial of the South Boston, Va. VOR.

(9) CLAYTON, N.C. (VHF) INTSXN - the intsxn of the 116°T radial of the Raleigh, N.C. VOR and the 237°T radial of the Rocky Mount, N.C. VOR.

(10) COMMACK, N.Y. (VHF) INTSXN - the intsxn of the 058°T radial of the Idlewild, N.Y. VOR and the 168°T radial of the Wilton, Conn. VOR.

(11) COTTAGE GROVE, OREG. (VHF) INTSXN - the intsxn of the 173°T radial of the Eugene, Oreg. VOR and the 065°T radial of the North Bend, Oreg. VOR.

(12) COVINGTON, VA. (VHF) INTSXN - the intsxn of the 357°T radial of the Roanoke, Va. TVOR and the 256°T radial of the Montebello, Va. VOR

(13) CRANDALL, TEX. (VHF) INTSXN - the intsxn of the 135°T radial of the Dallas, Tex. VOR and the 072°T radial of the Britton, Tex. VOR.

(14) CRAIG, ALA. (VHF) INTSXN - the intsxn of the 282°T radial of the Montgomery, Ala. VOR and the 146°T radial of the Craig, AFB, Ala. VOR.

(15) DARIEN, CONN. (VHF) INTSXN - the intsxn of the 168°T radial of the Wilton, Conn. VOR and the 285°T radial of the Riverhead, N.Y. VOR.

(16) DUBUQUE, IOWA (VHF) INTSXN - the intsxn of the 097°T radial of the Waterloo, Iowa VOR and the 335°T radial of the Moline, Ill. VOR.

(17) DUNCAN, TEX. (LF) INTSXN - the intsxn of the SE course of the Kelly AFB, Tex. LFR and the SW course of the San Antonio, Tex. ILS lclzr.

(18) DUNDEE, ILL. (VHF) INTSXN - the intsxn of the 340°T radial of the Naperville, Ill. VOR and the 238°T radial Wheeling, Ill. VOR.

(19) DU PAGE, ILL. (VHF) INTSXN - the intsxn of the 317°T radial of the Naperville, Ill. VOR and the 238°T radial of the Wheeling, Ill. VOR.

(20) EATONS POINT, N.Y. (VHF) INTSXN - the intsxn of the 168°T radial of the Wilton, Conn. VOR and the 042°T radial of the Idlewild, N.Y. VOR.

(21) EL DORADO, ARK. RADIOBEACON.

(22) ELLIOTT, FLA. (LF) INTSXN - the intsxn of the SE course of the Miami, Fla. LFR and a 063°T bearing from Homestead AFB, Fla. Rbn.

(23) ENGLEWOOD, OHIO (VHF) INTSXN - the intsxn of the SW course of the Dayton, Ohio ILS lclzr and the 202°T radial of the Dayton, Ohio VOR.

(24) FREEPORT, ILL. (VHF) INTSXN - the intsxn of the 276°T radial of the Rockford, Ill. VOR and the 240°T radial of the Janesville, Wis. VOR.

(25) FULTON, OHIO (VHF) INTSXN - the intsxn of the 329°T radial of the Appleton, Ohio VOR and the 224°T radial of the Mansfield, Ohio VOR.

(26) GARRISON, MONT. (VHF) INTSXN - the intsxn of the 002°T radial of the Butte, Mont. VOR and the 272°T radial of the Helena, Mont. VOR.

(27) GENOA, ILL. (VHF) INTSXN - the intsxn of the 137°T radial of the Janesville, Wis. VOR and the 207°T radial of the Milwaukee, Wis. VOR.

(28) GEORGETOWN, N.Y. (VHF) INTSXN - the intsxn of the 149°T radial of the Syracuse N.Y. VOR and the 023°T radial of the Binghamton, N.Y. VOR.

(29) GORDON, LA. (VHF) INTSXN - the intsxn of the 217°T radial of the El Dorado, Ark. VOR and the 304°T radial of the Monroe, La. VOR.

(30) GREGORY, PA. (VHF) INTSXN - the intsxn of the 118°T radial of the Wheeling, W.Va. VOR and the 180°T bearing from Clinton, Pa. Rbn.

(31) GRIMES, OHIO (VHF) INTSXN - the intsxn of the 060°T radial of the Dayton, Ohio VOR and the 169°T radial of the Findlay, Ohio VOR.

(32) HANOVER, OHIO (VHF) INTSXN - the intsxn of the 127°T radial of the Appleton, Ohio VOR and the front course of the Port Columbus, Ohio ILS lclzr.

(33) HASTINGS, MINN. (VHF) INTSXN - the intsxn of the 265°T radial of the Eau Claire, Wis. VOR the front course of the Minneapolis, Minn. ILS lclzr and the 143°T radial of the Minneapolis, Minn. VOR.

(34) HEBRON, ILL. (VHF) INTSXN - the intsxn of the 089°T radial of the Janesville, Wis. VOR and the 192°T radial of the Milwaukee, Wis. VOR.

(35) HIGHFALLS, N.C. (VHF) INTSXN - the intsxn of the 249°T radial of the Raleigh, N.C. VOR and the 147°T radial of the Greensboro, N.C. VOR.

(36) HOWELL, MICH. (VHF) INTSXN - the intsxn of the 048°T radial of the Litchfield, Mich. VOR and the 291°T radial of the Salem, Mich. VOR.

(37) JUSTIN, TEX. (VHF) INTSXN - the intsxn of the NW course of the Carter, Tex. ILS lclzr and the N course of the Meacham, Tex. ILS lclzr.

(38) KENDALL, FLA. (LF) INTSXN - the intsxn of the SE course of the Miami, Fla. LFR and a 071°T bearing from Perrine, Fla. LFR.

(39) LA JOLLA, CALIF. (LF) INTSXN - the intsxn of the N course of the San Diego, Calif. LFR and the 073°T bearing to Miramar, Calif. Rbn.

(40) LA JOLLA, CALIF. (VHF) INTSXN - the intsxn of the 340°T radial of the San Diego, Calif. VOR and the 073°T bearing to Miramar, Calif. Rbn.

(41) LINCOLN, ILL. (VHF) INTSXN - the intsxn of the 234°T radial of the Joliet, Ill. VOR and the 137°T radial of the Polo, Ill. VOR.

(42) MAIDEN, N.C. (VHF) INTSXN - the intsxn of the 327°T radial of the Charlotte, N.C. VOR and the 074°T radial of the Asheville, N.C. VOR.

(43) MARENGO, ILL. (VHF) INTSXN - the intsxn of the 137°T radial of the Janesville, Wis. VOR and the 093°T radial of the Rockford, Ill. VOR.

(44) MARTELL, WIS. (VHF) INTSXN - the intsxn of the 265°T radial of the Eau Claire, Wis. VOR and the 115°T radial of the Minneapolis, Minn. VOR.

(45) MARYSVILLE, OHIO (VHF) INTSXN - the intsxn of the 277°T radial of the Appleton, Ohio VOR and the 153°T radial of the Findlay, Ohio VOR.

(46) MILFORD, PA. (VHF) INTSXN - the intsxn of the 112°T radial of the Allentown, Pa. VOR and the 044°T radial of the Pottstown, Pa. VOR.

(47) MILLERSBURG, IND. (VHF) INTSXN - the intsxn of the 092°T radial of the Goshen, Ind. VOR and the 150°T radial of the Keeler, Mich. VOR.

(48) MOODY, TEX. (VHF) INTSXN - the intsxn of the 196°T radial of the Waco, Tex. VOR and the 069°T bearing from Gray AFB, Tex. rbn.

(49) NEWARK, OHIO (VHF) INTSXN - the intsxn of the 085°T radial of the Appleton, Ohio VOR and the 173°T radial of the Mansfield, Ohio VOR.

(50) NEW GLARUS, WIS. (VHF) INTSXN - the intsxn of the 294°T radial of the Janesville, Wis. VOR and the 147°T radial of the Lone Rock, Wis. VOR.

(51) OAKWOOD, WIS (VHF) INTSXN - the intsxn of the 135°T radial of the Milwaukee, Wis. VOR and the S course of the Milwaukee, Wis. ILS lclzr.

(52) ORANGE COVE, CALIF. (VHF) INTSXN - the intsxn of the 106°T radial of the Fresno, Calif. VOR and the 058°T radial of the Coalinga, Calif. VOR.

(53) PASCAGOULA, MISS. (VHF) INTSXN - the intsxn of the 259°T radial of the Pensacola, Fla. VOR and the 185°T radial of the Mobile, Ala. VOR.

(54) PLACERVILLE, CALIF. (VHF) INTSXN - the intsxn of the 067°T radial of the Sacramento, Calif. VOR and the 012°T radial of the Modesto, Calif. VOR.

(55) PRICE, VA. (VHF) INTSXN - the intsxn of the 360°T radial of the Greensboro, N.C. VOR and the 261°T radial of the South Boston, Va. VOR.

(56) PURDY, WASH. (VHF) INTSXN - the intsxn of the 262°T radial of the Seattle, Wash. VOR and the 019°T radial of the Olympia, Wash. VOR.

(57) SANIBEL, FLA. (LF) INTSXN - the intsxn of the 169°T radial from the Tampa, Fla. LFR and a 225°T bearing from Fort Myers, Fla. Rbn.

(58) SATIN, TEX. (VHF) INTSXN - the intsxn of the 145°T radial of the Waco, Tex. VOR and the 216°T bearing from Prairie Hill, Tex. Rbn.

...VOR and the Craig AFB, Ala. VOR. the intsxn of the 005°T radial of the Charlotte,

(61) SURF, CALIF. (VHF) INTSXN - the intsxn of the 114°T radial of the Bing-LFR and the 094°T bearing to Miramar, Calif. Rbn. ...PA. (VHF) INTSXN - the intsxn of the 358°T radial of the Wilkes-Barre, Pa. VOR. the intsxn of the N course of the San Diego, Calif.

(62) SURF, CALIF. (VHF) INTSXN - the intsxn of the 340°T radial of the San Diego, Calif. VOR and the 094°T bearing to Miramar, Calif. Rbn.

(63) UNIONTOWN, PA. (VHF) INTSXN - the intsxn of the 021°T radial of the Morgan-town, W.Va. VOR and the 299°T radial of the Grantsville, Md. VOR.

(64) URBANA, OHIO (VHF) INTSXN - the intsxn of the 060°T radial of the Dayton, Ohio VOR and the 277°T radial of the Appleton, Ohio VOR.

(65) UTICA, OHIO (VHF) INTSXN - the intsxn of the 050°T radial of the Appleton, Ohio VOR and the 173°T radial of the Mansfield, Ohio VOR.

(66) WIGGINS, COLO. (VHF) INTSXN - the intsxn of the 061°T radial of the Denver, Colo. VOR and the 272°T radial of the Akron, Colo. VOR.

(67) YOSEMITE, CALIF. (VHF) INTSXN - the intsxn of the 080°T radial of the Modesto, Calif. VOR and the 347°T radial of the Fresno, Calif. VOR.

(68) YULES, FLA. (VHF) INTSXN - the intsxn of the 319°T radial of the Jacksonville, Fla. VOR and the 216°T radial of the Brunswick, Ga. VOR.

REDESIGNATED:

(1) BALTIC, OHIO (VHF) INTSXN - the intsxn of the 121°T radial of the Mansfield, Ohio VOR and the 282°T radial of the Wheeling, W.Va. VOR.

(2) BIG ROCK, IOWA (VHF) INTSXN - the intsxn of the 063°T radial of the Iowa City, Iowa VOR and the 279°T radial of the Moline, Ill. VOR.

(3) BIG RUN, ILL. (VHF) INTSXN - the intsxn of the 056°T radial of the Joliet, Ill VOR and the 125°T radial of the Naperville, Ill. VOR.

(4) BRADLEY, N.C. (VHF) INTSXN - the intsxn of the 037°T radial of the Charlotte, N.C. VOR and the 097°T radial of the Asheville, N.C. VOR.

(5) CODY, FLA. (VHF) INTSXN - the intsxn of the 128°T radial of the Tallahassee, Fla. VOR and the 236°T radial of the Valdosia, Ga. VOR.

(6) COLONA, ILL. (VHF) INTSXN - the intsxn of the 200°T radial of the Moline, Ill. VOR and the E course of the Quad City, Ill. ILS lclzr.

(7) CROOKS, OHIO (VHF) INTSXN - the intsxn of the 307°T radial of the Parkersburg, W.Va, VOR and the 028°T bearing to the Zanesville, Ohio Rbn.

(8) ELGIN, ILL. (VHF) INTSXN - the intsxn of the 340°T radial of the Naperville, Ill. VOR and the 273°T radial of the Wheeling, Ill. VOR.

(9) ELIZABETH, IND. (VHF) INTSXN - the intsxn of the 269°T radial of the Louisville, Ky. VOR and the 155°T bearing toward Ft. Knox, Ky. Rbn.

(10) GATOR, FLA. (LF) INTSXN - the intsxn of the N course of the Perrine, Fla. LFR and a 306°T bearing from Marine Miami, Fla. Rbn.

(11) LONGVIEW, WASH. (VHF) INTSXN - the intsxn of the 355°T radial of the Newberg, Oreg. VOR and the 309°T radial of the Portland, Oreg. VOR.

(12) MANTENO, ILL. (VHF) INTSXN - the intsxn of the 132°T radial of the Joliet, Ill. VOR and the 008°T radial of the Roberts, Ill. VOR.

(13) MT. HOLLY, N.C. (VHF) INTSXN - the intsxn of the 005°T radial of the Charlotte, N.C. VOR and the 064°T radial of the Spartanburg, S.C. VOR.

(14) NEW RIVER, FLA. (LF) INTSXN - the intsxn of the N course of the Perrine, Fla. LFR and a 221°T bearing from West Palm Beach, Fla. LFR.

(15) PITTSBURG. , OREG. (VHF) INTSXN - the intsxn of the 355°T radial of the Newburg, Oreg. VOR and the 301°T radial of the Portland, Oreg. VOR,

(16) RADIO, TEX. (VHF) INTSXN - the intsxn of the 128° T radial of the Midland, Tex. VOR and the NE course of the Midland, Tex. ILS lclzr.

(17) SCAPPOOSE, OREG. (VHF) INTSXN - the intsxn of the 355°T radial of the Newburg, Oreg. VOR and the W course of the Portland, Oreg. ILS lclzr.

(18) SHABBONA, ILL. (VHF) INTSXN - the intsxn of the 153°T radial of the Rockford, Ill. VOR and the 238°T radial of the Wheeling, Ill. VOR and the 269°T radial of the Naperville, Ill. VOR.

(19) SPUR, TEX. (VHF) INTSXN - the intsxn of the 327°T radial of the Abilene, Tex. VOR and the 222°T radial of the Guthrie, Tex. VOR and the 101°T radial of the Lubbock, Tex. VOR.

(20) SUGAR GROVE, ILL. (VHF) INTSXN - the intsxn of the 269°T radial of the Naperville Ill. VOR and the 313°T radial of the Joliet, Ill. VOR.

(21) SYCAMORE, ILL. (VHF) INTSXN - the intsxn of the 088°T radial of the Polo, Ill. VOR and the 132°T radial of the Rockford, Ill. VOR and the 292°T radial of the Naperville, Ill. VOR.

(22) THOMSON, ILL. (VHF) INTSXN - the intsxn of the 268°T radial of the Polo, Ill. VOR and the 056°T radial of the Moline, Ill. VOR.

(23) UNION, MICH. (VHF) INTSXN - the intsxn of the 075°T radial of the South Bend VOR and the 150°T radial of the Keeler, Mich. VOR.

(24) WINLOCK, WASH. (VHF) INTSXN - the intsxn of the 195°T radial of the Olympia, Wash. VOR and the W course of the Toledo, Wash. LFR.

(25) WINN RANCH, TEX. (VHF) INTSXN - the intsxn of the 207°T radial of the Austin, Tex. VOR and the 057°T radial of the San Antonio, Tex. VOR.

CANCELLED:

(1) ANNAWAN, ILL. (VHF) INTSXN - the intsxn of the 087° mag radial of the Iowa City, Iowa VOR and the 134° mag radial of the Moline, Ill. VOR. (Changed to Compulsory)

(2) ARGYLE, WIS. (VHF) INTSXN - the intsxn of the 279° mag radial of the Janesville, Wis. VOR and the 157° mag radial of the Lone Rock, Wis. VOR.

...the intsxn of the 114°T radial of the Allentown, Pa. ...the intsxn of the 358°T radial of the Wilkes-Barre, Pa. ...the intsxn of the 340°T radial of the Quakertown, ...the intsxn of the 021°T radial of the Morgantown, ...the intsxn of the 060°T radial of the Dayton, ...the intsxn of the 050°T radial of the Appleton, ...the intsxn of the 061°T radial of the Denver, ...the intsxn of the 080°T radial of the Modesto, ...the intsxn of the 319°T radial of the Jacksonville, ...the intsxn of the 121°T radial of the Mansfield, ...the intsxn of the 063°T radial of the Iowa City, ...the intsxn of the 056°T radial of the Joliet, ...the intsxn of the 037°T radial of the Charlotte, ...the intsxn of the 128°T radial of the Tallahassee, ...the intsxn of the 200°T radial of the Moline, ...the intsxn of the 307°T radial of the Parkersburg, ...the intsxn of the 340°T radial of the Naperville, ...the intsxn of the 269°T radial of the Louisville, ...the intsxn of the N course of the Perrine, ...the intsxn of the 355°T radial of the Newberg, ...the intsxn of the 132°T radial of the Joliet, ...the intsxn of the 005°T radial of the Charlotte, ...the intsxn of the 355°T radial of the Newburg, ...the intsxn of the 128° T radial of the Midland, ...the intsxn of the 355°T radial of the Newburg, ...the intsxn of the 153°T radial of the Rockford, ...the intsxn of the 327°T radial of the Abilene, ...the intsxn of the 269°T radial of the Naperville ...the intsxn of the 088°T radial of the Polo, ...the intsxn of the 268°T radial of the Polo, ...the intsxn of the 075°T radial of the South Bend ...the intsxn of the 195°T radial of the Olympia, ...the intsxn of the 207°T radial of the Austin, ...the intsxn of the 087° mag radial of the Iowa City, ...the intsxn of the 279° mag radial of the Janesville,

(3) BRISTOL, WIS. (VHF) INTSXN - the intsxn of the 159° mag radial of the Milwaukee, Wis. VOR and the front course of the Milwaukee, Wis. ILS lclzr.

(4) FOX LAKE, ILL. (VHF) INTSXN - the intsxn of the 104° mag radial of the Janesville, Wis. VOR and the 173° mag radial of the Milwaukee, Wis VOR.

(5) GLEN ELLYN, ILL. (VHF) INTSXN - the intsxn of the 020° mag radial of the Janesville, Ill. VOR and the 292° mag radial of the Chicago, (Midway), Ill. TVOR.

(6) HANCOCK, N.Y. (VHF) INTSXN - the intsxn of the Binghamton, N.Y. VOR direct radial to Wilton, Conn. VOR and the 030° mag radial of the Wilkes-Barre, Pa. VOR.

(7) JUSTIN, TEX. (LF) INTSXN - the intsxn of the N course of the Ft. Worth, Tex. LFR and the NW course of the Ft. Worth, (Carter), Tex. ILS lclzr.

(8) LAKE FOREST, ILL. (VHF) INTSXN - the intsxn of the 104° mag radial of the Janesville, Wis. VOR and the 340° mag radial of the Chicago Heights, Ill. VOR.

(9) LEWISBURG, OHIO (VHF) INTSXN - the intsxn of the 060°T radial of the Dayton, Ohio VOR and the 279°T radial of the Appleton, Ohio VOR.

(10) MILLS, WIS. (VHF) INTSXN - the intsxn of the 014° mag radial of the Janesville, Wis. VOR and the 271° mag radial of the Milwaukee, Wis. VOR.

(11) PRAIRIE, IOWA (VHF) INTSXN - the intsxn of the 087° mag radial of the Iowa City, Iowa VOR and the 240° mag radial of the Moline, Ill. VOR.

(12) WOODSTOCK, ILL. (VHF) INTSXN - the intsxn of the 104° mag radial of the Janesville, Wis. VOR and the 187° mag radial of the Milwaukee, Wis. VOR.

NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are revised, designated, redesignated or cancelled and shall become effective 3/14/57.

REVISED:

(1) BEDFORD, TEX. (VHF) INTSXN - (NW ACF ILS/MWL 067). Change minimum holding altitude from 2000' to 2800'.

(2) SOMERSET, TEX. RBN - Change minimum holding altitude from 2100' to 1900'.

DESIGNATED:

(1) ASHLEY, OHIO (VHF) INTSXN - direction of holding - NW on the 309°T radial of the Appleton, Ohio VOR; direction of turns - RIGHT; time - one minute.

(2) BREMERTON, WASH. (VHF) INTSXN - direction of holding - W on the 292°T radial of the Seattle, Wash. VOR; direction of turns - RIGHT; time - one minute; minimum altitude - 4500'.

(3) EL DORADO, ARK RBN - direction of holding - NW on the 317°T bearing from Rbn; direction of turns - RIGHT; time - one minute; minimum altitude - 1400'.

(4) EL DORADO, ARK. VOR - direction of holding - NE on the 037°T radial; direction of turns - RIGHT; time - one minute; minimum altitude - 1400'.

(5) EUGENE, OREG. LFR - direction of holding - N on N course; direction of turns - RIGHT; time - one minute; minimum altitude - 2000'.

(6) EUGENE, OREG. VOR - direction of holding - N on the 016°T radial; direction of turns - RIGHT; time - one minute; minimum altitude - 2000'.

(7) HANOVER, OHIO (VHF) INTSXN - direction of holding - SE on the 127°T radial of the Appleton, Ohio VOR; direction of turns - RIGHT; time - one minute.

(8) HIGHFALLS, N.C. (VHF) INTSXN - direction of holding - SW on the 249°T radial of the Raleigh , N.C. VOR; direction of turns - LEFT; time - two minutes; minimum altitude - 1800'.

(9) HOWELL, MICH. (VHF) INTSXN - direction of holding - NW on the 291°T radial of the Salem, Mich. VOR; direction of turns - LEFT; time - one minute; minimum altitude - 2900'.

(10) MARYSVILLE, OHIO (VHF) INTSXN - direction of holding - E on the 277°T radial of the Appleton, Ohio VOR; direction of turns - LEFT; time - one minute.

(11) MT. SYLVAN, TEX. (VHF) INTSXN - direction of holding - E on the 273°T radial of the Gregg Co. Tex. VOR; direction of rurns - RIGHT; time - one minute; minimum altitude - 1800'.

(12) NEWARK, OHIO (VHF) INTSXN - direction of holding - E on the 085°T radial of the Appleton, Ohio VOR; direction of turns - LEFT; time - one minute.

(13) PURDY, WASH. (VHF) INTSXN - direction of holding - W on the 262°T radial of the Seattle, Wash. VOR; direction of turns - RIGHT; time - one minute; minimum alt. - 3000'.

(14) UTICA, OHIO (VHF) INTSXN - direction of holding - NE on the 050°T radial of the Appleton, Ohio VOR; direction of turns - RIGHT; time - one minute.

(15) YAKIMA, WASH. ILS/LOM - direction of holding - SE on SE course ILS lclzr; direction of turns - LEFT; time - one minute; minimum altitude - 3500'.

(16) YULES, FLA. (VHF) INTSXN - direction of holding - NW on the 319°T radial of the Jacksonville, Fla. VOR; direction of turns - RIGHT; time - one minute; min alt - 1200'.

REDESIGNATED:

(1) COVINA, CALIF. (VHF) INTSXN - direction of holding - N on the 024°T radial of the Long Beach, Calif. VOR; direction of turns - RIGHT; time - one minute; minimum altitude - 9000'.

(2) MT. HOLLY, N.C. (VHF) INTSXN - direction of holding - N on the 005°T radial of the Charlotte, N.C. VOR; direction of turns - RIGHT; time - one minute.

CANCELLED:

(1) BUTLER, PA. RBN - direction of holding - N on the 190° mag inbound bearing; direction of turns - LEFT; time - two minutes. (Changed to standard pattern)

(2) GLEN ELLYN, ILL. (VHF) INTSXN - direction of holding - W on the 292° mag radial of the Chicago (Midway), Ill. TVOR; direction of turns - RIGHT; time - one minute; minimum altitude - 2500'.

(5 Feb 1957)

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective March 14, 1957, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Amber civil airway No. 2 (Daggett, Calif. to Point Barrow, Alaska), caption changed and is amended by changing all the portion before Good Springs, Nev. nondirectional rdo bcn to read: "From the Daggett, Calif. rdo rng stn via the Good Springs, Nev. nondirectional rdo bcn;" (Note: Above change deletes portion A-2 between San Pedro intsxn and Daggett LF rng).

(2) Amber civil airway No. 13 (Washington, D. C. to New York, N.Y.), is revoked.

(3) Amber civil airway No. 14 (Washington, D.C. to New York, N.Y.), is revoked.

(4) Amber civil airway No. 15 (Washington, D.C. to New York, N.Y.), is revoked.

(5) Amber civil airway No. 19 (Washington, D.C. to New York, N.Y.), is revoked.

(6) Red civil airway No. 113 (Hawaiian Islands), is added to read: "From the Makapuu Point, Oahu, T.H., nondirectional rdo bcn to the intsxn of a line bearing 62°T from the Makapuu Point nondirectional rdo bcn with the N course of the Maui, T.H. rdo rng."

(7) VOR civil airway No. 1 (Charleston, S.C. to New York, N.Y.), is amended by changing the last sentence to read: "those portions of this arwy between the point of intsxn of the Coyle, N.J. omnirng 203°T and the Woodstown, N.J. omnirng 106°T radials and the point of intsxn of the Colts Neck, N.J. omnirng 073°T and the Coyle, N.J. omnirng 031° T radials lying more than 3 miles either side of the center line, and those portions in conflict with the Patuxent Restricted Area (R-43) and the Warren Grove Restricted Area (R-26), are excluded."

(8) VOR civil airway No. 3 (Key West, Fla. to Presque Isle, Me.), is amended by changing the portion which reads: "Lawrenceville, Va., omnirng stn; intsxn of the Lawrenceville omnirng 035°T and the Flat Rock omnirng 171°T radials, excluding the portion which overlaps the Camp Pickett restricted area (R-44);" to read: "point of intsxn of the Raleigh omnirng 008°T and the South Boston, Va. omnirng 081°T radials;" (Note: Redesignated V3 from Raleigh VOR to Flat Rock VOR via the Chase City Intsxn. Renumbered the existing VOR arwy portion from Raleigh VOR to Flat Rock VOR via Lawrenceville VOR as a part of V155).

(9) VOR civil airway No. 6 (Oakland, Calif. to New York, N.Y.), is amended by changing the portion which reads: "Moline, Ill. omnirng stn, including a S alternate" to read: "Moline, Ill omnirng stn, including a S alternate via the intsxn of the Iowa City omnirng 093°T and the Moline omnirng 230°T radials;" (Note: Redesignated V6S between Iowa City VOR and Moline VOR).

(10) VOR civil airway No. 7 (Miami, Fla. to Green Bay, Wis.), is amended by changing all after the Chicago Heights, Ill. omnirng stn to read: "Chicago Heights, Ill. omnirng stn, including an E alternate via the intsxn of the Lafayette omnirng 353°T and the Chicago Heights omnirng 143°T radials; intsxn of the Chicago Heights omnirng 358°T and the Milwaukee omnirng 135°T radials; Milwaukee, Wis. omnirng stn, including an E alternate via the intsxn of the Chicago Heights omnirng 013°T and the Milwaukee omnirng 135°T radials; to the Green Bay, Wis. omnirng stn. The portions of this arwy above 19,000 feet above mean sea level, which lie within the Tyndall AFB Restricted Area (R-336) and the Tyndall AFB Warning Area (W-337), are excluded daily between sunset and sunrise." (Note: Redesignated V7 between Chicago Heights VOR and Milwaukee VOR and added V7E between Chicago Heights VOR and Milwaukee VOR. The redesignated portion of V7 between Chicago Heights VOR and Milwaukee VOR was formerly V187).

(11) VOR civil airway No. 8 (Long Beach, Calif. to Washington, D.C.), is amended by changing the portion which reads: "Moline, Ill. omnirng stn, including a S alternate;" to read: "Moline, Ill. omnirng stn, including a S alternate via the intsxn of the Iowa City omnirng 093°T and the Moline omnirng 230°T radials;" (Note: Redesignated V8S between Iowa City VOR and Moline VOR).

(12) VOR civil airway No. 9 (New Orleans, La. to Milwaukee, Wis.), is amended by changing all after the Naperville, Ill. omnirng stn to read: "Naperville, Ill. omnirng stn; point of intsxn of the Janesville, Wis. omnirng 098°T and the Milwaukee omnirng 192°T radials; to the Milwaukee, Wis. omnirng stn, including a W alternate via the intsxn of the Naperville omnirng 317°T and the Milwaukee omnirng 207°T radials." (Note: Redesignated V9 and V9W between Naperville VOR and Milwaukee VOR.)

(13) VOR civil airway No. 12 (Santa Barbara, Calff. to Philadelphia, Pa.), is amended by changing the portion which reads: "Appleton, Ohio, omnirng stn, incldiing a N alternate via the intsxn of the Dayton omnirng 060°T and the Appleton omnirng 279°T radials; Wheeling, W. Va. omnirng stn, including a N alternate via the point of intsxn of the Mansfield, Ohio omnirng 121°T and the Wheeling omnirng 281°T radials;" to read: "Appleton, Ohio, omnirng stn, including a N alternate via the intsxn of the Dayton omnirng 060°T and the Appleton omnirng 277°T radials; Wheeling, W. Va. omnirng stn, including a N alternate via the point of intsxn of the Mansfield, Ohio, omnirng 121°T and the Wheeling omnirng 282° T radials;" (Note: Changed Appleton 279°to 277° and Wheeling 281° to Wheeling 282°.)

(14) VOR civil airway No. 19 (El Paso, Tex. to Great Falls, Mont), is amended by changing the portion which reads: "Kiowa, Colo. omnirng stn;" to read: "Kiowa, Colo. omnirng stn, including an E alternate via the intsxn of the Pueblo omnirng 018°T and the Kiowa omnirng 167°T radials;" (Note: V19E between Pueblo VOR and Kiowa VOR)

(15) VOR civil airway No. 26 (Cherokee, Wyo. to Cleveland, Ohio), is amended by changing the portion which reads: "Minneapolis, Minn. omnirng stn, including a S alternate via the intsxn of the Redwood Falls omnirng 076°T and the Minneapolis omnirng 194°T radials; Eau Claire, Wis. omnirng stn, including a S alternate;" to read: "Minneapolis, Minn. omnirng stn; Eau Claire, Wis. omnirng stn, including a S alternate from the Redwood Falls omnirng stn to the Eau Claire omnirng stn via the point of intsxn of the Redwood Falls omnirng 076°T and the Minneapolis omnirng 194°T radials;" (Note: Revoked V26S between Redwood Falls VOR and Minneapolis VOR and between Minneapolis VOR and Eau Claire VOR. Added V26S from Redwood Falls VOR to Eau Claire VOR via the Prior Intsxn).

(16) VOR civil airway No. 47 (Louisville, Ky. to Detroit, Mich.), is amended by changign the portion which reads: "Dayton, Ohio omnirng stn, including a W alternate via the intsxn of the Cincinnati omnirng 004°T and the Dayton omnirng 227°T radials;" to read: "Dayton, Ohio omnirng stn, including a W alternate from the Cincinnati omnirng stn to the Dayton omnirng stn via the point of intsxn of the Cincinnati omnirng 004°T radial with the Dayton ILS lclzr SW course and the point of intsxn of the Dayton ILS lclzr SW course with the Dayton omnirng 202°T radial;" (Note: Redesignated V47W between Cincinnati VOR and Dayton VOR).

(17) VOR civil airway No. 63 (Waco, Tex. to Milwaukee, Wis.), is amended by changing all after the Burlington, Iowa, omnirng stn to read: "Burlington, Iowa omnirng stn; intsxn of the Burlington omnirng 015°T and the Janesville omnirng 239°T radials; Janesville, Wis. omnirng stn; to the Milwaukee, Wis. omnirng stn." (Note: Redesignated V63 between Burlington VOR and Milwaukee VOR. Also revoked V63W Moline-Janesville and Janesville-Milwaukee.)

(18) VOR civil airway No. 75 (Petersburg, W.Va. to Cleveland, Ohio), is amended to read: "From the point of intsxn of the Morgantown, W.Va. omnirng 134°T and the Elkins, W.Va. omnirng 083°T radials via the Morgantown, W.Va. omnirng stn; Wheeling, W.Va. omnirng stn; to the Cleveland, Ohio omnirng stn." (Note: Renumbered the portion of V75 between Flat Rock VOR and Gordonsville VOR as a part of V155).

(19) VOR civil airway No. 84 (Shabbona, Ill. to Buffalo, N.Y.), is amended to read: "That airspace over United States territory from the point of intsxn of the Moline, Ill. omnirng 088°T and the Wheeling omnirng 238°T radials via the Wheeling, Ill. omnirng stn; Pullman, Mich. omnirng stn; Lansing, Mich. omnirng stn; Selfridge, Mich. omnirng stn; London, Ont. omnirng stn; to the Buffalo, N.Y., omnirng stn." (Note: Added new portion to V84 from Shabbona Intsxn to Wheeling VOR. Renumbered V84 from Bradford, Ill. VOR via Joliet VOR to Midway Arpt as V262).

(20) VOR civil airway No. 92 (Chicago, Ill. to Washington, D. C.), is amended by changing the portion which reads: "From the Chicago Heights, Ill. omnirng stn via the Goshen, Ind. omnirng stn;" to read: "From the Joliet, Ill. omnirng stn via the Chicago Heights, Ill. omnirng stn; Goshen, Ind. omnirng stn;" (Note: Added new portion to V92 from Joliet VOR to Chicago Heights VOR).

(21) VOR civil airway No. 93 (Baltimore, Md. to Presque Isle, Me.), caption changed and is amended by changing all before the Allentown, Pa. omnirng stn to read: "That airspace over United States territory from the Baltimore, Md omnirng stn via the intsxn of the Baltimore omnirng 015°T and Allentown omnirng 228°T radials; Allentown, Pa. omnirng stn;" (Note: Revoked that portion of V93 from the Riverdale, Md. MHW facility to the Baltimore VOR.).

(22) VOR civil airway No. 97 (Miami, Fla. to Alexandria, Minn.), is amended by changing the portion which reads: "Chicago Heights, Ill. omnirng stn; intsxn of the Chicago Heights omnirng 342°T and the Janesville omnirng 107°T radials; Janesville, Wis. omnirng stn; Lone Rock, Wis. omnirng stn, including a W alternate via the intsxn of the Janesville omnirng 282°T and the Lone Rock omnirng 161°T radials;" to read: "to the Chicago Heights, Ill. omnirng stn. From the point of intsxn of the Janesville omnirng 098°T and the Milwaukee, Wis. omnirng 192°T radials via the Janesville, Wis. omnirng stn; intsxn of the Janesville omnirng 294°T and the Lone Rock omnirng 147°T radials; Lone Rock, Wis. omnirng stn;" (Note: Revoked V97 from Chicago Heights VOR via Lake Forest Intsxn and Janesville VOR to Lone Rock VOR. Redesignated V97 from Hebron Intsxn via Janesville VOR and New Glarus Intsxn to Lone Rock VOR. Revoked V97W Janesville VOR to Lone Rock VOR.)

(23) VOR civil airway No. 99 (Newport, Oreg. to Vancouver, B.C.), is amended by changing the portion which reads: "intsxn of the Newberg omnirng 359° T and the Olympia omnirng 184°T radials;" to read: "intsxn of the Newberg omnirng 355°T and the Olympia omnirng 195°T radials;" (Note: Redesignated portion of V99 between Newberg VOR and Olympia VOR).

(24) VOR civil airway No. 100 (North Platte, Nebr. to Detroit, Mich.), is amended to read: "From the North Platte, Nebr. omnirng stn via the Sioux City, Iowa omnirng stn; Waterloo, Iowa omnirng stn; intsxn of the Waterloo omnirng 097°T and the Polo omnirng 297°T radials; to the Polo, Ill. omnirng stn. From the Rockford, Ill. omnirng stn via the Wheeling, Ill. omnirng stn; intsxn of the Wheeling omnirng 093°T and the Keeler omnirng 271° T radials; Keeler, Michigan omnirng station; point of intersection of the Litchfield, Mich. omning 050° T and the Salem omnirange 257° T radials; to the Salem, Mich. omnirng stn. The portion of this airway below 1900 feet MSL which overlaps the Savanna restricted

...omnirng stn via the Roanoke, Va. term omnirng stn; ...to Cleveland, Ohio), is amended to ...Wheeling, W.Va. omnirng stn; point of intsxn of the Wheeling ...field, Ohio, omnirng 100°T and the Mansfield, Ohio, omnirng 100°T radials; point of intsxn of the Mansfield, Ohio, omnirng 100°T and the Cleveland omnirng 150°T radials; to the Cleveland, Ohio omnirng stn." (Note: Added new portion to V103 from Greensboro VOR via Roanoke TVOR to Elkins VOR.)

(26) VOR civil airway No. 107 (Los Angeles, Calif. to Red Bluff, Calif.), is amended by changing all before the Fillmore, Calif. omnirng stn to read: "From the Long Beach, Calif. omnirng stn via the intsxn of the Long Beach omnirng 287°T and the Fillmore omnirng 163°T radials; Fillmore, Calif. omnirng stn;". (Note: Redesignated V107 from Long Beach VOR to Fillmore VOR.)

(27) VOR civil airway No. 123 (Washington, D.C. to Wilton, Conn.), is amended to read: "From the Washington, D.C. term omnirng stn via the Baltimore, Md. LF rdo rng stn; point of intsxn of the Baltimore LF rdo rng N course and the Baltimore, Md. omnirng 045°T radials point of intsxn of the Baltimore omnirng 045°T and the Woodstown omnirng 269°T radials; Woodstown, N.J. omnirng stn; point of intsxn of the Woodstown omnirng 045°T and the Coyle, N.J. omnirng 354°T radials;.point of intsxn of the Idlewild, N.Y. omnirng 236°T radial and the LaGuardia Arpt, N.Y. ILS lclzr S course; LaGuardia Arpt, N.Y. ILS lclzr; to the Wilton, Conn. omnirng stn. The portion of this arwy which overlaps the Washington Prohibited Area (P-56) is excluded." (Note: Added new portion to V123 from Washington TVOR via Essex and Port Deposit Intsxn to Woodstown VOR. The portion from Essex Intsxn via Port Deposit Intsxn to Woodstown VOR is also a part of V140.)

(28) VOR civil airway No. 129 (Rockford, Ill. to Eau Claire, Wis.), is amended to read: "From the Rockford, Ill. omnirng stn via the intsxn of the Rockford omnirng 276°T and the Lone Rock omnirng 163°T radials; Lone Rock, Wis. omnirng stn; La Crosse, Wis. omnirng stn; to the Eau Claire, Wis. omnirng stn." (Note: Redesignated V129 from Rockford VOR to Lone Rock VOR. This portion was formerly from Polo, Ill. VOR to Lone Rock VOR.)

(29) VOR civil airway No. 155 (Raleigh, N.C. to Front Royal, Va.), is amended to read: "From the Raleigh, N.C. omnring stn via the Lawrenceville, Va. omnirng stn; intsxn of the Lawrenceville omnirng 035°T and the Flat Rock omnirng 171°T radials; Flat Rock, Va. omnirng stn; Gordonsville, Va. omnirng stn; point of intsxn of the Washington, D.C. term omnirng 249°T and the Front Royal omnirng 140°T radials; to the Front Royal, Va. omnirng stn. The portion of this arwy which overlaps the Camp Pickett Restricted Area (R-44) is excluded." (Note: Added new portion to V155 from Raleigh VOR to Gordonsville VOR via Lawrenceville VOR and Flat Rock VOR. New portion was formerly part of V3 and V75).

(30) VOR civil airway No. 171 (Louisville, Ky. to Lone Rock, Wis.), is amended to read: "From the Louisville, Ky. omnirng stn via the Scotland, Ind. omnirng stn; Terre Haute, Ind. omnirng stn; Peotone, Ill. omnirng stn; Joliet, Ill. omnirng stn; Rockford, Ill. omnirng stn; to the Lone Rock, Wis. omnirng stn." (Note: Redesignated V171 from Joliet VOR direct to Rockford VOR direct to Lone Rock VOR.)

(31) VOR civil airway No. 172 (Des Moines, Iowa to Chicago, Ill.), is amended to read: "From the Des Moines, Iowa, omnirng stn via Cedar Rapids, Iowa, omnirng stn; Polo, Ill. omnirng stn; to the Chicago, Ill. Intnl (O'Hare) Arpt term omnirng stn." (Note: Added Cedar Rapids VOR to V172. Revoked the portion of V172S between Moline VOR and the Polo VOR and renumbered the portion of V172S between Moline VOR and Cedar Rapids as V233. Redesignated V172 to go from Polo VOR to Chicago Intnl (O'Hare) TVOR.)

(32) VOR civil airway No. 173 (Springfield, Ill. to Chicago, Ill.), is amended to read: "From the Springfield, Ill. omnirng stn via the Roberts, Ill. omnirng stn; point of intsxn of the Roberts omnirng 008°T and the Joliet, Ill. omnirng 056°T radials; to the Chicago, Ill. Midway Arpt term omnirng stn." (Note: Redesignated V173 between Roberts VOR and Midway TVOR).

(33) VOR civil airway No. 177 (Chicago, Ill. to Janesville, Wis.), is amended to read: "From the Naperville, Ill. omnirng stn to the Janesville, Wis. omnirng stn." (Note: Revoked portion of V177 from Janesville VOR to Mills Intsxn).

(34) VOR civil airway No. 187 (Chicago, Ill. to Milwaukee, Wis.), is revoked. (Note: V187 revoked and redesignated as a part of V7 between Chicago Heights VOR and Milwaukee VOR).

(35) VOR civil airway No. 191 (Walnut Ridge, Ark. to Milwaukee, Wis.), is amended by changing the portion which reads: "intsxn of the Roberts omnirng 012°T and the Chicago Midway Arpt termomnirng 198°T radials;" to read "point of intsxn of the Roberts omnirng 008° T and the Joliet, Ill. omnirng 056°T radials;" (Note: Redesignated V191 between Roberts VOR and Midway TVOR).

(36) VOR civil airway No. 193 (Fort Wayne, Ind. to Traverse City, Mich.), is amended to read: "From the Fort Wayne, Ind. omnirng stn via the Keeler, Mich. omnirng stn; Pullman, Mich. omnirng stn; Grand Rapids, Mich. ILS outer mrkr; White Cloud, Mich. omnirng stn; to the Traverse City, Mich. LF rdo rng stn." (Note: Added new portion Fort Wayne VOR to Pullman VOR. The portion Keeler VOR to Pullman VOR is also a part of V55.)

(37) VOR civil airway No. 209 (Los Angeles, Calif. to Paso Robles, Calif.), is amended to read: "From the Long Beach, Calif. omnirng stn via the intsxn of the Long Beach [illegible] 287°T and the Fillmore omnirng 163°T radials; Fillmore, Calif. omnirng stn; to the Paso Robles, Calif. omnirng stn." (Note: Redesignated V209 from the Long Beach VOR to the Fillmore VOR).

(38) VOR civil airway No. 217 (Chicago, Ill. to Green Bay, Wis.), is amended to read: "From the Chicago, Ill. Intnl (O'Hare) Arpt term omnirng stn via the point of intsxn of the Chicago Heights, Ill. omnirng 358°T and the Milwaukee omnirng 135°T radials; point of intsxn of the Milwaukee omnirng 136°T radials and the Milwaukee (General Mitchell Field) ILS lclzr front course; Milwaukee, Wis. (General Mitchell Field) ILS lclzr; intsxn of the Milwaukee (General Mitchell Field) ILS lclzr back course and the Green Bay omnirng 165°T radial; to the Green Bay, Wis. omnirng stn." (Note: Redesignated V217 from O'Hare TVOR to Milwaukee ILS lclzr. This portion was formerly from Naperville VOR).

(39) VOR civil airway No. 218 (Chicago, Ill. to Flint, Mich.), is amended by changing the portion which reads: "From the point of intsxn of the Naperville omnirng 296°T and the Polo, Ill. 085°T radials" to read: "From the point of intsxn of the Rockford, Ill. omnirng 132°T and the Naperville, Ill. omnirng 292°T radials". (Note: Minor change in V218 due to shift in lctn of Sycamore Intsxn).

(40) VOR civil airway No. 219 (Janesville, Wis. to Milwaukee, Wis.), is revoked.

(41) VOR civil airway No. 233 (Springfield, Ill. to Cedar Rapids, Iowa), is amended to read: "From the Springfield, Ill. omnirng stn via the Peoria, Ill. omnirng stn; Bradford, Ill. omnirng stn; Moline, Ill. omnirng stn; to the Cedar Rapids, Iowa, omnirng stn." (Note: Added new portion to V233 from Moline VOR to Cedar Rapids, Iowa. This portion was formerly part of V172S).

(42) VOR civil airway No. 255 (Burlington, Iowa, to Janes ville, Wis.), is added to read: "From the Burlington, Iowa omnirng stn via the intsxn of the Burlington omnirng 034°T and the Moline omnirng 199°T radials; Moline, Ill. omnirng stn; Rockford, Ill. omnirng stn; to the Janesville, Wis. omnirng stn." (Note: New airway).

(43) VOR civil airway No. 262 (Bradford, Ill. to Chicago, Ill.), is added to read: "From the Bradford, Ill. omnirng stn via the Joliet, Ill. omnirng stn; to the Chicago, Ill. Midway Arpt term omnirng stn.". (Note: This arwy was formerly a portion of V84).

(44) VOR civil airway No. 263 is added to read: "(unassigned)".

(45) VOR civil airway No. 264 (Ontario, Calif. to Giant Rock, Calif.), is added to read: "From the Ontario, Calif. omnirng stn to the point of intsxn of the Ontario 061°T and the Daggett, Calif. omnirng 160°T radials." (Note; New arwy.)

(46) VOR civil airway No. 265 is added to read: "(unassigned)".

(47) VOR civil airway No. 266 (South Boston, Va. to Lawrenceville, Va.), is added to read: "From the South Boston, Va. omnirng stn to the Lawrenceville, Va. omnirng stn.". (Note: New arwy.)

CONTROL AREAS:

(1) Amber civil airway No. 2 (Daggett, Calif. to Point Barrow, Alaska), caption changed.
(2) Amber civil airway No. 13 (Washington, D. C. to New York, N.Y.), is revoked.
(3) Amber civil airway No. 14 (Washington, D. C. to New York, N.Y.), is revoked.
(4) Amber civil airway No. 15 (Washington, D.C. to New York, N.Y.), is revoked.
(5) Amber civil airway No. 19 (Washington, D.C. to New York, N.Y.), is revoked.
(6) Red civil airway No. 113 (Hawaiian Islands), is added to read: "All of Red civil arwy No. 113."
(7) VOR civil airway No. 19 (El Paso, Tex. to Great Falls, Mont.), is amended to read: "All of VOR civil arwy No. 19 including E alternates."
(8) VOR civil airway No. 63 (Waco, Tex. to Milwaukee, Wis.), is amended to read: "All of VOR civil arwy No. 63."
(9) VOR civil airway No. 75 (Petersburg, W.Va. to Cleveland, Ohio), is amended to read: "All of VOR civil arwy No. 75."
(10) VOR civil airway No. 84 (Shabbona, Ill. to Buffalo, N.Y.), is amended to read: "All of VOR civil arwy No. 84."
(11) VOR civil airway No. 93 (Baltimore, Md. to Presque Isle, Me.), is amended to read: "All of VOR civil arwy No. 93."
(12) VOR civil airway No. 103 (Greensboro, N.C. to Cleveland, Ohio), is amended to read: "All of VOR civil arwy No. 103."
(13) VOR civil airway No. 123 (Washington, D.C. to Wilton, Conn.), is amended to read: "All of VOR civil arwy No. 123."
(14) VOR civil airway No. 129 (Rockford, Ill. to Eau Claire, Wis.), is amended to read: "All of VOR civil arwy No. 129."
(15) VOR civil airway No. 155 (Raleigh, N.C. to Front Royal, Va.), is amended to read: "All of VOR civil arwy No. 155."
(16) VOR civil airway No. 171 (Louisville, Ky. to Lone Rock, Wis.), is amended to read: "All of VOR civil arwy No. 171."
(17) VOR civil airway No. 172 (Des Moines, Iowa to Chicago, Ill.), is amended to read: "All of VOR civil arwy No. 172."
(18) VOR civil airway No. 177 (Chicago, Ill. to Janesville, Wis.), is amended to read: "All of VOR civil arwy No. 177."
(19) VOR civil airway No. 187 (Chicago, Ill. to Milwaukee, Wis), is revoked.

(20) VOR civil airway No. 193 (Fort Wayne, Ind. to Traverse City, Mich.), is amended to read: "All of VOR civil arwy No. 193".

(21) VOR civil airway No. 219 (Janesville, Wis. to Milwaukee, Wis.), is revoked.

(22) VOR civil airway No. 233 (Springfield, Ill. to Cedar Rapids, Iowa), is amended to read: "All of VOR civil arwy No. 233."

(23) VOR civil airway No. 255 (Burlington, Iowa to Janesville, Wis.), is added to read: "All of VOR civil airway No. 255."

(24) VOR civil airway No. 262 (Bradford, Ill. to Chicago, Ill.), is added to read: "All of VOR civil arwy No. 262."

(25) VOR civil airway No. 263 is added to read: "(unassigned)".

(26) VOR civil airway No. 264 (Ontario, Calif. to Giant Rock, Calif.), is added to read: "All of VOR civil arwy No. 264."

(27) VOR civil airway No. 265 is added to read: "(unassigned)".

(28) VOR civil airway No. 266 (South Boston, Va. to Lawrenceville, Va.), is added to read: "All of VOR civil arwy No. 266."

CONTROL AREA EXTENSIONS:

(1) (New Orleans, La.), is amended to read: "That airspace in the NW quad of the New Orleans rdo rng lying within a 35 mile radius of the rdo rng stn; in the SW quad of the rdo rng bounded on the N by Green civil arwy No. 6, on the W by long. 91-05-00, on the S by lat 29-15-00 and on the E by Amber civil arwy No. 5; in the SE quad of the rdo rng bounded on the W by the S course of the New Orleans rdo rng, on the S and E by the United States shoreline and on the N by Red civil arwy No. 30; that airspace NE of New Orleans bounded by a line beginning at a point on the eastern boundary of Amber civil arwy No. 5 at lat 31-15-00, thence SE to lat 31-00-00, long. 89-45-00, thence E to lat 31-00-00, long. 89-00-00, thence N to lat 31-15-00, long. 89-00-00, thence E to lat 31-15-00, long. 88-00-00, thence S along long. 88-00-00 to the N boundary of Green civil arwy No. 6, thence W along the N boundary of Green 6 to Amber civil arwy No. 5 thence N along the E boundary of Amber 5 to point of beginning at lat 31-15-00, excluding the airspace lying between VOR civil arwy No. V-20 and V-20N bounded on the SW by the northern shoreline of Lake Ponchartrain and on the NE by the Biloxi, Miss. control area extension."

(2) (Victorville, Calif.), is amended in first portion by changing the words which read: "and on the SE by Amber civil arwy No. 2" to read: "and on the SE by VOR civil arwy No. 21," (Note: due to recission portion of Amber 2 - San Pedro to Daggett).

(3) (Boise, Idaho), is amended by adding the following portion to present control area extension: "and that airspace NE of Boise lying within a 25 mile radius of the Boise rdo rng stn bounded on the SW by Green civil arwy No. 10."

(4) (Bakersfield, Calif.), is amended by changing the words which read: "Bounded on the NE by VOR civil arwy No. 137" to read: "bounded on the NE by VOR civil arwy No. 165".

(5) (Brubank, Calif.), is amended in first portion by deleting the words which read: "on the SE by Amber civil arwy No. 2." (Note: Portion of Amber 2 being revoked, and the NE boundary of control area will automatically extend to hit Green 5 on the S.)

(6) (Fresno, Calif.), is amended to read: "The airspace W of Fresno lying within a 35 mile radius of the Fresno Air Term bounded on the E by VOR civil arwy No. 23; the airspace between Bakersfield-Fresno-Modesto, Calif., bounded on the SW by VOR civil arwy No. 23, on the NW by VOR civil arwy No. 28, and on the NE and SE by a line beginning at a point at lat 38-20-00, long. 120-22-00, extending to a point at lat 38-20-00, long. 120-00-00, thence to a point at 37-50-00, long. 120-00-00, thence to a point at lat 36-00-00, long. 118-48-00, thence to the Bakersfield, Calif. omnirng stn."

(7) (Madison, Wis.), is amended to read: "That airspace S of Madison bounded on the N by VOR civil arwy No. 2, on the SE by VOR civil arwy No. 63 and on the SW and W by VOR civil arwy No. 97."

(8) (Milwaukee, Wis.), is amended to read: "The airspace within a 20 mile radius of General Mitchell Field, including the airspace S of Milwaukee bounded on the NE and E by VOR civil arwy No. 217, on the S by VOR civil arwy 172 and on the W by VOR civil arwy No.9."

(9) (Merced, Calif.), is amended by changing the portion which reads: "on the S by VOR civil arwy No. 100," to read: "on the S by VOR civil arwy No. 199,"

(10) (New Orleans, La.), is amended by changing the name of the facility "Callender, La. nondirectional rdo bcn" to read: "Belle Chasse, La. nondirectional rdo bcn."

(11) (Waco, Tex.), is amended to read: "That airspace in the W quad of the Waco rdo rng lying within a 40-nautical mile radius of the rdo rng stn extending clockwise from Amber civil arwy No. 4 to Blue civil arwy No. 70 excluding the portion which overlaps restricted areas R-219 and R-343."

(12) (Stockton, Calif.), is amended by deleting the words which read: "excluding the portion which overlaps the Antioch restricted area."

(13) (Sioux Falls, S. Dak.), is amended to read: "That airspace SE of Sioux Falls within a 15 mile radius of the Sioux Falls omnirng stn extending clockwise from the southern boundary of VOR civil arwy No. 80 to the eastern boundary of VOR civil airway No. 15; that airspace within a 23 mile radius of the Sioux Falls omnirng stn extending from the western boundary of VOR civil arwy No. 15 S of Sioux Falls thence clockwise to the northern boundary of VOR civil arwy No. 80."

(14) (Ocuqulam, Wash.), is added to read: "That airspace centered on the 234°T radial of the Hoquiam omnirng, 10 miles in width at the omnirng stn with each edge diverging at an angle of 5° with the centerline and extending to the eastern boundary of the Seattle Oceanic Control Area, excluding the portion which conflicts with Warning Area W-460 and excluding the portion above 14,500 ft which lies beneath and which conflicts with restricted area R-241."

(15) (Newport, Oreg.), is added to read: "That airspace centered on the 237°T radial of the Newport omnirng, 10 miles in width at the omnirng stn with each edge diverging at an angle of 5° with the centerline and extending to the eastern boundary of the Seattle Oceanic Control Area, excluding the portion which conflicts with Warning Area (W-242.)"

(16) (North Bend, Oreg.), is added to read: "That airspace centered on the 239°T radial of the North Bend omnirng, 10 miles in width at the omnirng stn with each edge diverging at an angle of 5° with the centerline and extending to the eastern boundary of the Oceanic Control Area."

(17) (Goldsboro, N.C.), is added to read: "That airspace within a 25 mile radius of the Seymour-Johnson AFB, Goldsboro, N.C., bounded on the E by VOR civil arwy No. 157."

CONTROL ZONES:

(1) Five miles radius Zones is amended by adding the following airport:

Goldsboro, N.C.: Seymour-Johnson AFB.

(2) (San Angelo, Tex.), is amended to read: "Within a 10 mile radius of Mathis Field and within a 5 mile radius of Goodfellow AFB, San Angelo, Tex.; within 2 miles either side of the SE course of the San Angelo rdo rng extending from the rdo rng stn to a point 10 miles SE, within 2 miles either side of the NE course of the rdo rng extending from the rdo rng stn to a point 10 miles NE, and within 2 miles either side of the 72°T radial of the San Angelo omnirng extending to a point 10 miles NE of the omnirng stn."

(3) (Rockford, Ill.), is amended to read: "Within a 5 mile radius of the Greater Rockford Arpt, within 2 miles either side of a line bearing 182°T extending from the Rockford rdo rng stn to the Greater Rockford Arpt, within 2 miles either side of the NW course of the Rockford rdo rng extending from the rdo rng stn to a point 10 miles NW, within 2 miles either side of a line extending from the Greater Rockford Arpt through the Rockford nondirectional rdo bcn to a point 12 miles S of the nondirectional rdo bcn, and within 2 miles either side of the 112°T and 292°T radials of the Rockford omnirng stn extending from the 5 mile radius zone to a point 12 miles NW of the omnirng stn."

REPORTING POINTS:

(1) Amber civil airway No. 2 (Daggett, Calif. to Point Barrow, Alaska), caption changed and is amended by deleting the reporting point which reads: "The intsxn of the SW course of the Long Beach, Calif., rdo rng and the S course of the Los Angeles, Calif. rdo rng;" (Note: Added on Red 65)

(2) Red civil airway No. 65 (Los Angeles, Calif. to Hayfield, Lake, Calif.), is amended to read: "The intsxn of the S course of the Los Angeles, Calif. rdo rng and the SW course of the Long Beach, Calif. rdo rng."

(3) Red civil airway No. 113 (Hawaiian Islands), is added to read: "No reporting point designation."

VOR REPORTING POINTS:

(1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Roscoe Intsxn - the intsxn of the Appleton, Ohio omnirng 085°T and the Mansfield, Ohio omnirng 149°T radials. (b) Annawan Intsxn - the intsxn of the Iowa City, Iowa, omnirng 093°T radial, the Moline, Ill. omnirng 139°T radial and the Moline, Ill. ILS lclzr back course. (c) Cedar Rapids, Iowa, omnirng stn. (d) Rockford, Ill. omnirng stn.

(2) Domestic VOR reporting points is amended by changing the following reporting point:. (a) New Braunfels Intsxn - the intsxn of the San Antonio, Tex. omnirng 074°T and the Austin, Tex. omnirng 207°T radials.

(3) Domestic VOR reporting points is amended by revoking the following reporting points (a) Adamsville Intsxn - the intsxn of the Appleton, Ohio omnirng 085°T and the Mansfield, Ohio omnirng 149°T radials. (b) Cedar Rapids Intsxn - the intsxn of the Polo, Ill. omnirng 268°T and the Iowa City, Iowa, omnirng 349°T radials. (Cedar Rapids, Iowa, nondirectional rdo bcn.)

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Winston-Salem | Cleveland Local | Dayton Local | New York Local

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° have bends and roughness out of tolerance. About Feb 11, VOR will be shut down until approx Feb 25. (1-3)
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are marked. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg., test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14)
BIRMINGHAM ARPT: Caution-tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 9-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)
**DEMOPOLIS ARPT: Delete "(PC)" prefix. (2-1)
DOTHAN-NAPIER FLD: Caution-helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness & bends out of tolerance.
MOBILE-BATES FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in Montgomery-Maxwell area should avoid Maxwell AFB and Dannelly Fld control zones unless in contact with and cleared by the appropriate twr. Extensive flying engaged in at both arpts including practice instr apchs and simulated "flame-outs" by jets from 6500' to Dannelly Fld. (1-22)
**MONTGOMERY-DANNELLY FLD: E/W rnwy const finished -8000' now avail. Westernmost 3500' E/W strip clsd acct const. Dips in E/W rnwy 1500' from E end. Lgtd ditch approximately 200' NE of apch end of rnwy 21. (1-22)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi;090°-110°, 40 n mi;190°-215°, 35 n mi;215°-235°, 30 n mi;235°-255°, 35 n mi at MEA. (5-6)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
GRAND CANYON(S. RIM)ARPT: Due weather conditions, clsd until April 1. (12-26)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7)
PHOENIX-TURF PARADISE AIRSTRIP: Lctd approx 13 mi NNW Sky Harbor Arpt. Open on racing days only. (2-2)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000';135°-145° and 165°-185°, 39 n mi at 10,000'.
SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
TUCSON-RADIO: VOR/DME coverage:360°-050°, 35 n mi 11,000';050°-060°, 22 n mi 11,000';060°-075°, 35 n mi 11,000';075°-085°, 21 n mi 11,000';090°-170°, 40 n mi 12,000';225°-230°, 40 n mi 7,000';330°-345°, 35 n mi 11,000';345°-360°, 25 n mi 11,000'. (7-17)

[redacted]: TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt:(a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

**TUCSON-GILPIN ARPT: Arpt permanently clsd. (1-15)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (8-27)

[redacted]: FLIPPIN-RADIO: Soon VOR will be shut down until approx April 1. (12-11)

HARRISON ARPT: Fld clsd ngts.

LITTLE ROCK-RADIO: About Feb. 18, Keo FM on SE course will be shut down until approx March 1. (1-31)

**PARIS ARPT: ABANDONED. (12-6)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends. About Jan 28, VOR will be shut down until approx March 28 - relctd lat 33-30-50, long 94-04-20. (12-28) VOR flgts authorized to use TXK LFR in lieu of VOR. (1-3)

[redacted]: **ATWOOD ARPT: ABANDONED. (1-18)

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLUE CANYON, SITE 13, SFO-SLC ARPT: Clsd due to snow. (1-15)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°;35 n mi 345°-015° at MEA. (8-20)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CAVE MOUNTAIN, SITE 15, LAX-SLC: Bcn changed to 12 rpm clear. (1-31)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DIXON ARPT: Closed. (8-30)

★EL CENTRO-RADIO: Jan 18, VOR flgt-checked and cmsnd. Freq: 113.9 mc. Ident: ELC. Monitor. category (I). Mag var: 14° E. Bear., dist to Imperial County arpt: 313°, 6.9 mi. Ltcd lat. 32-45-00, long. 115-30-30. Elev:-24. Class: BVOR. (1-19)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

**HELENDALE, SITE 10, LAX-AMA: Bcn changed to 12 rpm clear. (1-28)

**INDEPENDENCE-INYO COUNTY ARPT: ABANDONED. (1-2)

KLAMATH-McBETH ARPT: Closed. (6-13)

**LA MESA-SWEETWATER ARPT: ABANDONED. (1-5)

**LIVERMORE-DOW ARPT: Permanently closed - land diverted to farming. (12-19)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°- 070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1)

LOS ANGELES-RADIO - SPECIAL NOTICE: Transcribed weather broadcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (2-1).

★LOS ANGELES-RADIO: Jan 17, trans and rcvr 125.1, 125.9 mc cmsnd. (1-18) VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL.

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn

[redacted]: in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by Air Traffic Control. Jet acft pat down-wind leg is 2500'. Acft not intending landing at airport should avoid approach areas to West and East below 3000' in VFR weather. Recommended cross traffic plan crossing crs at 3000' or above, ceiling permitting, directly over airport, or between LFR and airport. Avoid shoreline West due high performance of departing jet acft. Due non-visibility twr unable to control traffic on last 2400' runway 34. (2-10) Nov 30, transmissometer commissioned, furnishing runway visibility for runways 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline system extending 3000' E of rnwy pavement. (12-3)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700. Touch and go lndgs prohibited on Sat and Sun after 1300. (11-28)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when weather is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not available. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.

OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Concrete paving construction in progress in former gravel area btwn rnwy 27R-9L and taxiway along S side of hangars 3, 4, & 5. Area hazard mrkd. Taxi with caution. (12-8)

OCEANSIDE-RADIO: VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)

ONTARIO-RADIO: VOR/DME coverage 135°-150, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000';200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

**OXNARD AFB-RADIO: USAF VHF/DF discont'd. (1-31)

EDGEMONT-SPECIAL NOTICE: Demolition opern approx 10.8 n mi SSW at Blackhills Ordnance Depot lctd at lat 43-08-11, long. 103-55-36. Pilots are cautioned against flying over or near area at any alt due to possibility of encountering toxic gases.
HURON-HOWES ARPT: Rnwys 17-35 and 8-26 clsd to acft over 12,500 lbs gross weight xcpt portion of rnwy 8-26 from intsxn E to taxi strip. Sod areas clsd xcpt 150' adj to rnwys inside of bndry lgts, usable for lgt acft at pilots' discretion. (4-25)
PHILIP ARPT, SITE 31, CYS-HON: 24' unlgtd p-line N from bcn to transmission line.
PIERRE-RADIO: About Feb 18, VOR will be shut down until approx April 1. During shutdown the following MEA's can be used: Arwy V26: Philip VOR to Pierre LFR 3400'; Pierre to LFR to Huron VOR 3400'. (1-29)
SIOUX FALLS-RADIO: Jan 9, VOR shut down until approx Feb 25. Freq will be changed to 115.0 mc-DME to channel 70. (1-9) During shutdown, the following MEA's can be used: Arwy V15: Huron VOR to Int HON R115 and SUX R335, 7000'; Int HON R115 and SUX R335 to Sioux City VOR 7000'; V181: Watertown VOR to Oakwood Int 3000'; Oakwood Int to Int ATY R160 and HON R115, 7000'. V80: Redwood Falls VOR to Int RWF R228 and SUX R335 3000'. Direct Route: Huron VOR to Sioux Falls LFR 3000'; Sioux Falls LFR-Sioux City VOR 3000'; Sioux Falls LFR-Redwood Falls VOR 3000'; Watertown VOR-Sioux Falls LFR 3000'.
SIOUX FALLS-FOSS FLD-TOWER: Audio interference may be noted lclzr SE thru SW. Approach procedures and lclzr alignment not affected. (12-5) FLD; Several twrs being erected at football fld 0.7 n mi S end of NE/SW rnwy at lat 43-33-50, long. 96-45-10. Tallest twrs 125'MSL will be lighted. (1-3)
TENNESSEE: SPECIAL NOTICE: Attention of all pilots proposing flgt in Green Arwy #5 via Knoxville is invited to the proximity of the W course of Knoxville radio rng to the Atomic Energy Prohibited Area. Slight deviations to the N of course in this area often result in in-flgt identification and the filing of alleged violations against the pilot.
**BRISTOL-TRI-CITY ARPT: Designated as feeder type arpt. Max gross load limitation 30,000 lbs. (12-17) Rnwy 9-27 slippery when wet. (1-28) Hangar const in progress 350' W of N end rnwy 20-2. Height 45' unlgtd. (1-28)
CHATTANOOGA-RADIO: Aural signal similar to Daisy FM being rcvd 17 to 22 n mi NW of LF rng. NE and NW courses LF range have moderate to severe multiples. (7-27)
CHATTANOOGA-LOVELL FLD: All acft within arpt tfc ctl zone between sunset-sunrise must be equipped with transmitter and receiver capable of rcvg instructions from ctl twr; durg daylgt, all acft must be equipped with rcvr capable of rcvg instructions from ctl twr.
KNOXVILLE-RADIO: LF rng has moderate to severe multiples on N and NE courses. **Caution-VOR has occasional momentary course disturbance in mountainous areas.**
KNOXVILLE-McGHEE TYSON ARPT-TOWER: Nov 13, ASR shut down. ILS glide slope inoperative. (1-30)
NASHVILLE-RADIO: VOR courses 60°-120°, beyond 15 n mi and 210°-250°, have bends & roughness out of tolerance. VOR/DME signal coverage 270°-180°, 43 n mi, 180°-270°, 35 n mi at MEA. Due to limited coverage VOR courses, use of temp MEA as follows: V-16 Graham VOR to Nashville VOR via Graham 067° MEA 3000'; V-16 Nashville VOR to Crossville VOR via Crossville 282° MEA 5000'; V-140 Dyersburg VOR to McEwen Int 5000'; McEwen Int to Nashville VOR MEA 4000'. Minimum holding alt McEwen Int to NashvilleVOR MEA 4000'. V-140 Hartsville Int to Highway Int MEA 8000'. V-7 Nashville VOR to Lewisburg Int MEA 4500'. (11-20)
NASHVILLE-BERRY FLD: Taxiway btwn ends of rnwy 9 and 15 clsd for an indefinite period.
TENNESSEE: Rnwy 2R-20L clsd to all tfc as a rnwy - use as a taxiway. (12-28)
TEXAS: ABILENE(NEW)ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)
ALICE-RADIO: VOR radials 85°-105° unreliable. (10-8)
ALICE ARPT: Bndry lgts rnwy 13-31 unreliable. (5-28)
AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.
✱AMARILLO-AIR ROUTE TRAFFIC CONTROL CENTER: Jan 18, freq 301.4 mc decmsnd.
AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27)
AUSTIN-MUELLER ARPT: 1140'(2049'MSL) lgtd twr being erected 4.1 n mi W(280°T) at lat 30-18-35, long. 97-47-33. (1-7) Acft lndg and taking-off are cautioned to avoid Bergstrom AFB tfc pat. - exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green range lgts on rnwy 30 designates touchdown point ngts. (10-4)
BEAUMONT-JEFFERSON COUNTY ARPT: Rnwy 11-29 clsd - construction. (9-19)
BIG SPRING-RADIO: VOR courses 280°-325° and 345°-30° out of tolerance acct bends. DME coverage 130°-190°, 35 n mi at 4000'. (11-19)
BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.
COLUMBUS ARPT: About Feb 4, 200'(564'MSL) twr will be erected 15 n mi NE(57°T) at lat 29-51-56, long. 96-20-46 & being dismantled approx Feb 23. (1-18)
CORPUS CHRISTI-RADIO: Jan 15, VOR shut down until approx Feb 5. During shut down the following temp MEAs have been estab: V-20 ALI-PSX MEA 4000'; V-68 from Int of SAT 159° radial to CRP unusable, from CRP to Kingsville Int unusable. Clareville and Kingsville Ints unusable. All other routes utilizing CRP VOR unusable. (1-30)
✱CORPUS CHRISTI-CLIFF MAUS ARPT-TOWER: Jan 23, trans and rcvr 348.6 mc cmsnd.
COTULLA-RADIO: About Feb 4, VOR will be shut down until approx Feb 25-modernization.
DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000' MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation tk-offs not permitted. Caution-acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd & lgtd. Ctc ctl twr for detailed taxi instructions.
DEL RIO ARPT: Road across N/S strip removed. Rnwy lgts on rnwy 12-30 oper sunset 2400. (12-11)
EL PASO-RADIO: Feb 2, VOR flight checked - opern. normal. (2-2)
EL PASO INTN'L ARPT: 150' AGL twr erected 5.1 n mi W(270°T) at lat 31-47-42, long. 106-29-38. (1-3) Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently closed. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final approach to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on landing lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip avail. Tetrahedron uncontrollable, unreliable-not to be used as traffic direction indicator. (11-27)
FT. WORTH-CARTER FLD-TOWER: Soon, 338.2 and 319.2 mc will be decmsnd and replaced by 363.8 & 236.2 mc, respectively. (1-11)
GEORGETOWN ARPT: N/S and NW/SE rnwys lgts and bcn inop. (6-5)
GRAND PRAIRIE ARPT: Replace prefix (N) with prefix (A). (1-9)
HONDO AIR BASE: Intensive day and night USAF primary trng VFR to 10,000' Monday-Friday, within 35 mile radius. Closed to all civil acft xcpt official business or prior approval USAF Operns or Civil Director of Flying. 2-way radio required. Closed all acft nights, Sat, Sun and holidays except emergency or prior approval. Approval obtained during normal duty hours or by letter. (1-23)
HOUSTON-RADIO: VOR radials 120° thru 140° and 306° unreliable-roughness and scalloping. Caution in vicinity of Cleveland, Texas - intermittent interference. (10-2)
HOUSTON-ANDRAU ARPT: About Feb 11, 200'(358'MSL) twr will be erected 14.5 n mi NW(313°T) at lat 29-53-07, long. 95-47-27 & being dismantled approx Mar 2. (1-18)

TEXAS: HOUSTON-CLOVER ARPT: Caution on lndgs and taxiways. [illegible] erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

**HOUSTON-H & H GUEST RANCH ARPT: No rotating bcn and rnwy lgts avail. (1-16) About Feb 18, 200' (312'MSL) twr will be erected 8.5 n mi NW (322°T) at lat 30-03-15, long. 95-26-05 & being dismantled approx Mar 9. (1-18)

HOUSTON INTNL ARPT: Tetrahedron uncontrollable and unreliable - not to be used as tfc direction indicator. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Rnwy 8-26 clsd for take-offs and lndgs. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. (12-6)

HUDSPETH-RADIO: About Feb 11, VOR will be shut down until approx Mar 4. During this period MEA on V-66 El Paso to Culberson 10,000' MSL. Dove and Antelope VHF int unusable. (1-24)

JACKSONVILLE-WILSON ARPT: About Feb 25, 200' (310'MSL) twr being erected 17.3 n mi ESE (133°T) at lat 31-45-00, long. 95-00-00 & being dismantled approx Mar.16. (1-18)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700. (11-3)

KELLY AFB-RADIO: VOR restricted for civilian use - erratic course displacement. (1-21)

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4)

LUBBOCK-RADIO: Nov 20, LFR shut down until approx Feb 15. Class will be: SBMRLZ.

LUBBOCK ARPT: W 300' of E ramp open as taxiway. E 500' of E ramp clsd to acft for cotton storage. (10-9)

LUFKIN-RADIO: DME coverage 125°-145°, 43 n mi at 1500'; 145°-280°, 35 n mi at 1500'; 280°-305°, 35 n mi at 1700'; 305°-315°, 26 n mi at 1700'; 315°-335°, 35 n mi at 1700'; 335°-015°, 35 n mi at 2000'; 015°-060°, 35 n mi at 1700'; 060°-125°, 35 n mi at 1500'. About Mar 18, VOR will be shut down until approx Apr 8 - during this period VOR flgts authorized to use LFK rbn in lieu VOR except V13E LFK to SHV unusable. Intersections, altitudes and reporting points as charted. (1-14)

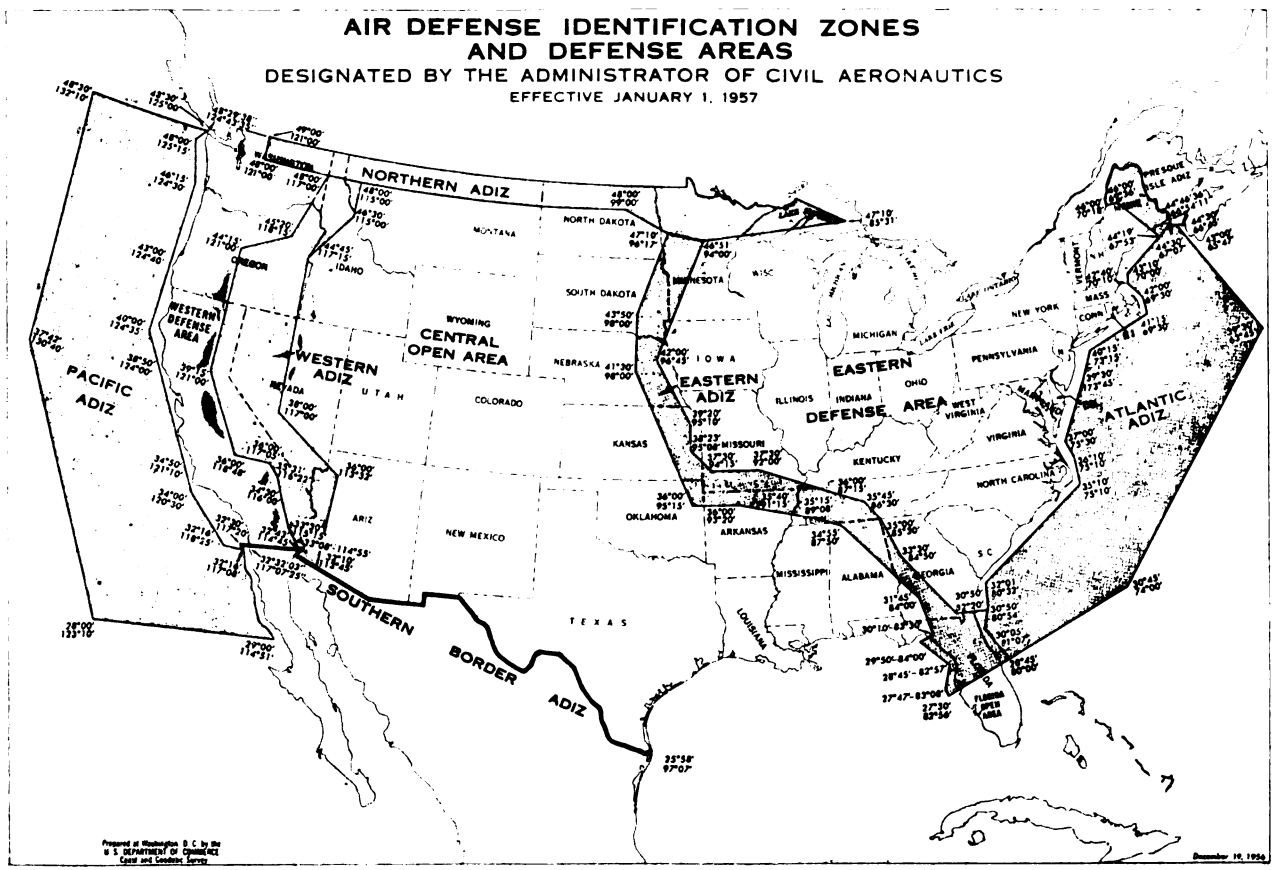
RENTON ARPT: Work in progress on arpt; (11-20)
RIMROCK-TIETON ARPT: Clsd - due snow. (12-7)
**SEATTLE-BOEING FLD: All multi-eng acft use main rnwy. 2-way rdo equipped, medium type, single-eng acft may use main rnwy on req, PROVIDED local tfc permits. Single-eng acft with retractable lndg gear drop lndg gear prior to entering tfc pat. (7-19) 2-way rdo required. xcpt on prior request. (1-29) All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat. W of fld at 1500' - use main rnwys, taxi strips only. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4. W side taxiway clsd to tfc until further notice. (10-11)
SEATTLE-TACOMA INTNL ARPT-TOWER: Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. (3-15)' FLD: Taxiway btwn rnwy 29 and rnwy 34 clsd. Rnwy 11-29 clsd. Radiosonde balloon being released at approx 0300Z, 0900Z, 1500Z, and 2100Z daily - actual release time will be broadcast by Seattle Rdo. (8-14) Hi-intensity apch lgt sys S end rnwy 16-34. First row lgts at N end of sys perm. discontd. Second and third row lgts at N end reestablished. First row lgts now 300' S of rnwy 34. (11-1)
WASHINGTON: SKYKOMISH ARPT: Closed - due snow. (12-7)
SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'. (6-17)
SPOKANE-FAIRCHILD AFB-RADAR APPROACH CONTROL CENTER: Effective Feb 6, radar arrival control will be established. Also receives 122.5 mc, 3023.5 kc and trans & rcvs 298.9 mc.
SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld.
SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable; 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'. FLD: Perm crash barriers 40" high lctd 150' off ends rnwy 3-21.
TACOMA-BARRY'S SKYHARBOR ARPT: Closed. (6-14)
WHIDBEY ISLAND NAS-RADIO: Voice communications out of service. (11-6)
**WINTHROP-PASAYTEN USFS ARPT: Closed. (12-27)
YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.
YAKIMA ARPT: Const in progress on W end rnwy 9-27. First 350' rnwy 9 clsd during daylgt hrs. Area marked by crosses and flags by day. (1-18)
WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (6-18)
CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test basis. (10-29)
ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)
ELKINS MUN ARPT: Rnwy lgts 4-22 inop. Obstn lgts on W twr LFR lctd 3.1 mi N inop.
GLENDALE ARPT: Ditch under construction across N/S rnwy 700' N of S boundary. Will be mrkd by flags. Rnwy length reduced to 2200' until further advised. (12-13)
MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.
MARTINSBURG ARPT: Serv fac avail. 0800-sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Rnwy 8-26 clsd 0700-1800 EST xcpt Sun. Men and equip. on rnwy. (12-3)
MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.
SUTTON, 21, CIN-DCA ARPT: Closed to all acft except single-engine. (1-3)
WISCONSIN: EAGLE RIVER ARPT: 800' S end of N/S rnwy rough, soft - unusable. Arpt closed until May 1, (10-12)
FOND DU LAC ARPT: Caution - use center of rnwys - due soft rnwys and shoulders durg winter and early spring. Snow will be rolled on the center of rnwys. (12-21)
GRANTSBURG-RADIO: Oct 8, VOR shut down until approx Feb 8 - modernization.
LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn.
LAND O'LAKES-KING'S GATEWAY ARPT: Closed due ice or snow. Arpt will be plowed on request.
MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm closed to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop.
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or beofre reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Rnwy 7L-25R open days only. Obstruction lights on approach end of rnwy 13 are obscured by trees. Parking facilities lmtd - itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusion of rnwy 1 with parallel taxiway to left. (8-15)
OCONTO ARPT: E/W rnwy plowed 2850' x 175' - open to wheeled acft. NE/SW rnwy open to ski-equipped acft only. (1-16)
OSHKOSH-WINNEBAGO COUNTY ARPT: Use only N/S and E/W rnwys winter months.
WOODRUFF-ARBOR VITAE-RADIO: H fac operg on request basis. (12-28)
WOODRUFF-ARBOR VITAE ARPT: During winter months, arpt attended week-ends and afternoons when weather is VFR. (12-28)

[redacted]: CASPER-NATRONA CO. ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' & beyond 6 n mi. Not to be used for auto pilot apchs.
CASPER-NATRONA COUNTY ARPT: Two 200 ft. fences SW end of ramp not obstn lgtd.
CHEYENNE ARPT: Overrun lgts (apch lgts) rnwy 26 inop. (10-18)
GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft - clsd to hvy acft.
KEMMERER ARPT: Arpt unsafe for opern of acft with wheels acct snow. (1-28)
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.
ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.
ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM & LFR.

[redacted]
SHERIDAN-RADIO: VOR coverage lmtd to approx 30 n mi between [redacted]
ate course roughness exists in mountainous area.
THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip on fld. Use extreme caution.

[redacted]: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' - 60' high operg intermittently approx 1000' off E end rnwy 9R-27L.
SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)



MAJOR CHANGES Albuquerque ADIZ deleted; Northern ADIZ revised, Outbound traffic restrictions changed.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an indivisual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that thould be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of +4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 111.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND: (MSL) - Mean sea level. (AGL) - Above ground level. B - Antenna structure on a building. DISTANCE is given in nautical miles. BEARINGS are true.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION											CEILING AND VISIBILITY MINIMUMS			
From				To				Course and Distance	Minimum Altitude		Condition	Two Engine or Less		More Than Two Engine More Than 65 Knots
												65 Knots or Less	More Than 65 Knots

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
■ Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR. . . . Air Route Surveillance Radar
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-directional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(19 Feb 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an amergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous wea by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit: "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____) IFR (or) VFR FLIGHT PLAN, OVER"

The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds

Continued on next page.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

(a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.

(b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
"(aircraft identification) THIS IS (name of radar site), (instructions)"
The instructions will normally consist of one of the following:

(a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)

(b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).

(c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).

(d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).

(e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
(a) radio contact with the director is lost.
(b) notified by the radar director that radar contact has been lost.
(c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

5. The chart on page 48 shows the approximate locations of ADC radar stations which can provide this service. The initial call should always be made to "STARGAZER" - the names shown on the chart are not to be used as call signs.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) — . - .. - . - . . . (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the work "omni". Example: AIRVILLE UNATTENDED OMNI

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier

---

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VFR or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

(19 Feb 1957)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 5, 1959, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in 'main body' of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2o00'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

✓ FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

✓ VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

✓ MINIMUM EN ROUTE ALTITUDES: Effective March 14, 1957, the following minimum en route IFR altitude is amended to read in part:

FROM	TO	MEA
VOR CIVIL AIRWAY 123		
Washington, D.C. TVOR	Baltimore, Md. LFR	1600
Baltimore, Md. LFR	Essex Intsxn, Md.	1600
Essex Intsxn, Md.	Port Deposit Intsxn, Md.	2000
Port Deposit, Intsxn, Md.	Woodstown, N. J. VOR	1600

✓ INTERSECTIONS AND REPORTING POINTS ALONG CONTROL 1150: Effective February 10, 1957, MRAs established by flight check for presently established intersections and reporting points along Control 1150. Minimum altitude 15,000 ft. MSL for navigation from a point 75 n miles S of IMN VOR to 25 n miles S of Barracuda Intersection. MRA at Snapper and Tarpon Intersections found at 7,000 ft. MSL. Adequate position fix information exists for navigational guidance within Control 1150 is available from the following commissioned VOR facilities: IMN, MYR, SAV, SSI, JAX, NZC, DAB, ORL, VRB, PBI.

✓ COMPULSORY REPORTING POINTS FOR AIRCRAFT OPERATING BELOW 15,200 FEET MSL: Effective as indicated, the following reporting points are compulsory only for acft operating below 15,200 ft. MSL:

Effective immediately:

HAINESVILLE, TEX. (LF) INTSXN - the intsxn of a line bearing 13°T from the Tyler, Tex. non-directional rdo bcn with the W course of the Shreveport, La. rdo rng and is lctd on Red Civil Arwy No. 10.

Effective March 14, 1957: (Redesignate)

NEW BRAUNFELS, TEX. (VHF) INTSXN - the intsxn of the 074°T radial of the San Antonio, Tex. VOR and the 207°T radial of the Austin, Tex. VOR. (This corrects Airman's Guide, Volume 11, No. 24, dated February 5, 1957, page 12, Item 2(a) under VOR Reporting Points.)

✓ NON-STANDARD HOLDING PATTERN: Effective March 14, 1957, the following non-standard holding pattern is as follows:

NEW BRAUNFELS, TEX. (VHF) INTSXN - direction of holding - NE on the 074°T radial of the San Antonio, Tex. VOR (inbound course 254°T); direction of turns - RIGHT; time - one minute.

✓ TEMPORARY CONTROL AREA EXTENSION: Effective 0001 CST, April 1, 1957 to 2400 CST April 5, 1957, unless otherwise advised the following control area extension is amended as follows:

LAKE CHARLES, LA. Control Area Extension is amended to read: "All that airspace within a 40-mile radius of the Lake Charles, La., rdo rng stn excluding the portion which overlaps the Houston (Beaumont-Palacios-Houston) Control area extension, and excluding the portion below 3000 ft. MSL which overlaps the temporary King Cole Restricted Area".

NOTE: At the end of this period (April 1 - 5, 1957), Lake Charles, La. Control Area Extension as designated prior to this temporary amendment shall again become effective.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 186)
(March 14, 1957)

In Section 608.18, the Pinecastle, Florida, area (R-165 and R-340 formerly D-165 and D-340, respectively), published on November 6, 1954 in 19 F.R. 7225 is amended by changing the "Controlling Agency" column to read: "Commander, Fleet Air, Jacksonville, Fla."

(Part 608 - Restricted Area - Amendment 187)
(See Chart p. 49) (April 1 - April 5, 1957)

In Section 608.26, the King Cole, Temporary Restricted Area, La. is added to read: "Description by Geographical Coordinates: From lat 30-18-00, long. 93-36-00; the SW corner N to lat 30-35-00, long. 93-36-00; thence E to lat 30-35-00, long. 93-16-00; thence S to lat 30-18-00, long. 93-16-00; thence to point of beginning, excluding the Lake Charles AFB Control Zone. Designated Altitudes: Surface to 3000 ft. Time of Designation: Continuous. Controlling Agency: Maneuver Director, Camp Polk, La."

(Part 608 - Restricted Area - Amendment 188)
(See Chart p. 49) (May 20 - May 24, 1957)

In Section 608.26, the Sledge Hammer, Temporary Restricted Area, La., is added to read: "Description by Geographical Coordinates: Beginning at lat 31-47-30, long. 93-24-30, which is the N bndry of Civil Arwy Red 30; thence NE to lat 32-01-00, long. 92-49-30; thence NNW to lat 32-14-30, long. 92-53-30; thence NNE to lat 32-26-30, long. 92-50-00; thence easterly along the southern bndry of Civil Arwy Red 10 to lat 32-25-15, long. 92-29-30; thence SSW to lat 32-15-00, long. 92-32-30; thence SSE to lat 31-51-00, long. 92-25-00; thence WSW to lat 31-37-00, long. 93-02-30, which is the northern bndry of Civil Arwy Red 30 thence along the northern bndry of Red 30 to the point of beginning. Designated Altitudes: Surface to 3000 ft. MSL. Time of Designation: Continuous. Controlling Agency: Maneuver Director, Camp Polk, La."

✓ NEW YORK AREA CONTROL CENTER AIREP EXEMPTION PROCEDURES: Effective March 1, 1957, the New York Area Control Center will effect AIREP exemption procedures for designated acft within the confines of the New York Ocean boundaries as outlined in ICAO DOC 7030 Par 2.3.3. Acft so designated will be advised by transmission of following message from the New York Center "(Acft Ident) AIREP Exempt New York Oceanic Area."

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 11, No. 22, dated January 8, 1957, as follows:

(1) Page 5 - On-Request Reporting Points. Under Designate: Item 6 - Disregard Mackerel, Fla. (VHF) Intsxn. Under Redesignate: Item 6 and 7 - Disregard Shark, Fla. (VHF) and Tarpon, Fla. (VHF) Intsxns. Change back to previous description.

Correct Airman's Guide, Volume 11, No. 24, dated February 5, 1957, as follows:

Minimum En Route Altitudes: Effective March 14, 1957.

(1) Page 5 - V-38 Add the following:

Joliet, Ill. VOR	*Manteno INT, Ill.	2000
*2500 - MRA		
Manteno INT, Ill.	Peotone, Ill. VOR	2000

V-47 is corrected to read:

Cincinnati, Ohio VOR	Englewood INT, Ohio	3000
Hamilton INT, Ohio	Cincinnati, Ohio VOR S-bound only	2300
Englewood INT, Ohio	Dayton, Ohio VOR	2300
Cincinnati, Ohio VOR Via W alter.	Englewood INT, Ohio Via W alter.	2500
Englewood INT, Ohio Via W alter.	Dayton, Ohio VOR Via W alter.	2300

(2) Page 6 - V-76 - Portion of this arwy segment is also part of V-222 from Round Top intsxn to Sealy INT, Tex. MEA 3500' and MOCA 1700'.

(3) Page 7 - V-191 - Big Run INT, Ill. to Chicago (Midway), Ill. TVOR MEA 2100'. (This is also V-69)

(4) Page 8 - V-262 - Change Joliet, Ill. VOR to Chicago (Midway), Ill. TVOR MEA 2000' to read as follows:

Joliet, Ill. VOR	Big Run INT, Ill.	2000
Big Run INT, Ill.	Chicago (Midway), Ill. TVOR	2100

(5) Pages 6 &7 - V-107 and V-209 - Correct to read in part: Long Beach, Calif. VOR to Hermosa Int., Calif. 2000 ft; Hermosa Int. to Pt. Dume Int. 3000 ft; (MCA 4000 ft at Pt. Dume Int., N-bound).

ON-Request Reporting Points: Effective March 14, 1957.

(1) Page 8 - Under Designate: Item 6 - Correct to read: BUFFALO, IOWA (VHF) INT - the intsxn of the 093°T radial of the Iowa City, Iowa VOR and the 230°T radial of the Moline, Ill. VOR.

(2) Page 8 - Under Designate: Item 7 - Correct to read: CHARLOTTE, IOWA (VHF) INTSXN - the intsxn of the 268°T radial of the Polo, Ill. VOR and the 322°T radial of the Moline, Ill. VOR.

(3) Page 8 - Under Designate: Item 24 - Correct to read: FREEPORT, ILL. (VHF) INTSXN - the intsxn of the 276°T radial of the Rockford, Ill. VOR and the 239°T radial of the Janesville, Wis. VOR.

(4) Page 9 - Under Redesignate: Item 6 - Correct to read: COLONA, ILL. (VHF) INT - the intsxn of the 199°T radial of the Moline, Ill. VOR and the E course of the Quad City, Ill ILS lclzr.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

Page 28 - Delta, Utah. Correct CAA telephone number to read: 4741

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

AIN	Wainwright, Alaska, REP (Change from WWT)
AKU	Alakanuk, Alaska, REP (Change from AUK)
AUK	Auke Bay, Alaska (Assignment)
BPI	Big Piney, Wyo. (Assignment)
COI	Cocoa, Fla. Cocoa Arpt (Merritt Island) (Assignment)
ICE	Ice Island, Arctic Ocean (Assignment)
LNL	Lonely, Alaska (Assignment)
OLI	Oliktok, Alaska (Assignment)

TROY, ILLINOIS VOR SHUTDOWN: On or about February 18, 1957, the Troy, Ill. VOR will be shut down for modernization for a period of approximately one month. During the interim period, the following MEA's can be utilized:

When route of flight includes changing to any airway with a higher MEA, flight will be cleared to higher MEA prior to crossing intersection so that intersection will be received to enable pilot to make turn.

Airways, alternate airways and intersections formed by the shutdown VOR will not be utilized except where noted to clear aircraft.

Air carriers should check to determine need to request any direct routes using combination facilities if they desire lower altitudes or require added transitions to approach procedures.

✓ CONTROL AREA 1150 REDESIGNATED: Effective 0001EST February 17, 1957, Control Area 1150 between Wilmington, N.C. and West Palm Beach, Fla. is redesignated as follows: That area within tangent lines drawn from the circumference of a circle 5 miles in radius centered on the Wilmington, N.C. omnirange station to a circle 25 miles in radius centered on Gateway Intersection (the intsxn of the E course of the Jacksonville, Fla. rdo rng and a direct line between the Wilmington, N.C. omnirng stn and the West Palm Beach, Fla. rdo rng stn) to a circle 5 miles in radius centered on the West Palm Beach, Fla. rdo rng stn, excluding the portion below 2000ft MSL which lies outside the [illegible]. The Navy is cooperating by revising warning areas W-157, W-157A, W-158, W-158A and W-132 and the Air Force by revising W-177 all effective 0001EST February 17, to provide for this control area expansion. This redesignation of Control Area No. 1150 and revision of the warning areas is temporary. These areas will be redescribed on or about July 1, 1957 when a new non-directional rdo bcn is commissioned at Wilmington, N.C.

✓ ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outer marker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
✱ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° have bends and roughness out of tolerance. (11-2) About Feb 25, VOR will be shut down until approx April 29. (2-8)
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg., test basis only, at lat 33-40-11, long 86-53-58, about 10 n mi NW Birmingham Mun Arpt. (12-14)
BIRMINGHAM ARPT: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)
**DEMOPOLIS ARPT: Delete "(PC)" prefix. (2-1)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
EVERGREEN, MIDDLETON, 20, MSY-ATL ARPT: Rnwy and threshold lgts inop. (2-6)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
MOBILE-BATES FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in Montgomery-Maxwell area should avoid Maxwell AFB and Dannelly Fld control zones unless in contact with and cleared by the appropriate twr. Extensive flying engaged in at both arpts including practice instr apchs and simulated "flame-outs" by jets from 6500' to Dannelly Fld. (1-22)
✱MONTGOMERY-DANNELLY FLD-TOWER: Glide slope angle 2.67°. Alt. over OM 1800'
** MSL; MM 438' MSL. (2-9) FLD: E/W rnwy const finished - 8000' now avail. Entire E/W taxiway now avail. Dips in E/W rnwy 1500' from E end. Lgtd ditch approxly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
GRAND CANYON (S. RIM) ARPT: Due weather conditions, clsd until April 1. (12-26)
**LIGURTA, BCN SITE 16, SAN-TUS: Rotation changed to 12 rpm. (2-4)
PHOENIX-PARADISE ARPT: Open on racing days only. (2-2)
**PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7) 210'(1450'MSL) lgtd twr erected 3.5 n mi ENE(86°T) at lat 33-26-36, long. 111-56-25. (2-4)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185° 30 n mi at 10,000'.
SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

ARIZONA-SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26) ends.
TUCSON ARPT-SPECIAL NOTICE: Caution-target towing on a direct route off arwy to Ajo, wk
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000';090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000' (d) NE quad 13,000'.
**TUCSON-GILPIN ARPT: Arpt permanently closed. (1-15)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (8-27)
ARKANSAS: FLIPPIN-RADIO: Feb 12 VOR shut down until approx April 16. (2-12)
HARRISON ARPT: Fld clsd nights.
LITTLE ROCK-RADIO: About Feb 18, Keo FM on SE course of LFR will be shut down until approx March 1. (1-31)
**MOUNTAIN HOME-LAHAR FLD: New arpt reported: Type "L"; lat 36-19, long 92-25; lctd 2 mi SW; elev 900'; 1 rnwy; longest rnwy and surface 2350' turf; 80/87 octane gas; remarks - unattended. (9-12)
**PARIS ARPT: ABANDONED. (12-6)
TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends. About January 28, VOR will be shut down until approx March 28 - relctd lat 33-30-50, long 94-04-20. (12-28) VOR flights authorized to use TXK LFR in lieu of VOR.
CALIFORNIA: **ATWOOD ARPT: ABANDONED. (1-18)
AUBURN ARPT: Clsd to hvy acft. Light acft use extreme caution acct soft rnwys. (11-24)
BLUE CANYON, SITE 13, SFO-SLC ARPT: Clsd due to snow. (1-15)
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
CAMARILLO-RADIO: All courses have multiples. (6-17)

CONCORD-BUCHANAN ARPT: Effect. Mar 1, tfc pat alt will be 800' indicated. (2-19)
CRESCENT CITY-RADIO: VOR arwy radials flight-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flight-checked on arwy radials only.
DIXON ARPT: Closed. (8-30)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
FILLMORE-RADIO: VOR cover. 320°-355°, 35 n mi at 11,000', 280°-320°, 26 n mi at 11,000'.
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000';350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL ARPT: Caution, particularly when using VOR arwys. Jets fly areas extended centerlines rnwys 29-11, & areas N & E of arpt; Const ends rnwy 29-11 & adj taxi
**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld closed to all aircraft at sunset.
**HELENDALE, BCN SITE 10, LAX-AMA: Rotation remains 6 rpm. (Corrects Airgi 11-24)
**INDEPENDENCE-INYO COUNTY ARPT: ABANDONED. (1-2)
KLAMATH-McBETH ARPT: Closed. (6-13)
**LA MESA-SWEETWATER ARPT: ABANDONED. (1-5)
**LAVIC, BCN SITE 16, LAX-AMA: Rotation changed to 12 rpm. (2-8)
**LIVERMORE-DOW ARPT: Permanently closed - land diverted to farming. (12-19)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)
✱LONG BEACH ARPT-TOWER: Jan 16, surveillance apch radar cmsnd. (1-16) Freq 2865 mc, 2870 mc. (2-11) Received too late for Radar page.
LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. About March 4, ILS lclzr and glide slope will be shut down until approx May 3, - relctn. FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch light lane discontinued indefinitely. (1-1)

CALIFORNIA: LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined.

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or btwn LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700. Touch and go lndgs prohibited on Sat and Sun after 1300. (11-28)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

**NEWARK, BCN SITE 34, LAX-SFO: Rotation changed to 12 rpm. (1-31)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications & proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flgt should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-8)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emerg only. (8-20)

OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from tower for clearance; make left hand pat before lndg. (10-30) Concrete paving construction in progress in former gravel area btwn rnwy 27R-9L and taxiway along S side of hangars 3, 4 & 5. Area hazard mrkd. Taxi with caution. (12-8)

OCEANSIDE-RADIO: VOR coverage restricted to 35 n mi 310°-020°. (10-24)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and landings prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

CALIFORNIA: PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

**PILOT KNOB, BCN SITE 14, SAN-TUS ARPT: Rotation changed to 12 rpm. (2-4)

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR wea, actual apch IFR wea. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

**SAN ARDO #2 ARPT: Abandoned. (12-28)

SAN CARLOS-SAN MATEO COUNTY ARPT: Mound of dirt adj taxiway at N end has barricades and lgtd with flares. (1-18)

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310°-330°

SAN DIEGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR apch, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN FRANCISCO INTNL ARPT: 130' high pile-driver lctd 2000' W of term bldg - mrkd day and ngt. (2-13)

Rnwy 1R-19L clsd for maintenance, avail taxiing only. (4-2) Rolling surface S end rnwy 7R-25L NATCC preferential rnwy sys in effect. 185' MSL ctl twr is highest arpt structure. Follow exact centerline when using taxiway CC at road overpass. Caution taxi A - acft running up on clsd rnwys 7L-25R, S of intsxn with rnwys 13L-31R. No thru taxiing past gates 7A-8A. Access to gates 1E-7A via taxi B. Access to gates 8A-25 via taxi C. Const in progress adj all paved surfaces. 150' cranes and hvy truck operns within arpt bndry - mrkd. New ext taxiway temp LL from rnwy 13L-31R to taxi E open for full opern. Mrkd by delineators. Follow centerline all taxiways. (10-23) Taxiway D open btwn CC and rnwy 13L-31R. (9-21) Ext of taxiway CC connecting taxi J and U opened. (9-24) Relocated taxi CC btwn A and Z opened. (10-21) Taxi O btwn taxi X and W opened. (10-22)

NEW YORK: New taxiways temp mrkd by delineators. Unstable shoulder conditions. Follow centerline. (10-25) Temp taxi LL btwn taxi E and F opened. Taxi lgts irregularly spaced at taxi F and temp taxi LL. Supplemented with delineators. Taxi M connecting 13R-31L with taxi CC opened. Shoulders unstable. Temp marked by delineators. Caution. Follow centerline. (11-30) Soon a centerline apch lgtg sys serving rnwy 22 will be cmsnd. Sys extends 3000' from rnwy pavement out into apch. Sys consists of green lgts across rnwy at threshold, a red bar lgt on each side of rnwy 100' from the pavement, a red bar lgt on rnwy centerline 200' from the pavement, 27 clear bar lgts on rnwy centerline at approx 100' spacings starting 300' from pavement and a clear crossbar 100' long on rnwy centerline 1000' from pavement. (11-13)
NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with LaGuardia apch ctl on 119.9 mc regardless of wea. No UHF freqs avail for twr contacts. FLD: Clsd to jet propelled acft, motorless, fighter type and acft over 105,000 lbs, also mil acft xcpt those carrying high govt officials. Lndgs and take-offs prohibited unless acft equipped with 2-way rdo, capable of direct commun with ctl twr on gnd ctl 121.7 mc. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. NATCC preferential sys in effect. Transient helicopters land N of bullseye at Marine Air Terminal. General trucking, 40' crane, men and equip. operg inside base of dike-days. 500' apch end of rnwy 31 not usable for lndg acft - days. Obstns and equip mrkd - flags days, lgtd ngts. Equip parked 250' from centerline of rnwys when not in use. (9-28) Soon combination left land apch lgtg system serving rnwy 4 consisting of 1500' hi-intensity lgts with 3600' neon lgts will be decmsnd. Simultaneously, 3000' standard hi-intensity centerline apch lgtg system configuration A will be cmsnd. (1-11) Caution - use paved surface only, sod areas unsuitable for acft operations.
NEW YORK-STATEN ISLAND ARPT: N/S rnwy clsd. No ngt flying permitted. Stay clear of marked-off area in vcnty of windsock. Use grass for taxiing. (5-22)
**NEW YORK-WEST 30TH STREET HELIPORT: Open daylgt hrs only on 30 min advance notice (tel. Longacre 4-2073). Direct commun by 2-way rdo on 122.8 mc reqrd before apch and take-off. Caution - ship tfc in area. (9-27)
NIAGARA FALLS-RADIO: VHF/DF unreliable below 3000' in NE quad, 4000' SE and SW quad and 4500' in NW quad. (6-22)
NIAGARA FALLS ARPT: Local flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with Lake Erie and the Niagara River as W bndry and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. (11-16)
OGDENSBURG ARPT: E/W rnwy clsd - const. (4-24)
**PENN YAN ARPT: Add prefix (PC). (12-14)
PLATTSBURGH-RADIO: VOR radials 260°-280° usable dist 35 n mi at min en route instr alt. DME coverage 265°-280°, 35 n mi at 6000'; 280°-310°, 35 n mi at 4700'; 310°-10°, 35 n mi at 2000'. (6-12)
PLATTSBURGH MUNICIPAL ARPT: VFR tfc pat. for all civil acft in vcnty of arpt is 800' to insure adequate separation from mil jet acft and jet turbulence. Non-rdo equipped acft will not enter Plattsburgh ctl zone unless ceiling is 2500' and visibility 3 mi. Non-rdo equipped acft will maintain 2000' MSL until W of arpt. Over that position, acft shall let down to pat alt.
POUGHKEEPSIE-RADIO: DME coverage 290°-90°, 43 n mi at 5000'.
**ROCHESTER-MONROE CO. ARPT: Due to non-visibility twr unable to ctl tfc in areas S side of fld at E end of hangar line and in vcnty of T-type hangars. Caution taxiing in these areas. No signal btwn sunset-sunrise to indicate gnd visibility of less than 3 mi and/or a ceiling of less than 1000'. (3-3) 2-way rdo required. (11-3)
ROME-GRIFFISS AFB-RADIO: USAF VHF/DF unreliable 360°-90° below 4000', 215°-270° below 6500'; 270°-284° below 6000'; 284°-315° below 5000'; 315°-360° below 4000'.
ROMULUS-SPECIAL NOTICE: Heavy ammunition demolition approx 3 n mi NW at lat 42-46-57, long. 76-53-17, 0730-1615, Mon-Fri. Blasts cause shock and flying missiles up to 1000'
SCHENECTADY CO. ARPT: Due to non-visibility twr unable to ctl tfc on apch end rnwy 10, NG ramp, and portions of taxiways serving rnwys 22 and 33. Caution - lndg jet acft using left hand pat. at 1879' MSL. Sod areas unsafe. Rdo rcvr required. (12-3)
SPITFIRE LAKE: Clsd seaplane operns - except emergency.
SYRACUSE-RADIO: VOR coverage 180°-220°, 35 n mi at min en route alt.

NEW YORK: SYRACUSE-HANCOCK FLD-TOWER: About Mar 6, ILS glide slope, MM, OM and LOM will be shut down until approx Mar 13-relctn, to serve rnwy 28 extended. MM will be lctd 3403' from end of extended rnwy 28; OM 4.74 mi from end extended rnwy; glide slope 400' N of centerline and 1000' from end of extended rnwy 28. Alt over OM 1600'MSL;
**MM 610' MSL. No freq change. (2-1) FLD: VOR ground rcvr check point unusable. Extended rnwy 28 new length 8000'. Old style left hand neon apch lgt lane will be re-commissioned concurrent with ILS relocated fac restoration. (2-1)
UPPER ST. REGIS LAKE: Closed seaplane operns xcpt emerg.
UTICA-RADIO: ILS LMM freq 254kc usable dist. 10 n mi from 270° clockwise to 360°.
UTICA MUN ARPT: Mil acft will not fly over arpt below 2000' MSL. Lgt acft operg in vcnty of Marcy during daylgt hrs. (10-22)
WATERTOWN-RADIO: DME coverage 35 n mi at min en route alt. (7-1)
WHITE PLAINS-WESTCHESTER COUNTY ARPT: First 400' rnwy 23 not visible from ctl twr.
WURTSBORO-MAMAKATING ARPT: Glider and soaring operns being conducted during daylgt hrs within a 10 mi radius of arpt, 33 mi 300° heading from Newburgh.
NORTH CAROLINA: CHARLOTTE-DOUGLAS ARPT: All acft operating in and out of arpt required to have operg transmitter and receiver on a twr freq, xcpt in emerg or on prior approval of twr or arpt mgr's office. (1-20)
CHERRY POINT MCAS-RADIO: Navy LFR shut down. (12-5)
ELIZABETH CITY-RADIO: Dec 5, VOR/DME shut down until approx. Mar 20-relctn.
GREENSBORO-RADIO: DME coverage 140°-160°, 35 n mi at MEA. VOR radials 040°-050°, 310°-005° out of tolerance due to excessive roughness and bends. (12-26)
**GREENSBORO-HIGH POINT ARPT: Centerline hi-intensity apch lgt system serving rnwy 14 commissioned 12-20-56. System extends 3000' from rnwy pavement out into apch. System consists of green lgts across rnwy at threshold, a red bar lgt on each side of rnwy 100' from the pavement, a red bar lgt on rnwy centerline 200' from the pavement, 27 clear bar lgts on rnwy centerline at approx 100' spacings starting 300' from pavement and a clear crossbar 100' long on rnwy centerline 1000' from pavement. Flgt checked. (1-24)
HICKORY-RADIO: About Mar 1, 1957, VOR will be cmsnd at lat 35-52- 19, long. 81-14-19.
KINSTON-STALLINGS AIR BASE: USAF pilot trng base with intensive student trng within 25-mi radius. Clsd to all transient civilian acft xcpt on ofl business, or upon permission from Mil Operns Officer, Director of Flying or Manager, Serv-Air Aviation Corp. 2-way rdo rqrd. (6-17)
LAURINBURG-MAXTON ARPT: New arpt reported: lctn 3.5 mi NNW;elev 220';number of rnwys 1;longest rnwy 6500';remarks-use NE/SW rnwy only. Transient acft park W ramp in vicinity arpt bcn. Caution-vehicular parking and tfc W ramp. No fuel, servicing, telephone facilities until after March. (1-10)
MANTEO ARPT: Rnwy lgts inop. (1-30)
**MT HOLLY FLYING SERVICE ARPT: Formerly carried as Mount Holly. Type changed to "P". (10-30)
NEW BERN-RADIO: VOR areas toward open water flgt-checked at 30 n mi.
RALEIGH-DURHAM-RADIO: DME coverage 120°-230°, 35 n mi;230°-310°, 26 n mi;310°-360°, 35 n mi at MIN. VOR radials 175° thru 290°, out of tolerance account roughness and bends. (11-1)
★RALEIGH-DURHAM ARPT-TOWER: ILS, BC-restricted. (2-14) Rec'd too late for ILS pg. FLD: Due to non-visibility twr unable to ctl tfc on taxiway between rnwys 5 and 32. No signal between sunset-sunrise to indicate gnd visibility of less than 2.6 n mi and/or a ceil. of less than 1000'. Rnwy 18-36 lgtd sunset-sunrise when wind less than 7 mi unless other req.
ROCKY MOUNT-RADIO: VOR radials 150°-180° out of tolerance acct of roughness & bends.
SALISBURY ARPT: Boundary lights inoperative. (2-16)
WEEKSVILLE NAF-RADIO: Navy rng voice inop. (1-10)
WILMINGTON-RADIO: VOR quad 65° to 235° flgt-checked to shoreline only. (8-14)
WILMINGTON-NEW HANOVER CO. ARPT: Helicopters lndg and take-off use caution to avoid 55' unlgtd overhead high voltage p-line running W from ctl twr to arpt bndry. Open ditch 1500' W of midfield intsxn 60' from both sides rnwy 9-27. Due to non-visibility twr unable to ctl tfc on taxi strip btwn rnwys 16 and 23 and section W of hangar on taxi strip from term ramp to rnwy 9. (8-1)
NORTH DAKOTA: FARGO-HECTOR FLD: 1000' of rnwy 17-35 rough for jets on W side starting 4000' from S end. Jets should use center or E side. Stacks of drainage tile 300' W of rnwy 17-35. (12-12)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE VOR

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots

NOTICES TO AIRMEN Page 2

VOL. 11, NO. 26.....MARCH 5, 1957

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF ATCS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from ATCS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-ATCS frequency is 122.1 mc). Eventually all ATCS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at ATCS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an ATCS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of ATCS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

NOMENCLATURE CHANGES FOR INSACS AND OFACS: Effective immediately the following nomenclature changes are in effect:

"Interstate Airway Communications Station" (INSACS) will be replaced by "Air Traffic Communications Station" (ATCS).

"Overseas-Foreign Aeronautical Communications Station" (OFACS) will be replaced by "International Air Traffic Communications Station" (IATCS).

Since the new abbreviations are not phonetic, the short terms "Station" and "International Station" may be used when referring to these facilities.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

The printing of this publication has been approved by the Director of the Bureau of the Budget, April 23, 1956

***

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of a least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departures shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

INABILITY TO COMPLY WITH ATC CLEARANCES: The pilot should always advise air traffic control when his aircraft is not equipped or its performance is insufficient to comply with an issued air traffic control clearance. A brief reason such as "unable account loads" or "unable transmit 3023.5" may be included if considered necessary for clarification. The pilot may then expect an amended air traffic control clearance.

TWO-WAY RADIO FAILURE: Under CAR 60.49 Radio Failure, pilots of IFR flights experiencing two-way radio failure are expected to adhere to the procedures prescribed on page 63 of the current Flight Information Manual under "Two-way Radio Failure," and "En Route Procedures."

However, if a pilot should become lost, or if other factors prevent the pilot from being able to comply with the provisions described on page 63, such pilots, as well as pilots of VFR flights, in the exercise of their emergency authority under CAR 60.2, may elect to attempt to alert civil or military radar systems by flying the appropriate pattern as described on page 49 of the current Flight Information Manual.

INTERFERENCE WITH SEARCH AND RESCUE OPERATIONS: Information received from air rescue units presents evidence that civilian pilots are interfering and, in some cases, jeopardizing aircraft engaged in rescue operations. Most of the instances are caused by pilots on sightseeing flights in the immediate area of an accident. Accordingly, the CAA Office of Flight Operations and Airworthiness strongly urges that pilots who are not engaged in the search and rescue operation refrain from conducting sightseeing flights at the scene of an accident while the rescue operations are being conducted.

FLIGHT OPERATION WITHIN DESIGNATED CONTROL ZONES: There have been an increasing number of incident reports filed in recent months by air traffic control facilities, related to aircraft landing at airports located within control zones, without a traffic control clearance when weather conditions are reported below VFR minimums. Designated control zones are shown on aeronautical charts and are indicated by broken-line circles or other shapes showing exact zone dimensions around certain airports.

Civil Air Regulations, Part 60, paragraphs .30 and .31, state that no aircraft may be flown in a control zone less than 500 feet vertically under, 1000 feet vertically over, or 2000 feet horizontally from any cloud formation, or beneath the ceiling when it is less than 1000 feet, unless authorized to do so by air traffic control.

CAR, Part 60, also requires a pilot to obtain a clearance under the following conditions:

1. When the ground visibility is less than 3 miles, no person shall take off or land at an airport within a control zone or enter the traffic pattern of such an airport.
2. When flight visibility is less than 3 miles within a designated control zone.

Air traffic clearances to conduct any operation within a control zone below basic VFR minimum weather conditions should be requested through the nearest available air traffic communications station, tower or center.

VOR AUTOMATIC REBROADCAST SYSTEM - MARFA, TEXAS: The Marfa, Texas VOR Automatic Rebroadcast system was commissioned January 24, 1957, receiving on frequencies 122.1, 126.7, 135.9, 255.4 and transmitting on voice channel of Marfa VOR 115.9 Mc.

The Marfa VOR does not have an associated ATCS or control tower and the purpose of the Automatic Rebroadcast System is to provide a means whereby aircraft in the area can exchange pertinent information and work out their own landing sequence or other traffic separation problems. Pilots operating in the Marfa area should guard the Marfa VOR for information broadcast from other aircraft. When approaching or departing Marfa, an abreviated flight plan should be transmitted "blind" for rebroadcast by the VOR.

The Automatic Rebroadcast System consists of receivers tuned to 122.1, 126.7, 135.9, and 255.4 Mc so interconnected that aircraft transmissions on these frequencies are broadcast automatically on the VOR voice channel. To prevent broadcast of more than one signal at a time, the first receiver energized by an aircraft transmission locks out the other receivers until the aircraft transmission is ended. To inform the pilot that his transmission was received and broadcast, the system automatically transmits a three-second 400-cycle acknowledgement tone signal at the end of each VOR transmission.

This is a trial installation and comments are solicited from all users. Mail to: Civil Aeronautics Administration, Attention - W-522, Washington 25, D. C.

TEMPORARY CONTROL AREA EXTENSION: Effective 0001 CST, April 1, 1957 to 2400 CST April 5, 1957, unless otherwise advised the following control area extension is amended as follows:

LAKE CHARLES, LA. Control Area Extension is amended to read: "All that airspace within a 30-mile radius of the Lake Charles, La., rdo rng stn excluding the portion which overlaps the Houston (Beaumont-Palacios-Houston) Control area extension, and excluding the portion below 3000 ft. MSL which overlaps the temporary King Cole Restricted Area".

NOTE: At the end of this period (April 1 - 5, 1957), Lake Charles, La. Control Area Extension as designated prior to this temporary amendment shall again become effective.

(5 Mar 1957)

1/ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective April 11, 1957, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Green civil airway No. 8 (Cold Bay, Alaska to Northway, Alaska), is amended by changing the portion between Kenai, Alaska, rdo rng stn and Gulkana, Alaska rdo rng stn to read: "Kenai, Alaska rdo rng stn; the intsxn of the NE course of the Kenai rdo rng and a line bearing 266°T from the Anchorage, Alaska rdo rng; Anchorage, Alaska rdo rng stn; the intsxn of the SE course of the Skwentna, Alaska rdo rng and a line bearing 357°T from the Anchorage, Alaska rdo rng stn; the intsxn of the SE course of the Skwentna, Alaska rdo rng and the NE course of the Anchorage, Alaska rdo rng; Gulkana, Alaska rdo rng stn;"

(2) Red civil airway No. 27 (Atlanta, Ga. to Detroit, Mich.), is amended by correcting the portion which reads: "From the intsxn of the S course of the Atlanta, Ga. NAS rdo rng and the NE course of the Campbellton, Ga. rdo rng via the Atlanta, Ga. NAS rdo rng stn;" to read: "From the intsxn of the S course of the Atlanta, Ga. NAS rdo rng and the NE course of the Atlanta, Ga. rdo rng via the Atlanta, Ga. NAS rdo rng stn;"

(3) Red civil airway No. 103 (Anchorage, Alaska to Middleton Island, Alaska), is amended by changing the first portion to read: "From the Anchorage, Alaska rdo rng stn via the intsxn of a line bearing 266°T from the Anchorage, Alaska rdo rng and the NE course of the Kenai, Alaska rdo rng; Kenai, Alaska rdo rng stn;" (Note: Green 8 and Red 103 redesignated to Anchorage SRA due to fact Merrill rdo rng out of service)

(4) VOR civil airway No. 3 (Key West, Fla. to Presque Isle, Maine), is amended by changing the portion which reads: "Savannah, Ga. omnirng stn, including an E alternate;" to read: "Savannah, Ga. omnirng stn, including an E alternate from the Jacksonville omnirng stn to the Savannah omnirng stn via the intsxn of the Jacksonville omnirng 026°T and the Savannah omnirng 180°T radials;" and by changing the portion which reads: "From the point of intsxn of the Washington, D. C. term omnirng 016°T and the Herndon, Va. omnirng 104°T radials, excluding the portion which overlaps the Washington Prohibited Area (P-56), via the point of intsxn of the Herndon omnirng 045°T and the Baltimore, Md. omnirng 346°T radials; point of intsxn of the Herndon omnirng 045°T and the West Chester omnirng 253°T radials;"to read: "From the Riverdale, Md. nondirectional rdo bcn via the Westminster, Md. omnirng stn; point of intsxn of the Westminster omnirng 056°T and the West Chester omnirng 253°T radials;" (Note: Redesignated V3 between District Intsxn and West Chester VOR. Revoked V3E between Jacksonville VOR and Brunswick VOR. Added V3E between Jacksonville VOR and Savannah VOR.)

(5) VOR civil airway No. 8 (Long Beach, Calif. to Washington, D. C.), is amended by changing the portion which reads: "Kremmling, Colo. omnirng stn;" to read: "Kremmling, Colo. omnirng stn, including a S alternate;" (Note: Added a standard S alternate between Grand Junction VOR and Kremmling VOR)

(6) VOR civil airway No. 19 (El Paso, Tex. to Great Falls, Mont.), is amended by changing the portion which reads: "intsxn of the Kiowa omnirng 360°T and the Cheyenne omnirng 162°T radial;" to read; "intsxn of the Kiowa omnirng 005°T and the Cheyenne omnirng 110°T radials;" (Note: Redesignated V19 between Kiowa VOR and Cheyenne VOR)

(7) VOR civil airway No. 25 (Los Angeles, Calif. to Ellensburg, Wash.), is amended by changing the portion which reads: "intsxn of the Paso Robles omnirng 335°T and the San Francisco omnirng 141°T radials; San Francisco, Calif. omnirng stn; intsxn of the San Francisco omnirng 304°T and the Point Reyes omnirng 155°T radials;" to read: "intsxn of the Paso Robles omnirng 335°T and the Agnew omnirng 141°T radials; Agnew, Calif. omnirng stn; intsxn of the Agnew omnirng 304°T and the Point Reyes omnirng 155°T radials;" (Note: Changed name of San Francisco VOR to Agnew VOR)

(8) VOR civil airway No. 27 (Los Angeles, Calif. to Seattle, Wash.), is amended by changing the portion which reads: "Point Reyes, Calif. omnirng stn, including an E alternate from the Salinas omnirng stn to the Point Reyes omnirng stn via the San Francisco, Calif. omnirng stn and the Oakland, Calif. omnirng stn and also a W alternate from the Salinas omnirng stn to the Point Reyes omnirng stn via the intsxn of the Salinas omnirng 300°T and the Point Reyes omnirng 155°T radials;" to read: "Point Reyes, Calif. omnirng stn, including a W alternate from the Salinas omnirng stn to the Point Reyes omnirng stn via the intsxn of the Salinas omnirng 300°T and the Point Reyes omnirng 155°T radials;" (Note: Revoked V27E between Salinas VOR and Point Reyes VOR and redesignated it as a part of V137)

(9) VOR civil airway No. 57 (Evergreen, Ala. to Scotland, Ind.), is amended to read: "From the Evergreen, Ala. omnirng stn via the intsxn of the Evergreen omnirng 049°T and the Birmingham omnirng 180°T radials; Birmingham, Ala. omnirng stn; Muscle Shoals, Ala. omnirng stn; Graham, Tenn. omnirng stn; Bowling Green, Ky. omnirng stn; to the Scotland, Ind. omnirng stn." (Note: New addition to V57 from Birmingham VOR to Graham VOR. Portion from Evergreen VOR to Birmingham VOR lies partly over V20 and is partly new airspace. Portion from Birmingham VOR to Graham VOR via Muscle Shoals VOR is also existing V7.)

(10) VOR civil airway No. 81 (Midland, Tex. to Pueblo, Colo.), is amended to read: "From the Midland, Tex. omnirng stn via the Lubbock, Tex. omnirng stn; Amarillo, Tex. omnirng stn, including an E alternate; Dalhart, Tex. omnirng stn, including an E alternate; to the Pueblo, Colo. omnirng stn." (Note: Added new portion to V81 from Amarillo VOR to Pueblo, VOR. This portion was formerly a part of V114.)

(11) VOR civil airway No. 110 (San Francisco, Calif to Altamont, Calif.), is amended to read: "From the point of intsxn of the Agnew omnirng 218°T and the Salinas omnirng 319°T radials via the Agnew, Calif. omnirng stn; to the point of intsxn of the Agnew omnirng 038°T and the Modesto, Calif. omnirng 273°T radials." (Note: Changed name of San Francisco VOR to Agnew VOR)

(12) VOR civil airway No. 114 (Amarillo, Tex. to New Orleans, La.), caption changed and is amended by changing all before the Wichita Falls, Tex. omnirng stn to read: "From the Amarillo, Tex. omnirng stn via the Childress, Tex. omnirng stn, including a S alternate; Wichita Falls, Tex. omnirng stn;" (Note: Revoked all of V114 between Pueblo VOR and Amarillo VOR and redesignated this revoked portion as a part of V81.)

(13) VOR civil airway No. 143 (Charlotte, N. C. to Washington, D. C.), is amended by changing the portion which reads: "Charlotte omnirng 359°T" to read: "Charlotte omnirng 005°T" (Note: Minor correction to V143W to superimpose a portion of it from Charlotte VOR to Mooresville Intsxn over V37)

(14) VOR civil airway No. 137 (Thermal, Calif. to Ukiah, Calif.), is amended to read: "From the Thermal, Calif. omnirng stn via the Palmdale, Calif. omnirng stn; point of intsxn of the Bakersfield, Calif. omnirng 210°T and the Coalinga omnirng 152°T radials; Coalinga, Calif. omnirng stn; Salinas, Calif. omnirng stn; Agnew, Calif. omnirng stn; Oakland, Calif. omnirng stn; Point Reyes, Calif. omnirng stn; intsxn of the Point Reyes omnirng 306°T and the Ukiah omnirng 172°T radials; to the Ukiah, Calif. omnirng stn." (Note: Added new portion to V137 from Salinas VOR to Ukiah VOR. Portion Salinas VOR to Point Reyes VOR was formerly V27E. Changed name of San Francisco VOR to Agnew VOR).

(16) VOR civil airway No. 199 (Fresno, Calif. to Ukiah, Calif.), is amended to read: "From the Fresno, Calif. omnirng stn via the intsxn of the Fresno omnirng 287°T and the Agnew omnirng 111°T radials; Agnew, Calif. omnirng stn; intsxn of the Agnew omnirng 304°T and the Ukiah omnirng 172°T radials; to the Ukiah, Calif. omnirng stn." (Note: Change name of San Francisco VOR to Agnew VOR.)

(17) VOR civil airway No. 251 (Washington, D. C. to New York, N. Y.), is amended to read: "From the Riverdale, Md. nondirectional rdo bcn via the Westminster, Md. omnirng stn; Pottstown, Pa. omnirng stn; point of intsxn of the Pottstown omnirng 044°T and the Allentown, Pa. omnirng 103°T radials; to the Caldwell, N. J. omnirng stn." (Note: Added new portion to V251 from Riverdale "H" to Pottstown VOR. Revoked portion of V251 between West Chester VOR and Pottstown VOR and left this portion numbered as V29 only.)

(18) VOR civil airway No. 257 (Delta, Utah to Ogden, Utah), is added to read: "From the Delta, Utah, omnirng stn via the intsxn of the Delta omnirng 004°T and the Ogden omnirng 194°T radials; to the Ogden, Utah omnirng stn. The portion of this arwy below 11,000 ft which overlaps and lies within the Deseret Restricted area (R-514), is excluded." (Note: New airway.)

(19) VOR civil airway No. 265 (Washington, D. C. to Harrisburg, Pa.), is added to read: "From the Riverdale, Md. nondirectional rdo bcn via the Westminster, Md. omnirng stn; point of intsxn of the Westminster, omnirng 345°T and the Harrisburg omnirng 196°T radials; to the Harrisburg, Pa. omnirng stn." (Note: New airway. Portion from Hampton Intsxn to Harrisburg VOR is also part of existing V223.)

(20) VOR civil airway No. 267, is added to read: "(unassigned)."

(21) VOR civil airway No. 268 (Keymar, Md. to Baltimore, Md.), is added to read: "From the point of intsxn of the Martinsburg, W. Va. omnirng 072°T and the Herndon, Va. omnirng 015°T radials via the Westminster, Md. omnirng stn; to the Baltimore, Md. omnirng stn." (Note: New arwy).

CONTROL AREAS:

(1) VOR civil airway No. 3 (Key West, Fla. to Presque Isle, Me.), is amended to read: "All of VOR civil arwy No. 3 including E and W alternates, but excluding all the airspace between the main arwy and its W alternate extending from the Florence, S. C. omnirng stn to the Raleigh, N. C. omnirng stn."

(2) VOR civil airway No. 27 (Los Angeles, Calif. to Seattle, Wash.), is amended to read: "All of VOR civil arwy No. 27, including W alternates."

(3) VOR civil airway No. 57 (Evergreen, Ala. to Scotland, Ind.), is amended to read: "All of VOR civil arwy No. 57."

(4) VOR civil airway No. 81 (Midland, Tex. to Pueblo, Colo.), is amended to read: "All of VOR civil airway No. 81, including E alternates."

(5) VOR civil airway No. 114 (Amarillo, Tex. to New Orleans, La.), is amended to read: "All of VOR civil arwy No. 114 including N alternates and a S alternate."

(6) VOR civil airway No. 133 (Parkersburg, W. Va. to Traverse City, Mich.), is amended to read: "All of VOR civil arwy No. 133."

(7) VOR civil airway No. 137 (Thermal, Calif. to Ukiah, Calif.), is amended to read: "All of VOR civil arwy No. 137."

(8) VOR civil airway No. 251 (Washington, D. C. to New, York, N. Y.), is amended to read: "All of VOR civil arwy No. 251."

(10) VOR civil airway No. 257 (Delta, Utah to Ogden, Utah), is added to read: "All of VOR civil arwy No. 257."

(5 Mar 1957)

(11) VOR civil airway No. 265 (Washington, D.C. to Harrisburg, Pa.), is added to read: "All of VOR civil arwy No. 265."

(12) VOR civil airway No. 267, is added to read: "(unassigned)".

(13) VOR civil airway No. 268 (Keymar, Md. to Baltimore, Md.), is added to read: "All of VOR civil arwy No. 268."

CONTROL AREA EXTENSIONS:

(1) (San Francisco, Calif.), is amended by changing the last sentence to read: "The portion of this control area extension which lies within Point Reyes Warning Area (W-513) is excluded below 3000 ft MSL between the hours 8:00 p.m. and 8:00 a.m. PST, daily and is excluded in its entirety between the hours 8:00 a.m. and 8:00 p.m. PST daily."

(2) (Tucson, Ariz.), is amended by adding the following portion to present control area extension: "and the airspace in the SW quad of the Tucson rdo rng lying within a 30 mile radius of the rdo rng stn."

(3) (Olathe, Kansas), is amended by changing the words in the first portion which read: "to a point at lat 39-17-00, long. 96-23-00" to read: "to a point at lat 39-26-00, long. 96-25-00," and by changing the last portion which reads: "thence N along the western edge of VOR civil arwy No. 15 to a point at lat 39-55-00, long. 95-00-45." to read: "thence N along the western edge of VOR civil arwy No. 15 to the St. Joseph, Mo. omnirng stn."

(4) (Denver, Colo.), is amended by changing the words which read: "that airspace NE of Denver bounded on the E by VOR civil arwy No. 19," to read: "that airspace NE of Denver bounded on the E and NE by VOR civil airway No. 19." (Note: reworded to cover airspace not previously designated due to redesignation of V-19 between Kiowa and Cheyenne, herein).

(5) (Duluth, Minn.), is added to read: "That airspace within a 30 miles radius of the Duluth, Minn. omnirng stn bounded on the N by the 274°T radial of the Duluth omnirng and on the E by VOR civil arwy No. 13."

CONTROL ZONES:

(1) (Burbank, Calif.), is amended to read: "Within a 5 mile radius of the Lockheed Air Terminal, Burbank, including the airspace within a 5 mile radius of the San Fernando Valley Airport, Van Nuys, Calif. and the airspace within a 3 mile radius of the Grand Central Arpt, Glendale, Calif."

(2) (San Diego, Calif.), is amended by adding the following portion to present control zone: "and within 2 miles either side of the 295°T radial of the San Diego term. omnirng extending from the term omnirng stn to a point 10 miles NW."

(3) (Del Rio, Tex.), is added to read: "Wtihin a 5 mile radius of Laughlin Air Force Base, Del Rio, Tex. and within 2 miles either side of a line extending from the center of the Air Force Base NW to the Laughlin AFB nondirectional rdo bcn."

REPORTING POINTS:

(1) Green civil airway No. 8 (Cold Bay, Alaska to Northway, Alaska), is amended by deleting the following reporting point: "the intsxn of the NE course of the Kenai, Alaska rdo rng and the W course of the Anchorage (Merrill), Alaska rdo rng;" and by adding the following reporting points: "the intsxn of the NE course of the Kenai, Alaska, rdo rng and a line bearing 266°T from the Anchorage, Alaska rdo rng; the intsxn of the SE course of the Skwentna, Alaska rdo rng and a line bearing 357°T from the Anchorage, Alaska rdo rng stn;"

(2) Blue civil airway No. 26 (Anchorage, Alaska to Fairbanks, Alaska), is amended to read: "Talkeetna, Alaska nondirectional rdo bcn; Summit, Alaska rdo rng stn." (Note: Willow intsxn deleted from Blue 26 and added on Green 8 for designation purposes)

VOR REPORTING POINTS:

(1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Farina Intsxn - the intsxn of the Vandalia, Ill. omnirng 136°T (132°M) and the Troy, Ill. omnirng 084°T (079°M) radials. (b) North Bend Intsxn - the intsxn of the Bradford, Pa. omnirng 127°T (134°M) and the Williamsport, Pa. omnirng 271°T (280°M) radials. (c) Roscoe Intsxn - the intsxn of the Appleton, Ohio, omnirng 085°T (087°M) and the Mansfield, Ohio omnirng 149°T (151°M) radials.

(2) Domestic VOR reporting points is amended by changing the following reporting point to read: Saltair Intsxn - the intsxn of the Salt Lake City, Utah, omnirng 265°T and the Ogden, Utah omnirng stn 194°T radials.

(3) Domestic VOR reporting points is amended by revoking the following reporting points: (a) Adamsville Intsxn - the intsxn of the Appleton, Ohio omnirng 085°T and the Mansfield, Ohio omnirng 149°T radials. (b) Mooresville Intsxn - the intsxn of the Charlotte, N.C. omnirng 359°T and the Spartanburg, S.C. omnirng 057°T radials. (c) La Grange, Ga. omnirng stn. (d) Anniston, Ala. omnirng stn. (e) Tuscaloosa, Ala. omnirng stn.

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective April 11, 1957:

(See also page 8)

DESIGNATE:

(1) ANNISTON, ALA. VOR

(2) BRANDON, TEX. (VHF) INTSXN - the intsxn of the 036°T radial of the Waco, Tex. VOR and the 169°T radial of the Britton, Tex. VOR.

(3) BRAZOS, TEX. (VHF) INTSXN - the intsxn of the 330°T radial of the Waco, Tex. VOR and the 259°T bearing from West, Tex. Rbn.

(4) BYNUM, TEX. (LF) INTSXN - the intsxn of the NE course of the Prairie Hill, Tex. Rbn. and a 334°T bearing from the Prairie Hill, Tex. Rbn.

(5) CHILTON, TEX. (LF) INTSXN - the intsxn of the SE course of the Waco, Tex. LFR and a 216°T bearing from the Prairie Hill, Tex. Rbn.

(6) CUYAMA, CALIF. (VHF) INTSXN - the intsxn of the 029°T radial of the Santa Barbara, Calif. VOR and the 312°T radial of the Fillmore, Calif. VOR.

(7) DODGER, N.Y. (VHF) INTSXN - the intsxn of the SW course of the LaGuardia, N.Y. ILS lclzr and the 264°T radial of the Idlewild, N.Y. VOR.

(8) ELKIN, N.C. (VHF) INTSXN - the intsxn of the 185°T radial of the Pulaski, Va. VOR and the 281°T radial of the Greensboro, N.C. VOR.

(9) FLATBUSH, N.Y. (LF) INTSXN - the intsxn of the SW course of the LaGuardia, N.Y. LFR and a 291°T bearing toward Newark, N.J. LFR.

(10) FLATBUSH, N.Y. (VHF) INTSXN - the intsxn of the 268°T radial of the Idlewild, N.Y. VOR and the SW course of the LaGuardia, N.Y. ILS lclzr.

(11) FRANKLINTON, N.C. (VHF) INTSXN - the intsxn of the NE (back) course of the Raleigh, N.C. ILS lclzr and the 286°T radial of the Rocky Mount, N.C. VOR.

(12) GORDON, IND. (VHF) INTSXN - the intsxn of the 227°T radial of the South Bend, Ind. VOR and the W course of the South Bend, Ind. ILS lclzr.

(13) HAMPTON, PA. (VHF) INTSXN - the intsxn of the 345°T radial of the Westminster, Md. VOR and the 196°T radial of the Harrisburg, Pa. VOR.

(14) HUDSON, COLO. (VHF) INTSXN - the intsxn of the 016°T radial of the Denver, Colo. VOR and the 272°T radial of the Akron, Colo. VOR.

(15) LaGRANCE, GA. VOR.

(16) LEESVILLE, N.C. (VHF) INTSXN - the intsxn of the NE (back) course of the Raleigh, N.C. ILS lclzr and the 343°T radial of the Raleigh, N.C. VOR.

(17) LOVELAND, COLO. (VHF) INTSXN - the intsxn of the 334°T radial of the Denver, Colo. VOR and the 281°T radial of the Akron, Colo. VOR.

(18) MERIDIAN, TEX. (VHF) INTSXN - the intsxn of the 315°T radial of the Waco, Tex. VOR and the 215°T radial of the Britton, Tex. VOR.

(19) MINEOLA, N.Y. (VHF) INTSXN - the intsxn of the NW course of the Mitchel, N.Y LFR and the back course of the Idlewild, N.Y. ILS lclzr.

(20) MOORESVILLE, N.C. (VHF) INTSXN - the intsxn of the 005°T radial of the Charlotte, N.C. VOR and the 238°T radial of the Greensboro, N.C. VOR.

(21) OAK CITY, N.C. (VHF) INTSXN - the intsxn of the 217°T radial of the Cofield, N.C. VOR and the 086°T radial of the Rocky Mount, N.C. VOR.

(22) PENDLETON, TEX. (LF) INTSXN - the intsxn of the SW course of the Waco, Tex. LFR and a 069°T bearing from Gray AFB, Tex. Rbn.

(23) PINE APPLE, ALA. (VHF) INTSXN - the intsxn of the 049°T radial of the Evergreen, Ala. VOR and the 164°T radial of the Craig, AFB, Ala. VOR.

(24) PINECLIFF, COLO. (VHF) INTSXN - the intsxn of the 302°T radial of the Kiowa, Colo. VOR and the 277°T radial of the Denver, Colo. VOR.

(25) PLAINFIELD, N.J. (VHF) INTSXN - the intsxn of the 229°T radial of the Wilton, Conn. VOR and the 114°T radial of the Stroudsburg, Pa. VOR.

(26) SAW MILL, N.C. (VHF) INTSXN - the intsxn of the 186°T radial of the Cofield, N.C. VOR and the 086°T radial of the Rocky Mount, N.C. VOR.

(27) STATE LINE, WYO. (VHF) INTSXN - the intsxn of the 005°T radial of the Kiowa, Colo. VOR and the 110°T radial of the Cheyenne, Wyo. VOR.

(28) SOUTH PLATTE, COLO. (VHF) INTSXN - the intsxn of the W course of the Denver, (Stapleton), Colo. ILS lclzr and the 302°T radial of the Kiowa, Colo. VOR.

(29) TUSCALOOSA, ALA. VOR

(30) WARRIOR, ALA. (LF) INTSXN - the intsxn of the SW course of the Birmingham, Ala. LFR and a 174°T bearing from Tuscaloosa, Ala. Rbn.

(31) WATKINS, COLO. (VHF) INTSXN - the intsxn of the E course of the Denver (Stapleton), Colo. ILS lclzr and the 334°T radial of the Kiowa, Colo. VOR.

REDESIGNATE:

(1) DODGER, N.Y. (LF) INTSXN - the intsxn of the SW course of the LaGuardia, N.Y. LFR and the NE course of the Idlewild, N.Y. LFR and the 275°T bearing toward Newark, N.J. LFR.

(3) PARKTON, MD. (VHF) INTSXN - the intsxn of the 056°T radial of the Westminster, Md. VOR and the 006°T radial of the Baltimore, Md. VOR.

(4) STANSBURY, UTAH (VHF) INTSXN - the intsxn of the 265°T radial of the Salt Lake City, Utah VOR and the 208°T radial of the Ogden, Utah VOR.

(6) TIMPIE, UTAH (VHF) INTSXN - the intsxn of the 265°T radial of the Salt Lake City, Utah VOR and the 225°T radial of the Ogden, Utah VOR.

(7) WARD, COLO. (VHF) INTSXN - the intsxn of the 292°T radial of the Denver, Colo. VOR and the 175°T radial of the Laramie, Wyo. VOR.

CANCEL:

(1) FARINA, ILL. (VHF) INTSXN - the intsxn of the 132° mag radial of the Vandalia, Ill. VOR and the 079° mag radial of the Troy, Ill. VOR. (Changed to Compulsory)

IN-FLIGHT WEATHER SAFETY SERVICE (Operational Test): Effective March 5, the U. S. Weather Bureau, in cooperation with CAA, has introduced on an operational test basis an In-Flight Weather Safety Service aimed specifically at serving airmen in flight. Special advices, identified as FLASH ADVISORIES, will be broadcast to provide airmen in flight with up to two hours advance notice on the development of areas of potentially hazardous flying weather and the trends for an additional several hours. The advices will deal with potentially hazardous weather such as tornadoes, hail, severe thunderstorm systems (excluding small, isolated thunderstorms), duststorms, icing and major turbulence conditions. Also included will be information on extensive areas of low ceiling and visibility, and strong surface winds.

Currently valid FLASH ADVISORIES will be included in the scheduled weather broadcast of CAA stations within 200 miles of the affected area. Additionally, FLASH ADVISORIES will be given to pilots contacting the stations by radio, as appropriate.

FLASH ADVISORIES will be issued by Weather Bureau FAWS centers for the respective areas of responsibility. (These areas coincide closely with the Air Route Traffic Control Areas shown on the USC&GS Civil Airways and Mileage Charts.) For ready identification by the pilot, FLASH ADVISORIES issued by FAWS Center will be numbered (or lettered) consecutively beginning at midnight of each day.

In-flight weather reports from pilots, particularly reports on indications of developing potentially hazardous weather, will be important to the success of the program and such in-flight reports are earnestly solicited.

Comments and suggestions concerning the FLASH ADVISORIES should be sent to Chief, U. S. Weather Bureau, Washington 25, D. C., Attention: 0-5.31.

TROY, ILLINOIS VOR SHUTDOWN: On or about February 18, 1957, the Troy, Ill. VOR will be shut down for modernization for a period of **approximately one month.** During the interim period, the following MEA's can be utilized:

When route of flight includes changing to any airway with a higher MEA, flight will be cleared to higher MEA prior to crossing intersection so that intersection will be received to enable pilot to make turn.

Airways, alternate airways and intersections formed by the shutdown VOR will not be utilized except where noted to clear aircraft.

Air carriers should check to determine need to request any direct routes using combination facilities if they desire lower altitudes or require added transitions to approach procedures.

NEW YORK AREA CONTROL CENTER AIREP EXEMPTION PROCEDURES: Effective March 1, 1957, the New York Area Control Center will effect AIREP exemption procedures for designated acft within the confines of the New York Ocean boundaries as outlined in ICAO Doc 7030 Par 2, 3, 5. Acft so designated will be advised by transmission of following message from the New York Center: "(Acft Ident) AIREP Exempt New York Oceanic Area."

✓ JACKSONVILLE CENTER-TAMPA RAPCON CONTROL AREA AND FLIGHT ADVISORY BOUNDARY REVISION: Effective 0001E, April 11, 1957, revise the Jacksonville Center-Tampa RAPCON Control Area and Flight Advisory boundaries from point of existing TPA-JAX bndry at 28-28N, 82-00W; northward along the 82-00W meridian to 29-42N, 82-00W; thence westward direct to 29-42N, 82-04W; thence northward direct to 29-56N, 82-04W; thence westward direct to 29-56N, 82-40.50W; thence southerly along the 82-40.50W meridian to the junction with V159 thence in accordance with the presently defined Tampa Area.

✓ CONTROL AND FLIGHT ADVISORY BOUNDARY CHANGES: Effective January 10, 1957, the following Control and Flight Advisory Boundary changes are as follows:

MEMPHIS AND FORT WORTH ARTCS - from 33-30-00, 93-33-00 to 33-01-00, 93-05-00 to 32-55-30, 92-56-30 to 32-41-00, 92-26-00 to 32-34-00, 92-30-00.

FORT WORTH, ALBUQUERQUE AND EL PASO ARTCS - from 33-41-00, 100-46-30 to 33-36-15, 100-57-30 to 33-28-00, 101-00-00 to 32-28-00, 100-37-00.

FORT WORTH, SAN ANTONIO AND EL PASO ARTCS - from 31-15-30, 97-29-00 to (excluding Restricted Areas R219 and R343) 31-21-45, 98-22-45 to 31-27-30, 98-32-30 to 31-52-30, 99-43-30.

✓ RESTRICTED AREA AMENDMENT: The following Restricted Area Amendment shall become effective March 15, 1957:

(Part 608 - Restricted Area - Amendment 189)

In Section 608.43, the Wilmington, Ohio area (R-109), amended on October 31, 1951 in 16 F.R. 11066, is further amended by changing the "Description by Geographical Coordinates" column to read: "beginning at lat 38-48-30, long. 83-02-00; thence West to lat 38-48-30, longitude 83-15-00; thence NW to latitude 39-06-30, long. 84-00-00; thence N to lat 39-20-00, long. 84-00-00; thence NE to lat 39-31-00, long. 83-32-45; thence E to lat 39-41-30, long. 83-15-00; thence SE to lat 39-30-00, long. 83-01-30; thence S to the point of beginning".

✓ ON REQUEST REPORTING POINTS: The following on-request reporting points are designated or redesignated and shall become effective March 14, 1957: (See also page 5)

DESIGNATE:

(1) FABIUS, N.Y. (VHF) INTSXN - the intsxn of the 149°T radial of the Syracuse, N.Y VOR and the 013°T radial of the Binghamton, N.Y. VOR.

(2) HARBOR, WIS. (VHF) INTSXN - the intsxn of the 107°T radial of the Milwaukee, Wis. VOR and the N (back) course of the Milwaukee, Wis. ILS lclzr.

REDESIGNATE:

LAKE PARK, WIS. (VHF) INTSXN - the intsxn of the 098°T radial of the Milwaukee, Wis. VOR and the N (back) course of the Milwaukee, Wis. ILS lclzr.

➡ (See also page 5)

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding pattern is designated and shall become effective March 14, 1957:

FABIUS, N.Y (VHF) INTSXN - direction of holding - SE on the 149°T radial of the Syracuse, N.Y. VOR; direction of turns - LEFT; time - 2 minutes; minimum altitude - 4500'.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are revised or designated and shall become effective April 11, 1957:

REVISE:

(1) Add 2500' minimum holding altitude at Utica, Hanover, Ashley, Newark and Marysville intsxns. 3000' minimum holding altitude at Butler, Pa. Rbn.

DESIGNATE:

(1) BRAZOS, TEX. (VHF) INTSXN - direction of holding - NW on the 330°T radial of the Waco, Tex. VOR; direction of turns - RIGHT; time - one minute; minimum altitude - 1900'.

(2) GORDON, IND. (VHF) INTSXN - direction of holding - W on the W course of the South Bend, Ind. ILS lclzr; direction of turns - RIGHT; time - one minute.

(3) LEESVILLE, N.C. (VHF) INTSXN - direction of holding - NE on the NE (back) course of the Raleigh, N. C. ILS lclzr; direction of turns - RIGHT; time - one minute; minimum altitude - 1500'.

(4) SOUTH BEND, IND ILS/LOM - direction of holding - E on the ILS lclzr; direction of turns - RIGHT; time - one minute.

(5) SOUTH BEND, IND. VOR - direction of holding - N on the 360°T radial; direction of turns - RIGHT; time - one minute.

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are maded from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

FCC AIRCRAFT RADIO STATION LICENCES: The Federal Communications Commission calls attention to the fact that all radio transmitters used aboard civil aircraft must be licenced by the FCC and that the station licence must be carried aboard the aircraft at all times. Application for renewal of expiring or expired licences should be submitted on FCC Form 404. Copies of this form may be obtained from the FCC, Washington 25, D. C., or from any FCC field office.

MINIMUM EN ROUTE ALTITUDES: Effective February 28, 1957 and until further advised the following min en route alts are established as follows:

V-19, Harrington Ranch Intsxn, N. Mex. to Truth or Consequences, N. Mex. VOR - MEA 13,000'; MOCA 10,000'; MRA at Harrington Ranch Intsxn, 13,000'. Also MRA at Harrington Ranch Intsxn is 13,000' on V-16 and V-66.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

SKH	Salina, Kansas, Schilling AFB (Name change from Smoky Hill AFB - Mar 16)
VOA	Viola, Kans. REP (Change from VIO March 15)

ATC PROCEDURES - RADAR TRAFFIC CONTROL: On page 67 of FIM, Volume 10, dated June 15, 1956, insert preceding the last sentence of the first paragraph:

"Therefore, aircraft must not deviate from headings issued by approach control and must not deviate from the normal final approach course unless a clearance to do so is received from air traffic control. After passing the approach fix (outer marker, radio range, etc.) on final approach, aircraft are expected to proceed straight to the airport and complete the apch or effect the missed approach procedure set forth for that airport".

And following the first sentence of the second paragraph, insert:

"Whenever the proposed routing beyond the short-range clearance limit differs from that filed in the original flight plan, the amended routing will be specified, in the short-range clearance issued to the pilot before takeoff. If a loss of two-way communications occurs, the pilot will be expected to follow the amended routing to filed flight plan route and/or destination. (Note: This procedure is also applicable when nonradar short-range clearance is issued)."

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 23 - Little Rock, Ark. Correct CAA telephone number to read: FRanklin 5-3260.

(2) Page 24 - Topeka, Kansas. Correct WB telephone number to read: 2-7281*

(3) Page 29 - Little Rock, Ark. Correct ASDO telephone number to read: FRanklin 2-3910.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Beaumont	San Antonio	WAC 409
Birmingham	Atlanta Local	WAC 410
Little Rock	Miami Local	WAC 466
Mobile	WAC 357	WAC 525
New Orleans		

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

★ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° have bends and roughness out of tolerance. About March 18, VOR will be shut down until approx May 21. (2-26)

BESSEMER-DURHAM ARPT: Caution - auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are marked. Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: VOR operg, test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun Arpt. (12-14)

BIRMINGHAM ARPT: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)

**DEMOPOLIS ARPT: Delete "(PC)" prefix. (2-1)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

EVERGREEN, MIDDLETON, 20 MSY-ATL: ARPT: Rnwy and threshold lgts inop. (2-6)

**HEADLAND ARPT: Permanently closed. (2-19)

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.

MOBILE-BATES FLD: Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld.

ALABAMA: MONTGOMERY-SPECIAL NOTICE: All acft operg in Montgomery-Maxwell area should avoid Maxwell AFB and Dannelly Fld control zones unless in contact with and cleared by the appropriate twr. Extensive flying engaged in at both arpts including practice instr apchs and simulated "flame-outs" by jets from 6500' to Dannelly Fld. (1-22)

★MONTGOMERY-DANNELLY FLD-TWR: Correct alt over OM: 1700' MSL. (2-28) FLD: ** E/W rnwy const finished - 8000' now avail. Entire E/W taxiway now avail. Dips in E/W rnwy 1500' from E end. Lgtd ditch approxly 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2)

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)

★CASA GRANDE-RADIO: Feb 25, VOR cmsnd Freq: 115.1 mc. Ident: CZG. Lctd: lat 32-53-11, long. 111-54-24. Elev. 1320' MSL. Controlled from Gila Bend ATCS. Monitor category (3). Class: VORW (2-25)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (1-4)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable not readily visible to acft strung across canyon lctd near Quatermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

GRAND CANYON (S. RIM) ARPT: Due weather conditions, clsd until April 1. (12-26)

PHOENIX-PARADISE ARPT: Open on racing days only (2-2)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or a ft rqrg use of after burners for take-off, xcpt prior permission arpt manager (12-7)

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SCOTTSDALE-THNUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: VOR/DME coverage 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17)

TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off airway to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

**TUCSON-GILPIN ARPT: Arpt permanently clsd. (1-15)

VALLE-RADIO: About April 20, VOR will be cmsnd. Freq: 115.2 mc. Ident: VLE. Lctd lat 35-37-00, long. 112-09-30. Elev: 6000' MSL. Class: VORW. (3-1)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

**YUMA-VINCENT AFB: Formerly carried as YUMA-County. (2-12)

YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to hvy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11)

ARKANSAS: FLIPPIN-RADIO: Feb 12, VOR shut down until approx April 16. (2-12)

HARRISON ARPT: Fld clsd ngts.

LITTLE ROCK-RADIO: Feb 25, Keo FM on SE crs of LFR shut down until approx March 11. (2-25)

**MOUNTAIN HOME-LAHAR FLD: New arpt reported: Type "L"; lat 36-19, long. 92-25; lctd 2 mi SW; elev 900'; 1 rnwy; longest rnwy and surface 2350' turf; 80/87 oct gas; remarks - unattended. (9-12)

**PARIS ARPT: Abandoned. (12-6)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends. VOR shut down until approx March 28 - relctd lat 33-30-50, long. 94-04-20. VOR flgts authorized to use TXK LFR in lieu of VOR. (1-3)

CALIFORNIA: **ATWOOD ARPT: Abandoned. (1-18)

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLUE CANYON, SITE 13, SFO-SLC ARPT: Clsd due to snow. (1-15)

CALIFORNIA: BLYTHE-RADIO: VOR/DME coverage 45 n mi xcpt 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

★BURBANK-RADIO: Trans and rcvr 121.5 mc cmsnd. (2-26)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CONCORD-BUCHANAN ARPT: Tfc pat alt is 800' indicated. (2-19)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 28 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DIXON ARPT: Clsd. (8-30)

DONNER SUMMIT-RADIO: About Mar 15, H fac freq will be changed to 375 kc. (3-1)

★EDWARDS AFB-RADIO: USAF VOR class: VORW. (2-27)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 3500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL ARPT: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equipment both ends rnwy 29-11 and adj taxiways. (2-5)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

**INDEPENDENCE-INYO COUNTY ARPT: Abandoned. (1-2)

KLAMATH-McBETH ARPT: Clsd. (6-13)

**LA MESA-SWEETWATER ARPT: Abandoned. (1-5)

**LIVERMORE-DOW ARPT: Permanently clsd - land diverted to farming. (12-19)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) FLD: Several 230' MSL portable oil derricks NW, W and S of field. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (11-9) Neon apch lgt lane discontinued indefinitely. (1-1)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed weather bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR and LF combined. (2-1)

★LOS ANGELES-RADIO: Freq 125.1, 125.9 mc change listing to ARTC Center. (2-18) VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intsxn of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intsxn in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing crs at 3000' or above, ceiling permitting, directly over arpt, or btwn LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibilities to be added to observations when prevailing visibility is less than 1-1/2 mi. Hi-intensity apch lgts rnwy 25L converted to centerline sys extending 3000' E of rnwy pavement. (12-3)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

(5 Mar 1957)

CALIFORNIA: OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flight should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications durg IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 200°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.

OAKLAND-METROPOLITAN OAKLAND INTERNATIONAL ARPT: Dredging and clam shell equip working S of ldg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before ldng. (10-30) Concrete paving construction in progress in former gravel area btwn rnwy 27R-9L and taxiway along S side of hangars 3, 4, & 5. Area hazard mrkd. Taxi with caution. (12-8)

VOR has scalloping and bends beyond tolerance between 20°-40° and between 310°-335°. (9-28)
NATCHITOCHES ARPT: 204'(304'MSL) lgtd twr erected approx 1.0 n mi NE(56°T) at lat 31-44-07, long. 93-05-19 & being dismantled about May 1. (2-14)
**NEW IBERIA-IBERIA PARISH ARPT: Change prefix to: "N". (2-28) Arpt clsd to all acft. All rnwys mrkd with white crosses. Arpt now owned by U.S. Navy. (2-13)
NEW ORLEANS-RADIO: VOR radials 271°-339°, out of tolerance acct scalloping & bends.
NEW ORLEANS ARPT: Hvy acft use rnwys only. Lgt acft take-off on rnwys. Acft transporting any items listed in Part 49 of CAR are prohibited from lndg without permission.
NEW ORLEANS-MOISANT INTERNATIONAL ARPT: Caution-stay on hard surface rnwys and taxiways because of incomplete and soft shoulders. Turf extremely hazardous.
RUSTON ARPT: 120'(360'MSL) lgtd twr erected 18.3 n mi W(270°T) at lat 32-48-55, long. 92-35-17 & being dismantled approx. May 1. 204'(504'MSL) lgtd twr erected approx 1.0 n mi WSW(248°T) at lat 32-30-06, long. 92-37-07 & being dismantled about May 1. 162'(462'MSL) lgtd twr erected 16 n mi S(185°T) at lat 32-14-34, long. 93-39-24 & being dismantled approx. May 1. (2-14)
SHREVEPORT-BARKSDALE AFB-RADIO: Standard ANC separation will be used between IFR acft instead of radar separation until further notice. Radar fac will be shut down 0730-0930 daily and 0800-1200 Sun. (11-1) Radar separation standards will be applied as specified in MANOP radar procedures for arpt tfc ctl twrs. Arriving acft will normally be cleared to secondary fixes at alts of 6000' or higher and subsequently vectored by radar to appropriate primary fix. Departing acft will normally be cleared along designated departure routes and after radar contact will be vectored by radar around other air tfc. (2-2)
WELSH ARPT: E/W rnwy closed nights. Beacon inoperative. (7-13)
WINNFIELD-JOYCE ARPT: 162'(462'MSL) lgtd twr erected 19.9 n mi WNW(296°T) at lat 32-06-43, long. 93-00-17 & being dismantled approx. May 1. (2-14)
MAINE: AUGUSTA-RADIO: VOR coverage 80°-160° & 220°-240°, 35 n mi at min en route alt.
BANGOR-RADIO: VOR coverage 360°-50°, 17 n mi; 50°-240°, 26 n mi; 240°-360°, 22 n mi at min en route instr alt. DME coverage 235°-260°, 35 n mi at 2500'.
BREWER ARPT: Open to ski operns only. (1-11)
HOULTON ARPT: Few scattered rnwy lgts inop on rnwy 5-23, three threshold lgts inop on rnwy 23. Six contact lgts out on W side rnwy 1 replaced with smoke pots. (2-4)
★LIMESTONE-LORING AFB-RADIO: USAF VHF/DF decmsnd. (2-28)
**MILLINOCKET ARPT: Boundary lgts avail. Ctc lgts avail. rnwy 16-34 only. (1-24) Apron usable but caution advised due broken pavement and soft spots. (10-3) Rnwy 16-34 not plowed during winter months. (12-3)
**NORWAY ARPT: No fuel avail. Unattended. (1-17)
PHILLIPS-PLEASANT VALLEY FARMS: Ctn-300' WSW end of strip under construction.
PORTLAND ARPT: Rnwy 10-28 open daylgt hrs only. No lgtg avail. Rnwy now 2400' long. Approx 1200' of S end rnwy 02-20 clsd to acft below 5000 lbs due equip. crossing rnwy. New rnwy 11-29 under const. 20' embankment obstruction 200' from apch end of rnwy 33. Mrkd by lgt 250' from apch end of and in line with southerly edge of rnwy 33. (11-15)
PRESQUE ISLE-RADIO: VOR coverage 35 n mi at min instr alt. Flyable bends beyond 17 n mi between 80°-120° and 180°-210°. (9-19)
PRINCETON-RADIO: VOR coverage 150,-240°, 35 n mi&290°-30°, 30 n mi at min instr alt.
ROCKLAND ARPT: Rnwy 17-35 clsd ngt operns.
WATERVILLE-LA FLEUR ARPT: Rnwy 14-32 rough, not maintained. Use at own risk.
MARYLAND: BALTIMORE-RADIO: DME and VOR coverage 35 n mi at min en route instr alt.
CAMBRIDGE ARPT: Arpt reported-1.5 mi SE;elev 20';lat 38-32-02, long. 76-01-45; services minor repairs;80/87 oct; unicom 122.8 mc; 1 rnwy(NW/SE) 2500' x 100'. (12-10)
CAMP SPRINGS-ANDREWS AFB-RADIO: ILS serving rnwy 28 operg for test purposes in conjunction with apch lgt evaluating program for approx 90 days. Lclzr freq: 110.1 mc. Ident: XCS. Glide slope freq: 334.4mc. LMM freq: 245kc, ident: CS. LOM freq: 303 kc. Ident: XC. Lclzr lctd 850' from W end of E/W rnwy; glide slope lctd 350' from center line and 725' from apch end E/W rnwy 28 with antenna mast 35' high obstn lgtd. LMM lctd 3400' from apch end of E/W rnwy; OM lctd 6.34 mi from apch end E/W rnwy. (1-25)

MARYLAND: GRANTSVILLE-RADIO: VOR usable dist 20 n mi from 300° clockwise to 310° at MEA. Light flag activity approx 2 mi from stn from 100° to 160° and from 220° to 320°

HAGERSTOWN ARPT: All taxi strips W of N/S rnwy clsd- parked mil acft. Taxi strips leading to City hangar remain open to transient tfc. Caution-provide proper clearance over U.S. 11 when apchg to land W on E/W rnwy. Rnwy mrkd to show where 40 to 1 apch clearance line intersects rnwy. Entire rnwy available at pilots' discretion.

LAYTONSVILLE-DAVIS ARPT: Ctn-const extending rnwy 500' at ENE end. (7-11)

RISING SUN-FARMINGTON ARPT: Arpt reported - 3 mi SE; elev 140'; lat 39-40, long. 76-05, services minor repairs; 80 oct; 1 rnwy (NE/SW) 2000' x 200'. (12-10)

**ROCKVILLE CONGRESSIONAL ARPT: Abandoned. (1-7)

SALISBURY-RADIO: VOR has flyable bends and roughness on Arwy V-1 to the NE at lower alts. (3-19)

**SALISBURY-DELMARVA ARPT: No fuel or services avail. (1-25) Clsd to all commercial operns. Will oper as private arpt only. Ldgs made with prior permission only. (11-9)

**SALISBURY-WICOMICO CO. ARPT: 130' (207'MSL) lgtd twr erected 8.0 n mi NW (334°T) at lat 38-27-54, long. 75-34-53. (2-14)

WESTMINSTER-RADIO: About Apr 11, VOR will be cmsnd. Freq: 112.0. Ident: EMI. Lctd lat 39-29-42, long. 76-58-44. Elev: 822'MSL. Monitor. category (I). Cltd from Baltimore ATCS. Class: VORW. (3-1)

WHITE MARSH-QUINN ARPT: Arpt reported - 1 mi SW; elev 200'; lat 39-24, long. 76-25; services minor repairs; 80 oct; 1 rnwy (E/W) 2460' x 200'. (12-10)

MASSACHUSETTS: SPECIAL NOTICE: Airport condition information avail by calling State Police Barracks.

BOSTON-RADIO: VOR coverage 26 n mi at min en route alt in all azimuths.

BOSTON-BEDFORD (HANSCOM) ARPT: Rnwy 5-23 clsd xcpt for taxiing and parking. New tfc pat procedures; all acft with pat speed below 110 mph, fly 900' MSL; all conventional acft with speed 110 mph and above, fly 1300' MSL; jets fly 1800' MSL. (11-14)

BOSTON-LOGAN ARPT-TOWER: PAR-1 shut down - relctn. (2-20)FLD: Obstn lgts on 174' stack 1.3 n mi WSW inop. S hangar area W of stn 23 restricted to acft 80,000 lbs or less. Take-offs in northeasterly direction rnwy 4L and ldngs in southwesterly direction rnwy 22R restricted to acft 12,500 lbs or less xcpt in an emerg, as defined by CAR 60.2. Turbojet acft ldngs and take-offs rnwy 4L-22R and take-offs rnwy 33 prohibited. Use marked hard surface rnwys and taxiways only. Other areas including grass shoulders unsafe. Caution - seagulls on and adj to ldg areas. All rnwy widths should be corrected to indicate width of 210' with elevated rnwy lgts 10' from usable rnwy edge. Lead-in lgtg sys rnwy 4R consists of green threshold lgts lctd 2502' NE of the SW end of rnwy 4R and bar lgts of clear white units spaced at 100' intervals on the extended rnwy centerline extending from 42'-1100' SW end of rnwy 4R. Cluster of 6 alternate red and white bar lgts lctd at the 1100' point replaced with single bar white lgt. Standard rnwy lgts btwn threshold lgts and bar lgts. Brightness of lgts is determined by prevailing wea conditions and is controlled by twr. Sequenced flashing lgtg sys servin rnwy 4R cmsnd. Clear flasher units are installed at approx 100' intervals along extended rnwy centerline starting 1140' from end of rnwy pavement and ending 40' from end of rnwy pavement. This sys will be operd under reduced visibility conditions in conjunction with existing lead-in lgtg sys. Caution - during daylgt hrs only, men and equip working outboard of rnwy lgts on rnwy 4R for the first 2600'. (11-23) Supplementary lgts added to existing apch lgtg sys serving rnwy 4R. Complete sys consists of green threshold lgts 2502' NE of SW end of rnwy, 3 white lgts on either side of rnwy spaced at approx 100' intervals btwn threshold lgts and SW end of rnwy, white bar lgts spaced at 100' intervals on extended rnwy centerline from 42'-1142' SW of end of rnwy, sequenced flashing white lgts spaced at approx 100' along the extended rnwy centerline starting from a point 1142' SW of end of rnwy pavement and ending 42' SW of end of rnwy pavement. Opern of lgts is determined by prevailing wea conditions and is controlled by twr. (1-29) First 1/3 rnwy 4R reported uneven by pilots of hi-speed and hvy acft-ctn advised. Until about Apr 26, rnwy 4R-22L clsd Mon-Fri 0800-1700 for pavement repairs xcpt when ceiling or visibility falls below 1000' or 3 mi. During such periods as rnwy 4R-22L is clsd for current emerg repairs, the provistons of SAMB special regulation dated May 27, 1955 restricting use of rnwy 4L-22R will be waived whenever the wind is 15 knots or over and within 30° of rnwy heading 22 or rnwy heading 4, xcpt that no waiver will apply to turbojet acft, to turboprop acft or to acft whose performance characteristics do not permit attaining an alt of at least 500' when taking-off or ldng over the houses in the Bayswater Section of Orient Hgts under the conditions existing at the time. (2-27)

BOSTON-REVERE ARPT: Clsd to all ngt operns. Caution advised during daylgt hrs. Const of highway near apch ends of rnways 13 and 15. (2-6)

MASSACHUSETTS: CHICOPEE FALLS-WESTOVER AFB-RADIO: VHF/DF unreliable SE and SW quads below 4000' beyond 40 n mi. (11-4)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

Radar terminal area transition altitudes - all bearings are from the radar site with sector azimuths progressing clockwise.

%Runways 4-11-29

*Runway 4 only - 200½ or runway visual range of 2600'; provided, that approaches conducted on the basis of reported runway visual range shall be governed by the following: (1) All components of the approach lights and high intensity runway lights shall be in normal operation and (2) descent below the authorized landing minimum altitude of 218' MSL shall not be made unless (a) visual contact with the approach lights has been established or (b) the aircraft is clear of clouds.

#Runway 4 only - runway visual range of 2600' may be utilized in lieu of 200-½ when 200-½ is authorized.

If visual contact not established upon descent to authorized landing minimums or if landing not accomplished . . . . .

→ climb to 1000' on NE crs Newark LFR, then make left climbing turn to 3000' direct to Paterson RBn, or when directed

→ by ATC, make climbing left turn to 2000' direct to Chatham RBn.

Cardinal Int	Lake Park Int* (Final)	Direct	2200				
Lake Park Int*	Harbor Int**	Direct	2300				
Lake Park Int*	Harbor Int** (Final)	Direct	1800				

Radar transition to final approach authorized. Aircraft may be released for final approach without procedure
→ turn at Lake Park Int* Refer to Radar procedure for Milwaukee, Wis., if detailed sector altitudes desired.

Procedure turn W side N crs, 006 Outbnd, 186 Inbnd, 2700' within 10 mi of *Lake Park Int.
No glide slope. 1800' over Lake Park Int*; Brng. & dist. Lake Park Int* to Harbor Int** - 186°-3.0
→ No markers. Brng. & dist: Lake Park Int* to Rny 19, 186-7.0; Harbor Int** to Rny 19, 186-4.0
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished . . . . .
within 4.0 mi, climb to 2000' on localizer crs to MKE LOM or when directed by ARTC:
(1) Make left climbing turn to 2000' & proceed to Sun Fish Int, via V30.
→ *Lake Park Int: Int MKE-VOR R-096 & N crs ILS.
→ **Harbor Int: Int MKE-VOR R-105 & N crs ILS.
NOTE: Procedure authorized only when aircraft equipped to receive ILS & VOR simultaneously.
CAUTION: 787' power line ½ mi N of Rwy-19.
